In real-life conflict resolution situations, one size does not fit all. Just as a mechanic does not fix every car with the same tool, the conflict resolution practitioner cannot hope to resolve every dispute using the same technique. Practitioners need to be comfortable with a wide variety of tools to diagnose different problems, in vastly different circumstances, with different people, and resolve these conflicts effectively. The Conflict Resolution Toolbox gives you all the tools you need: eight different models for dealing with the many conflict situations you encounter in your practice. This book bridges the gap between theory and practice and goes beyond just one single model to present a complete toolbox - a range of models that can be used to analyze, diagnose, and resolve conflict in any situation. It shows mediators, negotiators, managers, and anyone needing to resolve conflict how to simply and effectively understand and assess the situations of conflict they face. And it goes a step further, offering specific, practical guidance on how to intervene to resolve the conflict successfully. Each model provides a different and potentially useful angle on the problem, and includes worksheets and a step-by-step process to guide the reader in applying the tools. Offers eight models to help you understand the root causes of any conflict. Explains each model's focus, what kind of situations it can be useful in and, most importantly, what interventions are likely to help. Provides you with clear direction on what specific actions to choose to resolve a particular type of conflict effectively. Features a detailed case study throughout the book, to which each model is applied. Additional examples and case studies unique to each chapter give the reader a further chance to see the models in action. Includes practical tools and worksheets that you can use in working with these models in your practice. The Conflict Resolution Toolbox equips any practitioner to resolve a wide range of conflicts. Mediators, negotiators, lawyers, managers and supervisors, insurance adjusters, social workers, human resource and labour relations specialists, and others will have all the tools they need for successful conflict resolution.

Indeed, if the legal field is to be understood as instrumental to democracy's cohabitation of individuals, research on dispute resolution remains pre-eminent as a means to understand how individual views differ and how different views can be overcome. As a central part of conflict analysis, such research would assist an interdisciplinary quest for a dynamic understanding of democracy and law. It would focus on how different individuals with different conceptions of the good can live together in their community, in their world. Scientific research in the fields of communication, economics, psychology, history, political theory and philosophy, to name but a few, would side with legal theory in a shared ambition to analyze the way individuals are affected by their views as well as by their institutions, in order to provide society with a dynamic means to solve conflicts and enhance citizenship or legal awareness. Such research necessarily coincides with empathy-oriented education, directed towards an understanding of different conflict positions and the related comprehensive or non-comprehensive views affecting them. An affective education, analyzing all affective mechanisms of societal or interpersonal disputes and their legal or alternative resolution. A clinical education, offering an interactive simulation with regard to these positions and their affective impact, demonstrating how individual views continuously affect the positions taken, how disputes are affected by the legal or other institutions that attempt to solve them, and how the effectiveness of legal or other solutions to the conflict at hand depends on a practice of affective legal analysis. Thus legal and civic education, by way of affective narration and clinical simulation, join affective legal analysis in its endeavor to provide society with a similarly affective and non-rationalizing approach of legal awareness.

Within the past few years, innovative methods have been developed not only to settle disputes out of court but also to supplement or replace the means by which legislatures, businesses, communities, therapists, and schools handle conflicts that once could be resolved only by litigation or force. *Settling Disputes* serves as an essential guide to the new settlement alternatives. This updated edition, in response to the rapid changes of the past five years, includes substantial new material that describes

recent transformations in the way that courts and public agencies respond to disputes. The book discusses alternative dispute resolution from the viewpoints of potential participants and offers advice to those who are involved in disputes to help them analyze their situations and goals. Finally, it provides suggestions for professionals involved in dispute resolution and for those whose jobs in law, business, or government are affected by the new options for settling disputes. The dispute resolution movement continues to offer the most hopeful, powerful alternative to the business and personal costs of litigation or, worse, of violence. It has tremendous implications for the professional lives of Americans, for their private lives—as parents, spouses, neighbors, and consumers—and for their role as citizens. The first edition of *Settling Disputes* was awarded the 1990 Center for Public Resources Book Prize.
