Atoms are made up of three basic parts; protons, neutrons, and electrons. There is a core, or nucleus, and an electron cloud. The nucleus is made up of positively charged protons and neutral neutrons. The nucleus is held closely together by electromagnetic force. Protons and neutrons make up the nucleus of the atom.

ANSWER KEY An Atom Apart by Leslie Cargile 1. What are atoms? a a. tiny particles that make up all matter b. tiny particles that can only be seen with a microscope c. tiny particles that look like gnats d. particles that are so large they cannot be seen 2. What does the word A'tomos mean in ancient Greece? something that cannot be divided further 3.

An Atom Apart Answer Key - krausypoo.com

Splitting an atom is called nuclear fission, and the repeated splitting of atoms in fission is called a chain reaction. Nuclear fission is carried out in power plants in order to create energy. Scientists split atoms in order to study atoms and the smaller parts they break into. This is not a process that can be carried out at home.
