Astral projection is the classic term for what today is more commonly called out-of-body experience or OBE. In this fascinating volume, Robert Bruce has drawn on his lifetime's experience not only traveling in the astral dimension, but teaching others to do so. Astral Dynamics provides, all in one package, a personal narrative, a "how-to," a troubleshooting guide, and a theoretical perspective. Whether you are a skeptic, a veteran astral projector, a novice or an armchair traveler--there is treasure here. Astral Dynamics provides the intelligent and motivated reader with everything needed to put theory into practice: Elements of Projection--Bruce's mind-split theory of what actually goes on during projection New Energy Ways (NEW)--His stunningly practical method of raising awareness by using touch, which Bruce calls tactile imaging. Core Skills--How to succeed at the three tasks that are essential to success in astral projection. Projection Technique--What you need to know to stop reading about astral projection and actually do it. The Akashic Connection--Speculations on things seen and heard while traveling in astral realms. Written in an engaging, unpretentious manner, Astral Dynamics is already considered to be a classic.

The 18th edition of Barron's GRE test preparation manual offers prospective graduate students intensive preparation for the Graduate Record Exam, as it is currently administered. Although question types on the GRE are scheduled to change substantially beginning August 1, 2011, students who opt to take the test before August 1, will find the help they're looking for in this edition. They will want to use Barron's GRE, 18th edition, as their test prep tool. Opening chapters of the 18th edition provide a perspective on the current exam with a GRE overview, advice on effective test-taking tactics, and a diagnostic test to help students pinpoint their strengths and weaknesses. Subsequent chapters review all GRE test areas and include practice exercises for the following topics: antonym, analogy, and sentence-completion questions, reading comprehension, vocabulary, analytical writing, discrete quantitative questions, quantitative comparison questions, data interpretation questions, and math. The math review includes questions in arithmetic, algebra, and geometry. The manual's concluding section presents five full-length model exams that reflect recent GREs in length, question types, and degree of difficulty. All questions are answered and explained. For students who plan to take the GRE after July 31, 2011, the new 19th edition of Barron's GRE (978-0-7641-4616-9) will be available in bookstores everywhere in June 2011.

In the vein of The Creative Habit and The Artist's Way, a manifesto on the creative process from a master of the impossible. Since well before his epic (and illegal) 1974 walk between the Twin Towers of the World Trade Center, Philippe Petit had become an artist who answered first to the demands of his craft—and not just on the high wire, but also as a magician, street juggler, visual artist, builder, and writer. He was a rebel and an autodidact, cultivating the attitudes, resources, and techniques to tackle even seemingly impossible feats. His outlaw sensibility spawned a unique approach to the creative process—an approach he shares, with characteristic enthusiasm, irreverence, and originality, in Creativity: The Perfect Crime. With the reader as his accomplice, Petit reveals fresh and unconventional ways of going about the artistic endeavor, from generating and shaping ideas to practicing, problem-solving, and ultimately pulling off the “coup” itself—executing a finished work. His strategies and insights will resonate with performers of every stripe (actors, musicians, dancers), practitioners of the non-performing arts (writers, artists), professionals in search of new ways of meeting challenges, and individuals simply engaged in the art of living creatively.

Let's Crack Competitive Exams! Cambridge, Mass. : Harvard University Press

The creator of YouTube's ColdFusion explores the development of technology from Industrial Revolution to Artificial Intelligence to figure out what's next. As each new stage of technology builds on the last, advancements start to progress at

an exponential rate. In order to know where we're headed, it's essential to know how we got here. What hidden stories lie behind the technology we use today? What drove the men and women who invented it? What were those special moments that changed the world forever? Dagogo Altraide explores these questions in a history of human innovation that reveals how new technologies influence each other, how our modern world came to be, and what future innovations might look like. From the electric world of Tesla and the steam engine revolution to the first computers, the invention of the internet, and the rise of artificial intelligence, New Thinking tells the stories of the men and women who changed our world with the power of new thought.

Peter Seibel interviews 15 of the most interesting computer programmers alive today in Coders at Work, offering a companion volume to Apress's highly acclaimed best-seller Founders at Work by Jessica Livingston. As the words “at work” suggest, Peter Seibel focuses on how his interviewees tackle the day-to-day work of programming, while revealing much more, like how they became great programmers, how they recognize programming talent in others, and what kinds of problems they find most interesting. Hundreds of people have suggested names of programmers to interview on the Coders at Work web site: www.codersatwork.com. The complete list was 284 names. Having digested everyone's feedback, we selected 15 folks who've been kind enough to agree to be interviewed: Frances Allen: Pioneer in optimizing compilers, first woman to win the Turing Award (2006) and first female IBM fellow Joe Armstrong: Inventor of Erlang Joshua Bloch: Author of the Java collections framework, now at Google Bernie Cosell: One of the main software guys behind the original ARPANET IMPs and a master debugger Douglas Crockford: JSON founder, JavaScript architect at Yahoo! L. Peter Deutsch: Author of Ghostscript, implementer of Smalltalk-80 at Xerox PARC and Lisp 1.5 on PDP-1 Brendan Eich: Inventor of JavaScript, CTO of the Mozilla Corporation Brad Fitzpatrick: Writer of LiveJournal, OpenID, memcached, and Perlbal Dan Ingalls: Smalltalk implementor and designer Simon Peyton Jones: Coinventor of Haskell and lead designer of Glasgow Haskell Compiler Donald Knuth: Author of The Art of Computer Programming and creator of TeX Peter Norvig: Director of Research at Google and author of the standard text on AI Guy Steele: Coinventor of Scheme and part of the Common Lisp Gang of Five, currently working on Fortress Ken Thompson: Inventor of UNIX Jamie Zawinski: Author of XEmacs and early Netscape/Mozilla hacker Mechanical Comprehension Tests Arihant Publications India limited Make sure you're studying with the most up-to-date prep materials! ¡ Hola! Hello! Did you understand this first Spanish word? Yes, you did! Why? Because it was presented to you using a new technique that is making learning languages easier than ever – the Bilingual Reading. We created this book using this technique so that you can learn Spanish in a fast and fun way and whenever you

want. How does this work? It is simple: Bilingual Reading works by reading two versions of the same book or text at once. One version will be on the language you want to learn (in this case we will help you to learn Spanish) and the other version will be in your native language or some other language you are comfortable with – here we will use English. Using this method, you will quickly start discovering the meaning of the words in Spanish and accumulating vocabulary that will soon allow you to read texts that are more complex without having to spend hours and hours looking for every word meaning on a dictionary and trying hard to memorize it. In order to make it easier for you to learn Spanish in a fun way, we gathered in a word a very special group of 12 Spanish short stories. These 12 Spanish short stories for beginners were written using straightforward grammar that is comprehensible for beginners and that will help you rapidly gain more Spanish vocabulary and comprehension. Using Spanish English parallel text, this book will increase your bilingual reading comprehension skills and maximize the time you invest in reading. The book is organized as a Spanish learning book: you can start by reading each paragraph of each story in the two languages (in Spanish English parallel text), then move to read the full story in each language, rereading to consolidate the Spanish fundamentals whenever is necessary. This way you will feel the progress of Spanish language learning when moving from story to story and see your Spanish vocabulary grow as your bilingual reading comprehension increases - allows you to learn Spanish easily and more than that, you can learn Spanish in a fast and fun way. You can even dedicate it a few moments every day so you can even learn Spanish in 10 minutes a day if you want! Let ' s Start? The Volume 2 is also available! Get it also to learn even more words in Spanish, with 10 new short stories!
