A Guide to the Project Management Body of Knowledge (PMBOK Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK Guide. This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK Guide Knowledge

Areas, as well as guidance in these additional areas not found in the PMBOK Guide: \* All project resources, rather than just human resources \* Project health, safety, security, and environmental management \* Project financial management, in addition to cost \* Management of claims in construction This edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the "what" and "why"

---

of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.

Project Management Professional (PMP) is an internationally recognized professional designation offered by the Project Management Institute (PMI). As of March 2018, there are 833,025 active PMP certified individuals and 286 chartered chapters across 210 countries and territories worldwide. The

---

exam is based on the PMI Project Management Body of Knowledge. Exam syllabus: The PMP exam is based on the PMP Examination Specification, which describes tasks out of five performance domains: Initiating the project (13%) Planning the project (24%) Executing the project (31%) Monitoring and controlling the project (25%) Closing the project (7%) The exam consists of 200 multiple choice questions written against the PMBOK specification and the PMP Code of Ethics. The exam is closed book; no reference materials are allowed. Twenty-five of the 200 questions on the exam are "sample" questions used to fine-tune the degree of difficulty and precision of the exam and as such are not counted for or against a test taker. These questions are placed randomly throughout the exam. The test taker is only graded on their proficiency on 175 questions. The numbers in parentheses describe the percentage of questions for each domain. Item references: Each exam item (a question with its possible answers) has at least two references to standard books or other sources of project management. Most of the questions reference the PMI A Guide to the Project Management Body of Knowledge (aka the PMBOK Guide). The PMBOK Guide is currently (2018) in its sixth edition,

---

and the PMP exam changed in March 2018 to align with the updated guide. The Project Management Framework embodies a project life cycle and five major project management Process Groups: Initiating, Planning, Executing, Monitoring and Controlling, Closing. Encompassing a total of 49 processes. Mapped to these five process groups are ten project management Knowledge Areas: Project Integration

Management Project Scope Management Project Schedule Management Project Cost Management Project Quality Management Project Resource Management Project Communications Management Project Risk Management Project Procurement Management Project Stakeholder Management. The processes of these knowledge areas are described by their inputs, tools and techniques, and

outputs. The PMBOK also emphasizes the interaction and interdependence between different process groups. For example, the outputs from one process may be used by one or more other processes as inputs. Purpose: Government, commercial and other organizations employ PMP certified project managers in an attempt to improve the success rate of projects in all areas of knowledge, by applying a standardized and evolving set of project

management principles as contained in PMI's PMBOK Guide.
