"How does one get to be an artist? How does one get to be anything at all? It's not as if we come into the world with pre-set destinies, or do we? and if we do, what's actually baked in, what's learned, what's a product of circumstance? Jackson Pollock started by painting Jungian archetypes in what are called his psychoanalytic drawings. He moved on to Picassoesque figurative work, as in "Guardians of the Secret" and "Moon Woman Cuts the Circle." Then, one average day, he threw a canvas on the floor. He became,

miraculously, Jack the Dripper. What he'd done was so unforeseen, so puzzling, legend has it he turned to his partner Lee Krasner (herself a painter) and asked, "Is this art?"--

With God As My Partner An Emergency in Slow Motion Traveling with Sugar reframes the rising diabetes epidemic as part of a five-hundred-year-old global history of sweetness and power. Amid eerie injuries, changing bodies, amputated limbs, and untimely deaths, many people across the Caribbean and Central America simply call the affliction

“ sugar ” —or, as some say in Belize, “ traveling with sugar. ” A decade in the making, this book unfolds as a series of crónicas—a word meaning both slow-moving story and slow-moving disease. It profiles the careful work of those “ still fighting it ” as they grapple with unequal material infrastructures and unsettling dilemmas. Facing a new incarnation of blood sugar, these individuals speak back to science and policy misrecognitions that have prematurely cast their lost limbs and deaths as normal. Their families’ arts of maintenance and repair illuminate ongoing struggles to survive and remake larger systems of food, land, technology, and medicine.

Mark Tully is incomparable.

No foreign commentator has a greater understanding of the passions, the contradictions, the charms and the resilience that constitute India. In India in Slow Motion, Tully and his colleague Gillian Wright delve further than ever before into this nation of over one billion people, attempting to unravel a culture that, famously, has always resisted unravelling. India in Slow Motion is the account of a journey that for Tully and Wright has no true beginning or end. Covering a diverse range of subjects—from Hindu extremism to child labour, Sufi mysticism to the crisis in agriculture, the persistence of political corruption to the problem of Kashmir—this

book challenges the preconceptions others have about India, as well as those India has about itself. India is often depicted as a victim of forces too wild to be controlled-of post-colonial malaise, of religious strife, of the caste system, of a corrupt bureaucratic machine. India in *Slow Motion* refutes this, probing into the heart of the Indian experience and arguing that change is possible and that solutions do exist. In the process it brings the country and its people brilliantly alive.

“ A spellbinding portrait ” of the tumultuous life and artistic career of one of the most creative photographers of the 1960s (New York magazine). Diane Arbus became famous for her intimate and unconventional

portraits of twins, dwarfs, sideshow performers, eccentrics, and everyday “ freaks. ” Condemned by some for voyeurism, praised by others for compassion, she was nonetheless a transformative figure in twentieth-century photography and hailed by all for her undeniable genius. Her life was cut short when she committed suicide in 1971 at the peak of her career. In the first complete biography of Arbus, author Patricia Bosworth traces the arc of Arbus ’ s remarkable life: her sheltered upper-class childhood and passionate, all-consuming marriage to Allan Arbus; her roles as wife and devoted mother; and her evolution from fashion photographer to critically acclaimed artist—one who forever altered the boundaries of photography.

Pat says though the vision of one person can change the world, no one can carry out a vision alone. Extreme dreams depend on teams, and lack of teamwork is often how big dreams go unrealized. Using examples and anecdotes from history and contemporary life, Pat shows how the greatest world-changing events came to be as the result of the passion of single individuals. In each case, a team was assembled with people equipped in the various areas needed to bring the vision to pass. Pat addresses team assembly, dynamics, and pitfalls to give readers guidance they can immediately apply to their own circumstances. Everyone is looking for ways to be more successful in life. Pat Williams serves up a book packed with practical help to get readers where they want to be.

Slow Emergencies conveys an irresistible impulse to create, and illustrates the emotional turmoil that ensues for Lin and her family. Nancy Huston, award-winning author of *The Mark of the Angel*, writes brilliantly here about the passage of time, the body's vulnerability, and the solitude of creative endeavor.

What results is a deeply felt novel that offers a disquieting but profoundly moving meditation on just what it means to be an artist.

Elliott Smith was one of the  
most gifted songwriters of the  
nineties, adored by worshipful

fans for his subtly melancholic  
words and melodies. The  
sadness had its sources in the  
life. There was trauma from an  
early age, years of drug abuse  
and a chronic sense of  
disconnection that sometimes  
seemed almost self-engineered.  
Smith died violently in Los  
Angeles in 2003, under what  
some believe to be questionable  
circumstances, of a single fatal  
stab wound to the chest. By this  
time fame had found him, and  
record buyers who shared the  
listening experience felt he  
spoke directly to them from  
beyond: lonely, lovelorn,  
frustrated, fighting until he  
could fight no more. And yet,  
although his achingly intimate  
lyrics carried the weight of truth,  
Smith remained unknowable. In

It will be an indispensable examination of his life and legacy, both for Smith's legions of fans as well as readers still discovering his songbook.

### Smiling in Slow Motion

Bloomsbury Publishing USA

In the credulous twaddle of an essay on the Lost Arts one may generally find the telescope ascribed to far antiquity. In place of evidence there is vague allusion of classical times or wild flights of fancy like one which argued from the Scriptural statement that Satan took up Christ into a high mountain and showed him all the kingdoms of the earth, that the Devil had a telescope—bad optics and worse theology. In point of fact there is not any indication that either in classical times, or in the black thousand years of hopeless ignorance that followed the fall of Roman civilization, was there any knowledge of optical instruments worth mentioning. The peoples that tended their flocks by night in the East alone kept alive the knowledge of

astronomy, and very gradually, with the revival of learning, came the spirit of experiment that led to the invention of aids to man's natural powers. The lineage of the telescope runs unmistakably back to spectacles, and these have an honorable history extending over more than six centuries to the early and fruitful days of the Renaissance. That their origin was in Italy near the end of the thirteenth century admits of little doubt. A Florentine manuscript letter of 1289 refers to "Those glasses they call spectacles, lately invented, to the great advantage of poor old men when their sight grows weak," and in 1305 Giordano da Rivalto refers to them as dating back about twenty years. Finally, in the church of Santa Maria Maggiore in Florence lay buried Salvino d'Amato degli Armati, (obit 1317) under an epitaph, now disappeared, ascribing to him the invention of spectacles. W. B. Carpenter, F. R. S., states that

---

the inventor tried to keep the valuable secret to himself, but it was discovered and published before his death. At all events the discovery moved swiftly. By the early fourteenth century it had spread to the Low Countries where it was destined to lead to great results, and presently was common knowledge over all civilized Europe. It was three hundred years, however, between spectacles and the combination of spectacle lenses into a telescope, a lapse of time which to some investigators has seemed altogether mysterious. The ophthalmological facts lead to a simple explanation. The first spectacles were for the relief of presbyopia, the common and lamentable affection of advancing years, and for this purpose convex lenses of very moderate power sufficed, nor was material variation in power necessary. Glasses having a uniform focus of a foot and a half or thereabouts would serve every practical purpose, but

would be no material for telescopes.

professional literature on treatment of sexual abuse survivors. By using fairy tales and mainstream literature - including Peter Pan, The Wizard of Oz, Alice in Wonderland, The Velveteen Rabbit, and current pop works such as Stephen King's *It* - the authors show how numerous metaphors for abuse are presented in our everyday life. Woven throughout the volume is a historical and sociocultural perspective of the treatment of women and children - and how society has ignored such abuse. Coupled with the four-step process, this supplies the practitioner with a comprehensive overview, numerous invaluable treatment techniques, and an opportunity to gain an empathic understanding of the victim's life and experiences. Essential reading for professionals and students of counseling, psychology, social work, and other helping professions, the

format also makes it highly accessible to lay-persons - both clients and other concerned individuals.
