"[A] timely book . . . a wonderfully entertaining trip around the board, through 4,000 years of game history." —The Wall Street Journal Board games have been with us even longer than the written word. But what is it about this pastime that continues to captivate us well into the age of smartphones and instant gratification? In *It's All a Game*, Tristan Donovan, British journalist and author of *Replay: The History of Video Games*, opens the box on the incredible and often surprising history and psychology of board games. He traces the evolution of the game across cultures, time periods, and continents, from the paranoid Chicago toy genius behind classics like *Operation* and *Mouse Trap*, to the role of Monopoly in helping prisoners of war escape the Nazis, and even the scientific use of board games today to teach artificial intelligence how to reason and how to win. With these compelling stories and characters, Donovan ultimately reveals why board games—from chess to Monopoly to Risk and more—have captured hearts and minds all over the world for generations. "Splendid . . . A quick and breezy read, it doesn't just tell the fascinating stories of the (often struggling) individuals who created our favorite games. It also manages to convey the entire sweep of board game history, from the earliest forms of checkers to modern-day surprise hits like *Settlers of Catan*." —Mashable "Artfully weaves together culture, business, and ways games impact society." —Booklist "A fascinating and insightful discussion not only of games past, but the socioeconomic and historical factors that contributed to their popularity." —Chicago Review of Books

The *Myth of Capitalism* tells the story of how America has gone from an open, competitive marketplace to an economy where a few very powerful companies dominate key industries that affect our daily lives. Digital monopolies like Google, Facebook and Amazon act as gatekeepers to the digital world. Amazon is capturing almost all online shopping dollars. We have the illusion of choice, but for most critical decisions, we have only one or two companies, when it comes to high speed Internet, health insurance, medical care, mortgage title insurance, social networks, Internet searches, or even consumer goods like toothpaste. Every day, the average American transfers a little of their pay check to monopolists and oligopolists. The solution is vigorous anti-trust enforcement to return America to a period where competition created higher economic growth, more jobs, higher wages and a level playing field for all. The *Myth of Capitalism* is the story of industrial concentration, but it matters to everyone, because the stakes could not be higher. It tackles the big questions of: why is the US becoming a more unequal society, why is economic growth anemic despite trillions of dollars of federal debt and money printing, why the number of start-ups has declined, and why are workers losing out.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." —Global Trends 2040 (2021) *Global Trends 2040—A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Introduction to Law Enforcement CRC Press

This book presents a roadmap for a brand licensing strategy to enable companies to leverage brand value and expand into other product categories or into different markets. Readers will understand both the risks and the benefits of partnerships, how to make the most of a brand's potential in the digital platform, and how to extend a product portfolio through established brands. Brand licensing can be of interest to many stakeholders, including large companies, entrepreneurs, retailers, agencies and even celebrities. This is also a relevant strategy for small and medium-sized enterprises that want to expand their business abroad, reconciling their limited size with their flexibility. Examples of long-standing partnerships are presented and analyzed, with detailed consideration of what has made them so successful. Through the presentation of case studies in the sectors particularly interested in brand licensing, including the art, character, entertainment, fashion, jewelry, sports and toys sectors, this book aims to highlight opportunities, limits and challenges from both the licensor and licensee's perspectives. In particular, these case studies represent an effective basis for comparing different experiences and brand licensing strategies, allowing readers to understand both best practices and pitfalls to avoid when building an effective and enduring licensing program. Chapter objectives, summaries, key learning points and discussion questions reinforce understanding and aid reflection. Practical yet theoretically grounded, this book is particularly suitable for postgraduate, MBA and executive education students interested in strategic brand management, licensing strategy and brand expansion. This book can also serve as a valuable guide for professionals interested in expanding their brand portfolio. This book provides effective tools to evaluate the strategic side of brand licensing and the selection of the appropriate company to be a licensee. Online resources include PowerPoint slides, a test bank of exam questions, a case list and discussion questions.

Although much scholarly and critical attention has been paid to the relationship between rhetoric and environmental issues, media and environmental issues, and politics and environmental issues, no book has yet focused on the relationship between popular culture

and environmental issues. This collection of essays provides a rigorous and multifaceted rhetorical and critical perspective on the ways in which the language and imagery of nature is incorporated strategically into various popular culture texts—ranging from greeting cards to advertisements to supermarket tabloids. As a distinguished group of scholars reveals, our notions about the environment and environmentalism are both reflected in and shaped by our popular culture in fascinating ways never previously examined in an academic context. The consumptive vision of nature presented in these texts represents a wholly American view, one promoting leisure and comfort, and nature as the place to experience them. This good life attitude toward the environment often serves to commodify it, to render it little more than space in which to pursue conventional notions of the American dream. As such, the volume represents a bold and striking vision both of popular culture and of popular notions of an environment that can be either protected or just simply consumed.

Three years before the September 11 bombing of the World Trade Center—a Chinese military manual called *Unrestricted Warfare* touted such an attack—suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in *Unrestricted Warfare* clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting "asymmetrical" or multidimensional attack on almost every aspect of our social, economic and political life.

"A riveting tale told through personal accounts and sketches along the way—ultimately, a story of success against great odds. I enjoyed it enormously." —Tom Brokaw The first book to tell the full story of how a traveling road show of artists wielding imagination, paint, and bravado saved thousands of American lives—now updated with new material. In the summer of 1944, a handpicked group of young GIs—artists, designers, architects, and sound engineers, including such future luminaries as Bill Blass, Ellsworth Kelly, Arthur Singer, Victor Dowd, Art Kane, and Jack Masey—landed in France to conduct a secret mission. From Normandy to the Rhine, the 1,100 men of the 23rd Headquarters Special Troops, known as the Ghost Army, conjured up phony convoys, phantom divisions, and make-believe headquarters to fool the enemy about the strength and location of American units. Every move they made was top secret, and their story was hushed up for decades after the war's end. Hundreds of color and black-and-white photographs, along with maps, official memos, and letters, accompany Rick Beyer and Elizabeth Sayles's meticulous research and interviews with many of the soldiers, weaving a compelling narrative of how an unlikely team carried out amazing battlefield deceptions that saved thousands of American lives and helped open the way for the final drive to Germany. The stunning art created between missions also offers a glimpse of life behind the lines during World War II. This updated edition includes: A new afterword by co-author Rick Beyer Never-before-seen additional images The successful campaign to have the unit awarded a Congressional Gold Medal History and WWII enthusiasts will find *The Ghost Army of World War II* an essential addition to their library.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

This paper focuses on the formulation of doctrine since World War II. In no comparable period in history have the dimensions of the battlefield been so altered by rapid technological changes. The need for the tactical doctrines of the Army to remain correspondingly abreast of these changes is thus more pressing than ever before. Future conflicts are not likely to develop in the leisurely fashions of the past where tactical doctrines could be refined on the battlefield itself. It is, therefore, imperative that we apprehend future problems with as much accuracy as possible. One means of doing so is to pay particular attention to the business of how the Army's doctrine has developed historically, with a view to improving methods of future development. *The Structure of American Industry* Sterling Publishing Company

Is it culture, the weather, or geography that determines prosperity or poverty? As *Why Nations Fail* shows, none of these factors is either definitive or destiny. Drawing on fifteen years of original research, Daron Acemoglu and James Robinson conclusively show that it is our man-made political and economic institutions that underlie economic success (or the lack of it). Korea, to take just one example, is a remarkably homogenous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The differences between the Koreas is due to the politics that created those two different institutional trajectories. Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, the Soviet Union, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, among them: • Will China's economy continue to grow at such a high speed and ultimately overwhelm the West? • Are America's best days behind it? Are we creating a vicious cycle that enriches and empowers a small minority? This updated and revised edition of *Watching the English* -

Fox revisits a strange and fascinating culture, governed by complex sets of unspoken rules and bizarre codes of behavior. She demystifies the peculiar cultural rules that baffle us: the rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid pantomime rule. Class anxiety tests. The roots of English self-mockery and many more. An international bestseller, *Watching the English* is a biting, affectionate, insightful and often hilarious look at the English and their society.
