The American Airlines SABRE Reservation System

SABRE, which is an acronym for 'Semi-Automated Business Research Environment,' was the first information system of its kind and was the result of a joint venture between IBM and American Airlines. Initially, it was used as an electronic reservations system and replaced the old manual

procedure of hand-written reservations.

American Airlines selects Sabre reservations system « Sabre
Shortly thereafter, SABRE began to be marketed to other airlines, many of which were smaller than American Airlines. The first of which were Pan America and Delta. Each used a different computer because of their small size, the 7080 and the 7074 respectively. In tandem with this expansion, IBM developed the system 360 software. Its main innovation was software marketable to

any size airline similar to Pan America and Delta's needs. [SABRE Guide - Weebly](#)
The Sabre (Semi-Automatic Business Research Environment) central reservation system, which was originally a part of American Airlines, pioneered online transactions. For the first time, computers were connected together through a network that allowed people around the world to enter data, process requests for information and conduct business.

In the 1950s, American Airlines was facing a serious challenge in its ability to quickly handle airline reservations in an era that witnessed high growth in passenger volumes in the airline industry. Before the introduction of SABRE, the airline's system for booking flights was entirely manual, having developed from the techniques originally developed at its Little Rock, Arkansas reservations center in the

1920s.

[Sabre \(computer system\) - Wikipedia](#)

There are three levels of itinerary pricing and ticketing in SABRE. All known as “PHASES”. Phase 3 SABRE will automatically price the PNR at the fare required. Phase 3.5 SABRE does not automatically price the itinerary at the fare required and another fare basis needs to be forced into the pricing entry.

Sabre Reservation manual - FlyingWay

In 1993, American Airlines combined the internal technology teams to form

The Sabre Technology Group, and pioneered another first when Kathy Misunas was named CEO – one of the first female CEOs in the technology sector. In 1996, AMR Corp. – the parent company of American Airlines – made The Sabre Group a separate subsidiary of AMR and did an initial public offering of Sabre stock, with AMR as the majority owner.
