American Heart Association Instant and Healthy Springer Science & Business Media

In an era of transition from classic Cardiopulmonary resuscitation (CPR) to assisted device-CPR or hemodynamic driven CPR, this book, published by InTechOpen, highlights some interesting aspects of resuscitation. Divided in three sections, the research presented emphasizes the details of resuscitation in special circumstances to possible future applications in the field. The authors offer us not only a vigorous review of the current literature but also a research road map for further advancement.

In a joint effort between the National Academy of Engineering and the Institute of Medicine, this books attempts to bridge the knowledge/awareness divide separating health care professionals from their potential partners in systems engineering and related disciplines. The goal of this partnership is to transform the U.S. health care sector from an underperforming conglomerate of independent entities (individual practitioners, small group practices, clinics, hospitals, pharmacies, community health centers et. al.) into a high performance "system" in which every participating unit recognizes its dependence and influence on every other unit. By providing both a framework and action plan

for a systems approach to health care delivery based on a partnership between engineers and health care professionals, Building a Better Delivery System describes opportunities and challenges to harness the power of systems-engineering tools, information technologies and complementary knowledge in social sciences, cognitive sciences and business/management to advance the U.S. health care system.

Dedicated to healthy eating, the American Heart Association has always provided readers with delicious ways to reduce their sodium intake — without sacrificing taste. Now it offers a completely revised and updated edition of the must-have cookbook for anyone trying to decrease the salt in his or her diet. Encompassing everything from appetizers and soups to entrees and desserts, this is a wonderful collection of more two hundred may start with Hot and Smoky Chipolte-Garlic Dip, move on to Grilled Pork Medallions with Apple Cider Sauce or maybe the Cajun Snapper, and finish with a decadent-tasting Denver Chocolate Pudding Cake. Each of the mouth-watering dishes, including fifty brand-new ones, includes a nutrient analysis. The book also provides the latest dietary information and tips on substituting ingredients, avoiding hidden sodium, and dining out while sticking to your low-sodium plan. It shows you how to accomplish your goals — and proves how stylish and flavorful eating heart-healthy can be!

100 Low-Fuss, High-Flavor Recipes for Your Pressure Cooker,

Multicooker and Instant Pot®: A Cookbook HarperCollins

David Beck has rebuilt his life since his wife's murder eight years

ago, finishing medical school and establishing himself as a

pediatrician, but he's never forgotten the woman he fell in love with

in second grade. And when a mysterious e-mail arrives on the

anniversary of their first kiss, with a message and an image that

leads him to wonder whether Elizabeth might still be alive, Beck

will stop at nothing to find the truth that's eluded him for so many

years. A powerful billionaire is equally determined to make sure his

role in her disappearance never comes to light, even if it means

destroying an innocent man.

BLS for Healthcare Providers Ballantine Books

An in-depth review by leading authorities of the latest therapies

and techniques for rescuing persons in cardiac arrest. The authors

explore the physiology behind current state-of-the-art clinical

resuscitation and translate it into practical bedside

recommendations, clinical tips, and expert techniques. Topics of

interest include the epidemiology of sudden death, management of

ventilation, chest compression technique training, public access

defibrillation, drug delivery during CPR, the latest drug therapies,

and cardiac arrest in disease, pregnancy, drowning, lightning strike,

and trauma. The authors also review the major ongoing research in

resuscitation science that will likely affect the next set of

international resuscitation guidelines.
