Ambulatory Surgery Centers Billing Guide

An Ambulatory Surgery Center is a facility that, very simply, specializes in outpatient procedures.. Some of these procedures are surgeries, whereas others are pain management or diagnostic procedures (e.g. colonoscopies). Generally, the procedures done at an ASC are more extensive than those done at the typical provider's office, but are not so involved that they require a hospital stay.

For ambulatory surgery, code the diagnosis for which the surgery was performed. If the postoperative diagnosis is known to be different from the preoperative diagnosis at the time the diagnosis is confirmed, select the postoperative diagnosis for coding, since it is the most definitive. O. Routine outpatient prenatal visits See Section I.C.15.

Ambulatory surgery center coding guidelines are complex, change often and are different than those for physicians; codes and modifiers that work for physicians are not always acceptable for ambulatory surgery centers. Coder turnover, vacations, and family leaves create cash flow peaks and valleys.

Difference Between Outpatient Coding and Inpatient Coding ...

Many coders struggle with coding operative reports because there are so many guidelines and policies that affect code selection. The process is easier when you break it into seven steps: Review the header of the report. Review the CPT ® codebook (start in the Index). Review the report/documentation. Make a preliminary code selection.

Ambulatory typically means "the ability to walk" but in the context of surgery, it refers to patients who are able to leave the

hospital the same day as the surgery, without being admitted to the hospital. Ambulatory surgery is referred to by other names, commonly called minimally invasive surgery, outpatient surgery or same-day surgery.
