"... a critical account of how the Disney Co.

has used--and also abused--its governmental immunities from the beginning of Disney World to the present ..."--Jacket.

Dirty Genes Stanford University Press

Approaching women's history through case studies, this reader explores the connections between the private, personal experiences of American women, and the larger political, economic, intellectual, and social factors that shaped their lives. Suitable as a main text for women's history courses, or as the perfect supplement to any U.S. history survey course, the articles in each volume address a broad spectrum of families and communities, including various racial, ethnic and class groups in different regions of the country.

This new edition reflects and reinforces the continuing popular interest in the Triangle Fire of 1911. The Introduction provides critical context by exploring the demands industrialization placed upon urban working women, their fight to unionize, and the fire's significance in the greater scope of labor reform. By adding new sources that elevate the voices of immigrant women workers as they organized to gain better working and living conditions, Jo Ann E. Argersinger challenges students to analyze the important political and economic roles held by these "factory girls." The diversity of sources helps to engage

students as they explore the impact of a major event in a significant era of American history. Several pedagogical tools are also included to aid students' understanding and analysis: headnotes preceding each document offer critical historical context; a chronology of the strike and fire is provided for historical reference; questions for consideration are designed to stimulate deeper analysis; and a bibliography with suggested sources and a list of relevant Web sites encourage further exploration of the topic.

And Other Essays The New Freedom A Call for the Emancipation of the Generous Energies of a People U.S. History Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and

students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). The American Yawp A Massively Collaborative Open U.S. History Textbook, Vol. 1: To 1877 Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike.

The Unemployed Man and His Family

Greenhaven Press, Incorporated

Scholars have argued about U.S. state development - in particular its laggard social policy and weak institutional capacity - for generations. Neo-institutionalism has informed and enriched these debates, but, as

yet, no scholar has reckoned with a very successful and sweeping social policy designed by the federal government: the Servicemen's Readjustment Act of 1944, more popularly known as the GI Bill. Kathleen J. Frydl addresses the GI Bill in the first study based on systematic and comprehensive use of the records of the Veterans Administration. Frydl's research situates the Bill squarely in debates about institutional development, social policy and citizenship, and political legitimacy. It demonstrates the multiple ways in which the GI Bill advanced federal power and social policy, and, at the very same time, limited its extent and its effects.

Trade Unions and Industrial Relations in Capitalist Countries Franklin Fox Publishing LLC

The story of John Henry, the mighty railroad man who has become a towering figure in American culture, is told in this portrait of the most recorded folk song in American history.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass* The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S.

history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and

Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Civics Flash Cards for the Naturalization Test
Vintage

USCIS Civics flash cards: These Civics flash card will help immigrants learn about US history and government while preparing for naturalization test. These flash cards can also be used in the classroom as an instruction tool for citizenship preparation. Important note: on the naturalization test, some answers may change because of elections or appointments. Applicants must be aware of the

most current answers to these questions. Applicants must answer these questions with the name of the official who is serving at the time of his or her eligibility interview with the USCIS. The USCIS officer will not accept and incorrect answer.

“[This] fine history of Prohibition . . . could have a major impact on how we read American political history.”—James A. Morone, New York Times Book Review
Prohibition has long been portrayed as a “noble experiment” that failed, a newsreel

story of glamorous gangsters, flappers, and speakeasies. Now at last Lisa McGirr dismantles this cherished myth to reveal a much more significant history. Prohibition was the seedbed for a pivotal expansion of the federal government, the genesis of our contemporary penal state. Her deeply researched, eye-opening account uncovers patterns of enforcement still familiar today: the war on alcohol was waged disproportionately in African American, immigrant, and poor white communities. Alongside Jim Crow and other discriminatory laws, Prohibition brought coercion into everyday life and even into private homes. Its targets coalesced into an electoral base of urban, working-class voters that propelled FDR to the White House. This outstanding history also reveals a new genome for the activist American state, one that shows the DNA of the right as well as the left. It was Herbert Hoover who built the extensive penal apparatus used by the federal government to combat the crime spawned by Prohibition. The subsequent federal wars on crime, on drugs, and on terror all display the inheritances of the war on alcohol. McGirr shows the powerful American state to be a bipartisan creation, a legacy not only of the New Deal and the Great Society but also of Prohibition and its progeny. The War on Alcohol is history at its best—original, authoritative, and illuminating of our past and its continuing presence today.

The Pact of Paris Smithsonian Institution

A new, evolutionary explanation of markets and investor behavior. Half of all Americans have money in the stock market, yet economists can't agree on whether investors and markets are rational and efficient, as modern financial theory assumes, or irrational and inefficient, as behavioral economists believe. The debate is one of the biggest in economics, and the value or futility of investment management and financial regulation hangs on the answer. In this groundbreaking book, Andrew Lo transforms the debate with a powerful new framework in which rationality and irrationality coexist—the Adaptive Markets Hypothesis. Drawing on psychology, evolutionary biology, neuroscience, artificial intelligence, and other fields, *Adaptive*

Markets shows that the theory of market efficiency is incomplete. When markets are unstable, investors react instinctively, creating inefficiencies for others to exploit. Lo's new paradigm explains how financial evolution shapes behavior and markets at the speed of thought—a fact revealed by swings between stability and crisis, profit and loss, and innovation and regulation. An ambitious new answer to fundamental questions about economics and investing, *Adaptive Markets* is essential reading for anyone who wants to understand how markets really work.

[How the Science of Egg Quality Can Help You Get Pregnant Naturally, Prevent Miscarriage, and Improve Your Odds in IVF \(Second Edition\)](#) Yale University Press

A hugely important book that solely and fully explores for the first time the complex partnership

during World War II between FDR and Stalin, by the editor of *My Dear Mr. Stalin: The Complete Correspondence of Franklin D. Roosevelt and Joseph V. Stalin* (“History owes a debt to Susan Butler for the collection and annotation of these exchanges”—Arthur Schlesinger, Jr). Making use of previously classified materials from the Russian State Archive of Social and Political History, and the Archive of the Foreign Policy of the Russian Federation, as well as the Franklin D. Roosevelt Library and three hundred hot war messages between Roosevelt and Stalin, Butler tells the story of how the leader of the capitalist world and the leader of the Communist world became more than allies of convenience during World War II. Butler reassess in-depth how the two men became partners, how they shared the same outlook for the postwar world, and how they formed an uneasy but deep friendship, shaping the world’s political stage from the war to the decades leading up to and into the new century. Roosevelt and Stalin tells of the first face-to-face meetings of the two leaders over four days in December 1943 at Tehran, in which the Allies focused on the next phases of the war against the Axis Powers in Europe and Asia; of Stalin’s agreement to launch another major offensive on the Eastern Front; and of his agreement to declare war against Japan following the Allied victory over Germany. Butler writes of the weeklong meeting at Yalta in February of 1945, two months before Roosevelt’s death, where the unconditional surrender of Nazi Germany was agreed on and postwar Europe was reorganized, and where Stalin agreed to participate in Roosevelt’s vision of the United Nations. The book makes clear that Roosevelt worked hard to win Stalin over, pursuing the Russian leader, always holding out the promise that Roosevelt’s own ideas were the best bet for the future peace and security of Russia; however, Stalin was not at all sure that Roosevelt’s concept of a world organization, even with police powers, would be enough to keep Germany from starting a third

world war, but we see how Stalin's view of Roosevelt evolved, how he began to see FDR as the key to a peaceful world. Butler's book is the first to show how FDR pushed Stalin to reinstate religion in the Soviet Union, which he did in 1943; how J. Edgar Hoover derailed the U.S.-planned establishment of an OSS intelligence mission in Moscow and a Soviet counterpart in America before the 1944 election; and that Roosevelt had wanted to involve Stalin in the testing of the atomic bomb at Alamogordo, New Mexico. We see how Roosevelt's death deeply affected Stalin. Averell Harriman, American ambassador to the Soviet Union, reported that the Russian premier was "more disturbed than I had ever seen him," and said to Harriman, "President Roosevelt has died but his cause must live on. We shall support President Truman with all our forces and all our will." And the author explores how Churchill's—and Truman's—mutual mistrust and provocation of Stalin resulted in the Cold War. A fascinating,

reveatory portrait of this crucial, world-changing partnership.

The Challenge of Facts HarperCollins
Combines signed biographical entries on major figures in the civil rights movement with writings by many of the people profiled, including Sojourner Truth, W.E.B. Du Bois, Martin Luther King, and Malcolm X, and includes a time line of civil rights events.

Taxing for Sixty Pearson College Division
This guide was written for readers interested in learning the C++ programming language from scratch, and for both novice and advanced C++ programmers wishing to enhance their knowledge of C++. The text is organized to guide the reader from elementary language concepts to professional software development, with in depth coverage of all the C++ language elements en route.

U.S. History Rowman Altamira

This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.
