Gripping forensic tales explain how and why trains crash. Trains are massive—with some weighing 15,000 tons or more. When these metal monsters collide or go off the rails, their destructive power becomes clear.

In this book, George Bibel presents riveting tales of trains gone wrong, the detective work of finding out why, and the safety improvements that were born of tragedy. Train Wreck details numerous crashes, including 17 in which more than 200 people were killed. Readers follow investigators as they sift through the rubble and work with computerized event recorders to figure out what happened. Using a mix of eyewitness accounts and scientific explanations, Bibel draws us into a world of forensics and human drama. Train Wreck is a fascinating exploration of

- runaway trains
- bearing failures
- metal fatigue
- crash testing
- collision dynamics
- bad rails

“ This comprehensive guide will assist the traveler in planning an excursion and executing it with minimum effort and maximum pleasure.” — Library Journal All Aboard— first published in 1995, and here completely revised and updated— is much more than just a mile-by-mile scenery guide for train travelers. It will make any trip smoother and more enjoyable with its insightful travel tips and information about how railroads operate. With trains attracting new riders in record numbers, the time is perfect for a new edition of All Aboard. All Aboard is more than an ordinary travel guide. The author tells us how and why the first railroads came about, describes the building of America' s trans-continental railroad, and explains how individual trains are operated. He also offers advice that can only come from a veteran traveler: booking trips, finding the lowest fares, avoiding pitfalls, packing for an overnight trip, what to do on board, whom to tip and how much. This new,

fourth edition includes a new chapter about eight major railway stations, and is updated throughout with new information and photographs. It discusses Amtrak' s new locomotives and Viewliner sleeping cars, changes in rules regarding pets and bicycles on American trains, and much more. Jim Loomis writes frequently about train travel for Sunday newspaper travel sections and has ridden every one of Amtrak' s long-distance trains multiple times, logging nearly 200,000 miles. He is a member of the board of directors of the National Association of Railroad Passengers.
