Apple Training Series: Mac OS X v10.5 Deployment v10.5 uses a combination of task-based instruction and strong visuals to teach intermediate and advanced users how to deploy a wide range of files and systems to multiple users in a large organization. Author Kevin White takes readers through the deployment of software, ranging from individual files, to complete systems, to multiple users, discussing the range of methodologies used. Intermediate users will learn how to use Apple deployment tools, including Disk Utility,

PackageMaker, Apple Software Restore, and NetBoot. Advanced users will learn how to customize deployment solutions with scripts to provide post-installation configuration. Throughout the book, users learn how to tie all of the solutions together to create fully integrated software and hardware deployment plans..

The 6th ACIS International Conference on Software Engineering, Research, Management and Applications (SERA 2008) was held in Prague in the Czech Republic on August 20 – 22. SERA '08 featured excellent theoretical and practical contributions in the areas of formal methods and tools, requirements engineering, software process models, communication systems and networks, software quality and evaluation, software engineering, networks and mobile computing, parallel/distributed computing, software testing, reuse and metrics, database retrieval, computer security, software architectures and modeling. Our conference officers selected the best 17

papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members or the program committee, and underwent further rounds of rigorous review.
