Automotive

Specialty Metals - Wire

Products Inconel® alloy X750

UNS ...

Alloy X750, with the addition

of titanium and aluminum, is a

nickel-chromium precipitation-

hardenable alloy having high

creep-rupture strength at high

temperatures to about 130.0°F

(700°C). It also has excellent

properties down to cryogenic

temperatures.

Inconel X-750 | Material

Datasheet

X750 Alloy is used in

applications that require optimum resistance to relaxation in springs operating at temperatures up to about 1200F Common specifications used for X750 Alloy are AMS 5699 and AMS 5698. Chemical requirements AMS 5698F and AMS 5699F
