Who killed Jeffrey Epstein? Two journalists look for answers. A must-read for fans of the Netflix docuseries *Filthy Rich*. In *A Convenient Death*, investigative reporters Alana Goodman and Daniel Halper search for the truth of what really happened to Jeffrey Epstein. With access to Epstein's victims and lawyers, to doctors, Wall Street insiders and law enforcement officers, they reveal the dirty secrets and sinister ties that may have driven someone in Epstein's circle to take matters into their own hands. On the morning of August 10, 2019, Epstein, friend and financier to the rich and powerful, was found unresponsive in his prison cell in lower Manhattan, where he awaited his second trial for sexual predation and other crimes. He was rushed to a local hospital and one hour later pronounced dead by suicide. Across the world, a sinister web of powerful billionaires, celebrities, and politicians, including Bill and Hillary Clinton, had reason to sigh with relief at news of Epstein's death. Having flown on his private planes and visited his many homes—the sites of so many illicit activities—they had much to lose if their transgressions were ever exposed. And now, Epstein was silenced for good. But cracks in the official story soon emerged. And the questions kept coming: • Why did the surveillance cameras in front of Epstein's cell stop working that night? • Why was Epstein's cellmate transferred out and never replaced? • Why was a high-profile prisoner so suddenly taken off suicide watch and left unguarded for eight hours? Was Epstein murdered to protect the powerful people who feared what he might reveal? The

American public deserves to know the truth. With this book, they can finally understand the facts and decide for themselves.

Confronting harsh ecological realities and the multiple cascading crises facing our world today, *An Inconvenient Apocalypse* argues that humanity's future will be defined not by expansion but by contraction. For decades, our world has understood that we are on the brink of an apocalypse—and yet the only implemented solutions have been small and convenient, feel-good initiatives that avoid unpleasant truths about the root causes of our impending disaster.

Wes Jackson and Robert Jensen argue that we must reconsider the origins of the consumption crisis and the challenges we face in creating a survivable future. Longstanding assumptions about economic growth and technological progress—the dream of a future of endless

bounty—are no longer tenable. The climate crisis has already progressed beyond simple or nondisruptive solutions. The end result will be apocalyptic; the only question now is how bad it will be. Jackson and Jensen examine how geographic determinism shaped our past and led to today's social injustice, consumerist culture, and high-energy/high-technology dystopias. The solution requires addressing today's systemic failures and confronting human nature by recognizing the limits of our ability to predict how those failures will play out over time. Though these massive challenges can feel overwhelming, Jackson and Jensen weave a secular reading of theological concepts—the prophetic, the apocalyptic, a saving remnant, and grace—to chart a collective, realistic path for humanity not only to survive our apocalypse but also to emerge on the other side with a renewed appreciation of the larger living world.

Not since Betty Eadie's *Embraced by the Light* has a personal account of a Near-Death Experience (NDE) been so utterly different from most others—or nearly as compelling. "This is a book you devour from cover to cover, and pass on to others. This is a book you will quote in your daily conversation. Storm was meant to write it and we were meant to read it."

—from the foreword by Anne Rice In the thirty years since Raymond Moody's *Life After Life* appeared, a familiar pattern of NDEs has emerged: suddenly floating over one's own body, usually in a hospital setting, then a sudden hurtling through a tunnel of light toward a presence of love. Not so in Howard Storm's case. Storm, an avowed atheist, was awaiting emergency surgery when he realized that he was at death's door. Storm found himself out of his own body, looking down on the hospital room scene below. Next, rather than going "toward the light," he found himself being torturously dragged to excruciating realms of darkness and death, where he was physically assaulted by monstrous beings of evil. His description of his pure terror and torture is unnerving in its utter originality and convincing detail. Finally, drawn away from death and transported to the realm of heaven, Storm met angelic beings as well as the God of Creation. In this

fascinating account, Storm tells of his "life review," his conversation with God, even answers to age-old questions such as why the Holocaust was allowed to take place. Storm was sent back to his body with a new knowledge of the purpose of life here on earth. This book is his message of hope.

Amusing Ourselves to Death Sterling Mystery Series

Winner of the Pulitzer prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie—man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal—to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman. ” -CNN Originally published in 1985, Neil Postman ' s groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “ A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one. ” —Jonathan Yardley, *The Washington Post Book World*

An Inelegant Death Chicago Review Press

In *The Inconvenient Journalist*, Dusko Doder, writing with his spouse and journalistic partner Louise Branson, describes how one February night crystalized the values and personal risks that shaped his life. The frigid Moscow night in question was in 1984, and Washington Post correspondent Doder reported signs that Soviet leader Yuri Andropov had died. The CIA at first dismissed the reporting, saying that "Doder must be smoking pot." When Soviet authorities confirmed Andropov's death, journalists and intelligence officials questioned how a lone

reporter could scoop the multibillion-dollar US spy agency. The stage was set for Cold War-style revenge against the star journalist, and that long night at the teletype machine in Moscow became a pivotal moment in Doder's life. After emigrating to the United States from Yugoslavia in 1956, Doder committed himself to the journalist's mission. He knew that reporting the truth could come at a price, something driven home by his years of covering Soviet dissidents and watching his Washington Post colleagues break the Watergate story. Still, he was not prepared for a cloaked act of reprisal from the CIA. Taking aim at Doder, the CIA insinuated a story into Time magazine suggesting that he had been coopted by the KGB. Doder's professional world collapsed and his personal life was shaken as he fought Time in court. In *The Inconvenient Journalist*, Doder reflects on this attempt to destroy his reputation, his dedication to reporting the truth, and the vital but precarious role of the free press today. The *Inconvenient Journalist* is a powerful human story and a must-read for all concerned about freedom of the press and truthful reporting.

An *Inconvenient Sequel: Truth to Power*
Ballantine Books

One July afternoon in 2003, in a quiet part of Oxfordshire, a scientist went out for a walk and never came back. Dr David Kelly had been all over the news in the preceding days; as an investigator on the team which went into Iraq to check whether they had weapons of mass destruction, he had been accused of anonymously briefing a BBC reporter that the government's case for the Iraq War had been deliberately falsified. When the news came through that his body had been found in woods near his country home, for the briefest of moments, a stunned Britain held its breath and wondered if this was what it had come to. Our

intelligence services were already collaborating in the torture of British citizens for reasons of national security. Had they committed murder too? Tony Blair himself was for once without answer. At a press conference in Japan a reporter stood up and asked him if he had blood on his hands. The Prime Minister stood there blinking behind his mask until he walked, shocked, from the podium. But Britain kept calm and carried on. Normal service was resumed, and the world began spinning again. David Kelly, we were told, had committed suicide for personal reasons that had nothing to do with Downing Street or the Iraq War. But not all could believe that. For those that couldn't, they too lost a part of themselves that afternoon. Conspiracy theorists, eccentrics, obsessives, lunatics, paranoids, fantasists, zealots: they had been awarded all these sobriquets and more. Yet it was easy enough to see, lurking behind the cracks and gaps in the government's account, the hulk of a great and deliberate dishonesty. Simply to read about what transpired in Longworth, Oxfordshire on the 17th July 2003 made it impossible to believe otherwise.

The Inconvenient Journalist Simon and Schuster

"In the early 1990s, a small group of "AIDS denialists," including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission"--
