Employers face a myriad of issues when hiring: how to recruit, whom to select, how to interview, Equal Employment Opportunity policies, fair salary offerings, health issues, performance evaluations, behavior/disciplinary actions, turnover, and the list goes on and on. Practical Human Resources Management for Public Managers: A Case Study Approach provides

insight into human resource trends and demonstrates how complex situations can be successfully managed by public sector practitioners. The authors take us step by step into the "real world" with examples of historical events that compare "What Happened" with "What Could Have Happened" as well as suggested readings for more in-depth analysis and important points to remember. Exploring the space between theory and what actually occurs in the world, this book supplies instructional case studies based upon actual events. The authors introduce key human resources issues with clear, concise language and provide techniques to address these issues in a real-world setting. The case studies cover legal and liability issues, recruiting and hiring, employee performance, reward and discipline issues, retention, termination, workplace violence, mentorship, motivation, and managing through transitions. The authors bring know-how from a wide array of working environments, including teaching and administrative experience in public universities and management in municipalities of various population sizes from a few thousand to more than a million. They have also worked in a variety of capacities within these organizations, which allow them to see different perspectives on how different departments handle similar situations. They use their from-the-trenches knowledge to explore pragmatic ways to deal with human resource issues in public sector workplaces.

Participant's Manual Jones & Bartlett Publishers

Just as ripples from a single raindrop in a pond spread into infinity, simple acts of kindness can turn into ripples of altruism and giving that last throughout eternity. A Journey of Ripples is a series of stories as told by Matt, an eyewitness to the power of paying it forward as he chronicles the experiences of his friends in Oregon. The first story begins in 1986 when Paul reaches out to help Jo Ann on the darkest day of his life: the day he buries his wife of more than fifty years. In turn, Jo Ann promises him that she will do the same for someone else. The rest of the stories tell of the extraordinary responses to that promise. This moving collection is about sacrifice and most importantly, about giving and receiving beyond our fear, pride, and circumstances.

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention.

There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed

to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
