As the landscape of choral
education changes - disrupted
by Glee, YouTube, and
increasingly cheap audio
production software - teachers
of choral conducting need
current research in the field that
charts scholarly paths through
contemporary debates and sets
an agenda for new critical
thought and practice. Where, in
the digitizing world, is the field

of choral pedagogy moving?
Editor Frank Abrahams and
Paul D. Head, both experienced
choral conductors and teachers,
offer here a comprehensive
handbook of newly-
commissioned chapters that
provide key scholarly-critical
perspectives on teaching and
learning in the field of choral
music, written by academic
scholars and researchers in
tandem with active choral
conductors. As chapters in this
book demonstrate, choral
pedagogy encompasses
everything from conductors'
gestures to the administrative
management of the choir. The
contributors to The Oxford
Handbook of Choral Pedagogy
address the full range of issues in
contemporary choral pedagogy,
from repertoire to voice science
to the social and political aspects
of choral singing. They also
cover the construction of a
choral singer's personal identity,
the gendering of choral
ensembles, social justice in

choral education, and the role of the choral art in society more generally. Included scholarship focuses on both the United States and international perspectives in five sections that address traditional paradigms of the field and challenges to them; critical case studies on teaching and conducting specific populations (such as international, school, or barbershop choirs); the pedagogical functions of repertoire; teaching as a way to construct identity; and new scholarly methodologies in pedagogy and the voice.

This book explores the
relationship between words and
music in contemporary texts,
examining, in particular, the way
that new technologies are
changing the literature-music
relationship. It brings an eclectic
and novel range of
interdisciplinary theories to the
area of musico-literary studies,
drawing from the fields of
semiotics, disability studies,
musicology, psychoanalysis, music
psychology, emotion and affect
theory, new media,
cosmopolitanism, globalization,
ethnicity and biraciality. Chapters
range from critical analyses of the
representation of music and the
musical profession in
contemporary novels to
examination of the forms and
cultural meanings of
contemporary intermedia and
multimedia works. The book
argues that conjunctions between
words and music create emergent
structures and meanings that can
facilitate culturally transgressive
and boundary- interrogating

effects. In particular, it conceptualises ways in which word-music relationships can facilitate cross-cultural exchange as musico-literary miscegenation, using interracial sexual relationships as a metaphor. Smith also inspects the dynamics of improvisation and composition, and the different ways they intersect with performance. Furthermore, the book explores the huge changes that computer-based real-time algorithmic text and music generation are making to the literature-music nexus. This volume provides fascinating insight into the relationship between literature and music, and will be of interest to those fields as well as New Media and Performance Studies.
