Criminal Justice in America, Loose-Leaf Version The New Press

A Brief Introduction to Corrections shows students how to think practically about the correctional system by offering them a proven, problem-based approach to learning in a concise and accessible format. In this first edition, author Robert D. Hanser, draws on his many years of combined practitioner and academic experience to hone in on the core topics to demonstrate how the day-to-day practitioner conducts business in the field of corrections in both institutional and community settings.

A Reporter's Undercover Journey into the Business of Punishment West Academic Publishing

This highly acclaimed criminology text presents an up-to-date review and analysis of criminological theories. It incorporates current examples of deterrence research regarding crimes such as domestic violence, drunk driving, and capital punishment, and features thought-provoking discussion of the relativity of crime. The authors explore the crime problem, its context, and the causes of crime. Extensive discussion of evolving laws is included, and while the prevalence of the scientific method in the field of criminology is highlighted, the impact of ideology on explanations of crime is the cornerstone of the book. This new edition includes extensive revision of Chapter 6, now titled "Biosocial Theories of Crime," retaining much of the thoughtful historical discussion of earlier editions, but incorporating a substantial expansion of current biological research integrated with both social and biological variables. In addition, Chapter 10, "Recent Developments in Criminological Theory," offers an expanded treatment of life-course criminology.

Prison Profiteers Cambridge University Press
An engaging, necessary look at the private prison system, and a convincing clarion call for prison reform." —NPR.org New York Times Book Review 10 Best Books of 2018 * One of President Barack Obama's favorite books of 2018 * Winner of the 2019 J. Anthony Lukas Book Prize * Winner of the Helen Bernstein Book Award for Excellence in Journalism * Winner of the 2019 RFK Book and Journalism Award * A New York Times Notable Book A ground-breaking and brave inside reckoning with the nexus of prison and profit in America: in one Louisiana prison and over the course of our country's history. In 2014, Shane Bauer was hired for \$9 an hour to work as an entry-level prison guard at a private prison in Winnfield, Louisiana. An award-winning investigative journalist, he used his real name; there was no meaningful background check. Four months later, his employment came to an abrupt end. But he had seen enough, and in short order he wrote an exposé about his experiences that won a National Magazine Award and became the most-read feature in the history of the magazine Mother Jones. Still, there was much more that he needed to say. In *American Prison*, Bauer weaves a much deeper reckoning with his experiences together with a thoroughly researched history of for-profit prisons in America from their origins in the decades before the Civil War. For, as he soon realized, we can't understand the cruelty of our current system and its place in the larger story of mass incarceration without understanding where it came from. Private prisons became entrenched in the South as part of a systemic effort to keep the African-American labor force in place in the aftermath of slavery, and the echoes of these shameful origins are with us still. The private prison system is deliberately unaccountable to public scrutiny. Private prisons are not incentivized to tend to the health of their inmates, or to feed them well, or to attract and retain a highly-trained prison staff. Though Bauer befriends some of his colleagues and sympathizes with their plight, the chronic dysfunction of their lives only adds to the

prison's sense of chaos. To his horror, Bauer finds himself becoming crueler and more aggressive the longer he works in the prison, and he is far from alone. A blistering indictment of the private prison system, and the powerful forces that drive it, *American Prison* is a necessary human document about the true face of justice in America.

Biostatistics Routledge

When the tough-on-crime politics of the 1980s overcrowded state prisons, private companies saw potential profit in building and operating correctional facilities. Today more than a hundred thousand of the 1.5 million incarcerated Americans are held in private prisons in twenty-nine states and federal corrections. Private prisons are criticized for making money off mass incarceration—to the tune of \$5 billion in annual revenue. Based on Lauren-Brooke Eisen's work as a prosecutor, journalist, and attorney at policy think tanks, *Inside Private Prisons* blends investigative reportage and quantitative and historical research to analyze privatized corrections in America. From divestment campaigns to boardrooms to private immigration-detention centers across the Southwest, Eisen examines private prisons through the eyes of inmates, their families, correctional staff, policymakers, activists, Immigration and Customs Enforcement employees, undocumented immigrants, and the executives of America's largest private prison corporations. Private prisons have become ground zero in the anti-mass-incarceration movement. Universities have divested from these companies, political candidates hesitate to accept their campaign donations, and the Department of Justice tried to phase out its contracts with them. On the other side, impoverished rural towns often try to lure the for-profit prison industry to build facilities and create new jobs. Neither an endorsement or a demonization, *Inside Private Prisons* details the complicated and perverse incentives rooted in the industry, from mandatory bed occupancy to vested interests in mass incarceration. If private prisons are here to stay, how can we fix them? This book is a blueprint for policymakers to reform practices and for concerned citizens to understand our changing carceral landscape.

actions of the Supreme Court and Congress to stem the flow of prison litigation. Part II contains Judicial Decisions Relating to Part I.

Quantum Computation and Quantum Information The New Press

Nearly every job application asks it: have you ever been convicted of a crime? For the hundreds of thousands of young men leaving American prisons each year, their answer to that question may determine whether they can find work and begin rebuilding their lives. The product of an innovative field experiment, *Marked* gives us our first real glimpse into the tremendous difficulties facing ex-offenders in the job market. Devah Pager matched up pairs of young men, randomly assigned them criminal records, then sent them on hundreds of real job searches throughout the city of Milwaukee. Her applicants were attractive, articulate, and capable—yet ex-offenders received less than half the callbacks of the equally qualified applicants without criminal backgrounds. Young black men, meanwhile, paid a particularly high price: those with clean records fared no better in their job searches than white men just out of prison. Such shocking barriers to legitimate work, Pager contends, are an important reason that many ex-prisoners soon find themselves back in the realm of poverty, underground employment, and crime that led them to prison in the first place. "Using scholarly research, field research in Milwaukee, and graphics, [Pager] shows that ex-offenders, white or black, stand a very poor chance of getting a legitimate job. . . . Both informative and convincing."—Library Journal "Marked is that rare book: a penetrating text that rings with moral concern couched in vivid prose—and one of the most useful sociological studies in years."—Michael Eric Dyson

The Modern Prison Paradox Routledge

The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences. Now in its 11th edition, *Biostatistics: A Foundation for Analysis in the Health Sciences* continues to offer in-depth guidance toward biostatistical concepts, techniques, and practical applications in the modern healthcare setting. Comprehensive in scope yet detailed in coverage, this text helps students understand—and appropriately use—probability distributions, sampling distributions, estimation, hypothesis testing, variance analysis, regression, correlation analysis, and other statistical tools fundamental to the science and practice of medicine. Clearly-defined pedagogical tools help students stay up-to-date on new material, and an emphasis on statistical software allows faster, more accurate calculation while putting the focus on the underlying concepts rather

than the math. Students develop highly relevant skills in inferential and differential statistical techniques, equipping them with the ability to organize, summarize, and interpret large bodies of data. Suitable for both graduate and advanced undergraduate coursework, this text retains the rigor required for use as a professional reference.

Correctional Counseling and Rehabilitation SAGE Publications

After forty years of increasing prison construction and incarceration rates, winds of change are blowing through the American correctional system. The 2008 financial crisis demonstrated the unsustainability of the incarceration project, thereby empowering policy makers to reform punishment through fiscal prudence and austerity. In *Cheap on Crime*, Hadar Aviram draws on years of archival and journalistic research and builds on social history and economics literature to show the powerful impact of recession-era discourse on the death penalty, the war on drugs, incarceration practices, prison health care, and other aspects of the American correctional landscape.

A Novella and Stories Penguin

Objective, comprehensive, and up-to-date, the eleventh edition of best-selling *COMMUNITY-BASED CORRECTIONS* provides an excellent introduction to the theory, procedures, evidence-based practices, and personnel involved in community-based corrections. Students learn about the supervision techniques and treatment programs that constitute alternatives to incarceration, and which are designed to meet the level of risk and needs of each individual. These include probation, parole, electronic monitoring, house arrest, residential facilities, restitution, fines, and other options. Coverage of theories related to community correctional goals includes discussion of specific deterrence; rehabilitation through risk, needs, and responsivity; and restorative justice. Input from professionals in the field gives students invaluable insight into real-world practice. SAGE Publications

The public health expert and prison reform activist offers "meticulous analysis" on our criminal justice system and the plague of American incarceration (The Washington Post). An internationally recognized public health scholar, Ernest Drucker uses the tools of epidemiology to demonstrate that incarceration in the United States has become an epidemic—a plague upon our body politic. He argues that imprisonment, originally conceived as a response to the crimes of individuals, has become "mass incarceration": a destabilizing force that damages the very social structures that prevent crime. Drucker tracks the

phenomenon of mass incarceration using basic public health concepts—"incidence and prevalence," "outbreaks," "contagion," "transmission," "potential years of life lost." The resulting analysis demonstrates that our unprecedented rates of incarceration have the contagious and self-perpetuating features of the plagues of previous centuries. Sure to provoke debate and shift the paradigm of how we think about punishment, *A Plague of Prisons* offers a novel perspective on criminal justice in twenty-first-century America. "How did America's addiction to prisons and mass incarceration get its start and how did it spread from state to state? Of the many attempts to answer this question, none make as much sense as the explanation found in [this] book." —The Philadelphia Inquirer

In the age of American mass incarceration, a complex legal regime governs prison conditions and presents a host of controversial questions at the intersection of constitutional liberty, statutory interpretation, administrative regulation, and public policy. This is a completely overhauled, re-titled, and much-expanded version of the leading casebook about incarceration. It addresses both pretrial and post-conviction incarceration, presenting Supreme Court and leading lower court case law, statutes, litigation materials, professional standards, academic commentary, and prisoner writing. Topics include conditions of confinement, civil liberties, particular prisoner populations and relevant legal issues (race and national origin discrimination, the particular issues/law governing treatment of incarcerated women, LGBTQ people, and people with disabilities). Litigated remedies (injunctive litigation, damages, the Prison Litigation Reform Act, and criminal prosecution of prison staff), are also covered in detail, as is non-litigation oversight. The casebook is supplemented by an open-access website that offers additional resources and sources for further reading.
