Lippincott Williams & Wilkins The Washington Manual of Critical Care is a concise pocket manual for physicians and nurses. It is distinguished from the multitude of other critical care handbooks on the market by its consistent presentation of algorithms displaying the decision-making pathways used in evaluating and treating disorders in the ICU. The new edition transitions to a full color format and will include coverage of Deep Venous Thrombosis/Pulmonary Embolism, fetal-maternal critical care, C difficile infection, and alternative hemodynamic monitoring.

ACLS for Experienced Providers  
Springer Science & Business Media  
Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac

---

anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioven-

tricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a

chapter on basic 12-lead electrocardiography. ECG Interpretation Jones & Bartlett Learning As well as emphasising the links to evolution, 'Ecology' covers all the levels of the ecological hierarchy at which the subject is studied. It focuses on their integration to ensure that students are able to grasp how events in

elegance, warmth, and humor, this highly original "teaching memoir" by William Zinsser—renowned bestselling author of *On Writing Well* gives you the tools to organize and recover your past, and the confidence to believe in your life narrative. His method is to take you on a memoir of his own: 13 chapters in which he recalls dramatic,

---

amusing, and often surprising moments in his long and varied life as a writer, editor, teacher, and traveler. Along the way, Zinsser pauses to explain the technical decisions he made as he wrote about his life. They are the same decisions you'll have to make as you write about your own life: matters of selection, condensation,

focus, attitude, voice, and tone.
