The United States is in the midst of the largest military demobilization in its history. This is leading to an increase in the demand for mental health clinicians who can provide services to hundreds of thousands of military veterans and members of the military. Nearly two million Americans have been deployed to the wars in the Middle East, and thousands of them have been deeply affected, either psychologically, physically, or both. Projections suggest that 300,000 are returning with symptoms of PTSD or major Depression; 320,000 have been exposed to probable Traumatic Brain Injuries; and hundreds of thousands are dealing with psychological effects of physical injuries. Other veterans and members of the military without injuries will seek treatment to help them with the psychological impact of serving in the military, being deployed, or transitioning and reintegrating back into the civilian world. As an example, hundreds of thousands of service members are also leaving the armed forces earlier than they anticipated and will need to quickly adjust to life as civilians after assuming that they would have many more years in the military. Many will be leaving the military because of demobilizations and downsizing due to budget cuts. Current proposed cuts will shrink the military force to the same size it was in 1940. The Pew Center reports that 44% of veterans from the current wars are describing their readjustment to civilian life as "difficult," and many of them are and will be turning to civilian mental health and primary care clinicians for assistance. The Handbook of Psychosocial Interventions for Veterans and Service Members is a "one stop" handbook for non-military clinicians working with service members, veterans, and their families. It brings together experts from the Department of Defense, the Department of Veterans Affairs, veteran service organizations, and academia to create the first comprehensive guidebook for civilian clinicians. In addition to covering psychiatric disorders such as depression, anxiety, and PTSD, this book also offers information about psychosocial topics that impact military personnel and their loved ones and can become part of treatment (e.g., employment or education options, financial matters, and parenting concerns), providing the most recent and cutting-edge research on the topics. Chapters are concise and practical, delivering the key information necessary to orient clinicians to the special needs of veterans and their families. The Handbook of Psychosocial Interventions for Veterans and Service Members is an essential resource for private practice

mental health clinicians and primary care physicians, as well as a useful adjunct for VA and DOD psychologists and staff.

Offering a rich and insightful road map of Asian American history as it has evolved over more than 200 years, this book marks the first systematic attempt to take stock of this field of study. It examines, comments, and questions the changing assumptions and contexts underlying the experiences and contributions of an incredibly diverse population of Americans. Arriving and settling in this nation as early as the 1790s, with American-born generations stretching back more than a century, Asian Americans have become an integral part of the American experience; this cleverly organized book marks the trajectory of that journey, offering researchers invaluable information and interpretation. * Part 1 offers a synoptic

narrative history, a chronology, and a set of periodizations that reflect different ways of constructing the Asian American past. * Part 2 presents lucid discussions of historical debates--such as interpreting the anti-Chinese movement of the late 1800s and the underlying causes of Japanese American internment during World War II--and such emerging themes as transnationalism and women and gender issues. * Part 3 contains a historiographical essay and a wide-ranging compilation of book, film, and electronic resources for further study of core themes and groups, including Chinese, Japanese, Filipino, Hmong, Indian, Korean, Vietnamese, and others.

Create campuses inclusive and supportive of disabled students, staff, and faculty Disability in Higher Education: A Social Justice Approach examines how disability is conceptualized in higher education and ways in which students, faculty, and staff with disabilities are viewed and served on college campuses. Drawing on multiple theoretical frameworks, research, and experience creating inclusive campuses, this text offers a new framework for understanding disability using a social justice lens. Many institutions focus solely on legal access and accommodation, enabling a system of exclusion and oppression. However, using principles of universal design, social justice, and other inclusive practices, campus environments can be transformed into more inclusive and equitable settings for all constituents. The authors consider the experiences of students, faculty, and staff with disabilities and offer strategies for addressing ableism within a variety of settings, including classrooms, residence halls, admissions and orientation, student organizations, career development, and counseling. They also expand traditional student affairs understandings of disability issues by including chapters on technology, law, theory, and disability services. Using social justice principles, the discussion spans the entire college experience of individuals with disabilities, and avoids any single-issue focus such as physical accessibility or classroom accommodations. The book will help readers: Consider issues in addition to access and accommodation Use principles of universal design to benefit students and employees in academic, cocurricular, and employment settings Understand how disability interacts with multiple aspects of identity and experience. Despite their best intentions, college personnel frequently approach disability from the singular perspective of access to the exclusion of other important issues. This book provides strategies for addressing ableism in the assumptions, policies and practices, organizational structures, attitudes, and physical structures of higher education.
