University of Hawaii Press

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race

and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other

arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

[Comparative Perspectives on School Textbooks](#)

Pearson Prentice Hall  
A sharecropper, a warrior, and a truth-telling prophet, Fannie Lou Hamer (1917-1977) stands as

---

a powerful symbol not only of the 1960s black freedom movement, but also of the enduring human struggle against oppression. *A Voice That Could Stir an Army* is a rhetorical biography that tells the story of Hamer's life by focusing on how she employed symbols—images, words, and even material objects such as the ballot, food, and clothing—to construct persuasive public personae, to influence audiences, and to effect social change. Drawing upon dozens of newly recovered Hamer texts and recent interviews with Hamer's friends, family, and fellow activists, Maegan Parker Brooks moves chronologically through Hamer's life. Brooks recounts Hamer's early influences, her intersection with the black freedom movement, and her rise to prominence at the 1964 Democratic National Convention. Brooks also considers Hamer's lesser-known contributions to the fight against poverty

and to feminist politics before analyzing how Hamer is remembered posthumously. The book concludes by emphasizing what remains rhetorical about Hamer's biography, using the 2012 statue and museum dedication in Hamer's hometown of Ruleville, Mississippi, to examine the larger social, political, and historiographical implications of her legacy. The sustained consideration of Hamer's wide-ranging use of symbols and the reconstruction of her legacy provided within the pages of *A Voice That Could Stir an Army* enrich understanding of this key historical figure. This book also demonstrates how rhetorical analysis complements historical reconstruction to explain the dynamics of how social movements actually operate.

### **Civil War Ghosts of South Carolina** Springer

This volume looks back on the history of the Department of Housing and

Urban Development (HUD) and looks forward to ways the agency might evolve. Since HUD was created, it has helped communities address the most pressing challenges facing their residents. HUD's core functions include providing assisted housing, promoting responsible homeownership, ensuring fair housing, and fostering community development. Contents: The Founding and Evolution of HUD: 50 Years, 1965-2015; Race, Poverty, and Federal Rental Housing Policy; Urban Development and Place; Housing Finance in Retrospect; Poverty and Vulnerable Populations; Housing Policy and Demographic Change; Places as Platforms for Opportunity: Where We Are and Where We Should Go. Figures. This is a print on demand report. **Institutional Pathways to Equity** National Academies Press

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and

scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves

as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. *World Migration Report 2020* United Nations AmericaPrentice Hall *Parenting Matters* William Morrow & Company Questions of equity and inequality have moved to the center of debates on development and poverty reduction. This reflects growing awareness that even countries with high rates of growth can experience stagnating or increasing inequality, and that inequality can itself limit the poverty reducing effects of growth. Indeed, recent work indicates that, in addition to its intrinsic value, equity should be valued for its positive impacts on growth and the poverty-reducing effects of such growth. These concerns are coupled with questions of governance. This is because institutional arrangements affect not only overall rates of growth but also the distributional effects of growth, and are themselves more or less equitable in their structure and functioning. How given institutional arrangements emerge over time, with their implications for growth and equity, remains less understood. 'Institutional Pathways to Equity: Addressing Inequality Traps'

tackles the relationship between equity and development, the place of institutions in determining these relationships, and the conditions under which particular institutional arrangements can either block or promote transitions toward more equitable forms of development. The chapters, originally commissioned as background documents for the preparation of the World Development Report 2006, are prepared by leading scholars from the fields of economics, political science, sociology, geography, and development studies. The book speaks directly to current discussions on inequality, poverty, and growth and will contribute to the construction of a historically informed political economy of development. The book specifically highlights the importance of inequality, institutional change through social mobilization, and institutional change through state policies. The authors show that, under certain conditions, state institutions can and have taken a leading role in promoting policies to redress inequitable social relations and so weaken the social foundations of inequality traps. *A Voice That Could Stir an Army* National Academies Press Allergy is the sixth leading cause of chronic illness in the United States. More than fifty million Americans suffer from

allergies, and they spend an estimated \$18 billion coping with them. Yet despite advances in biomedicine and enormous investment in research over the past fifty years, the burden of allergic disease continues to grow. Why have we failed to reverse this trend? *Breathing Space* offers an intimate portrait of how allergic disease has shaped American culture, landscape, and life. Drawing on environmental, medical, and cultural history and the life stories of people, plants, and insects, Mitman traces how America's changing environment from the late 1800s to the present day has led to the epidemic growth of allergic disease. We have seen a never-ending stream of solutions to combat allergies, from hay fever resorts, herbicides, and air-conditioned homes to numerous potions and pills. But, as Mitman shows, despite the quest for a magic bullet, none of the attempted solutions has succeeded. Until we address how our changing environment—physical, biological, social, and economic—has helped to create America's allergic landscape, that hoped-for success will continue to elude us.

### **Lies My Teacher Told Me**

Taylor & Francis

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has

been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

### *Mississippi: Conflict & Change* Routledge

Scientific research and science-guided practice based on the promotion of an individual's strengths constitutes a radical shift in a new and growing area of study within the field of human development. Its trademark term is 'positive youth development'. This approach to human development is based on the idea that, in addition to preventing problems, science and practice should promote the development of competencies, skills, and motivation in order to enhance individuals' developmental pathways. Approaches to Positive Youth Development, is based on this concept and brings together authors from across Europe and America who are leaders in their respective fields. The main focus of the book, beyond a clarification of the paradigmatic foundations, concerns the major contexts of adolescents and young adults, namely, neighbourhoods and leisure locales, school and family, and the major themes of healthy psychosocial development, namely, competences and

knowledge, prosocial behaviour, transcending problems of delinquency, civic engagement, identity, agency, and spirituality.

### *(Re)Constructing Memory: Textbooks, Identity, Nation, and State Pantheon*

This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation.

Authors' voices come from a variety of contexts – some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about "who we are" not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in

increasingly larger and more inclusive contexts.

### *Pathways to the Present*

National Academies Press

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

### Rewarding Provider

Performance Springer Nature

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

*Rural America's Pathways to College and Career* Springer Science & Business Media

This text provides in-depth balanced content covering the beginnings of U.S. history through the present.

### **Strengthening Forensic Science in the United States** National Academies Press

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to

stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in *Global Trends 2030*, including: a review of the four previous *Global Trends* reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone

This publication helps anticipate where the world

will be: socially, politically, technologically, and culturally over the next few decades. Keywords: Global Trends 2030 Alternative Worlds, global trends 2030, Global Trends series, National Intelligence Council, global trajectories, global megatrends, geopolitics, geopolitical changes Approaches to Positive Youth Development National Academies Press Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings

of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as

---

a roadmap for the future of parenting policy, research, and practice in the United States.

*Teaching What Really Happened* SAGE

SUMMARY: A textbook which traces the history of Mississippi from prehistoric times until today, covering all areas of social life and concentrating on recent developments, especially the civil rights struggle and the search for social justice.

*Asian/American Curricular Epistemicide* National Academies Press

From the publisher: Provides a comprehensive history of the more than 120 African Americans who have served in the United States Congress.

Written for a general audience, this book contains a profile of each African-American Member, including notables such as Hiram Revels, Joseph Rainey, Oscar De Priest, Adam Clayton Powell, Shirley Chisholm, Gus Hawkins, and Barbara Jordan. Individual profiles are introduced by contextual essays that explain major events in congressional and U.S. history. Illustrated with many portraits, photographs, and charts.

“Re-Membering” History in Student and Teacher Learning  
Prentice Hall

The author, folklorist, and noted storyteller provides brief summaries of US Civil War in South Carolina and the various putative hauntings related to that

war. Told in an accessible, folksy narrative, the stories are sure to entertain and enlighten.
