Speed & Scale BenBella Books  
Award-Winning Regency Romance Author on the Rise Griffith, Duke of Riverton, likes order, logic, and control, and he naturally applies this rational approach to his search for a bride. He's certain Miss Frederica St. Claire is the perfect wife for him, but while Frederica is strangely elusive, he can't seem to stop running into her stunningly beautiful cousin, Miss Isabella Breckenridge. Isabella should be enjoying her society debut, but with her family in difficult circumstances, her uncle will only help them if she'll use her beauty to assist him in his political aims. Already uncomfortable with this agreement, the more she comes to know Griffith, the more she wishes to be free of her unfortunate obligation. Will Griffith and

Isabella be able to set aside their pride and face their fears in time to find their own happily-ever-after?

Climate Change Gr. 5-8 New Society Publishers

A practical approach for leaders to guide their congregations to become more externally focused The Externally Focused Quest: Becoming the Best Church for the Community is designed for church leaders who want to transform their churches to become less internally focused and more oriented to the world around them. The book includes the clear guidelines on the ten changes congregations must adopt to become truly outwardly focused. This book is not about getting all churches to have an annual day of community service as a tactic but changing the core of who they are and

---

how they see themselves as a part of their community. Outlines the ten changes needed for church leaders to transform their churches Presents a highly practical approach that shows leaders how to become more externally focused without having to give up programs that serve members A new volume in the popular Leadership Network Series This book reveals what it takes to make the major shift from an internal to external focus and how that affects church leadership.

Church hurt. It is a real thing! Some say it's taboo or bad mouthing the church. Some refuse to talk about this phenomenon and try to sweep

it under the rug. Within the pages of this book are real life experiences of church hurt. The purpose of this book is not to bash churches but to set souls free from hurt and pain. This workbook intends to provide relief and healing to those who have been hurt by a church or person(s) from a church. This book also intends to highlight areas where Christians can be more successful at reaching souls rather than damaging souls.

breathless undertone. ” —Entertainment Weekly Jules Mendelson is wealthy. Astronomically so. He and his wife lead the kind of charity-giving, art-filled, high-society life for which each has been carefully groomed. Until Jules falls in love with Flo March, a beautiful actress/waitress. What Flo discovers about the superrich is not a pretty sight. And in the end, she wants no more than what she was promised. But when Flo begins to share the true story of her life among the Mendelsons, not everyone is in a listening mood. And some cold shoulders have very sharp edges. . . .

An Inconvenient Duke Routledge

Environmentalism and ecology are areas of rapid growth in academia and society at large.

Screening Nature is the first comprehensive work

that groups together the wide range of concerns in the field of cinema and the environment, and what could be termed “ posthuman cinema. ” It comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium, and to the language and institution of film. The book offers a fresh and timely intervention into contemporary film theory through a focus on the nonhuman environment as principal register in many filmic texts.

Screening Nature offers an extensive resource for teachers, undergraduate students, and more advanced scholars on the intersections between the natural world and the worlds of film. It emphasizes the cross-cultural and geographically diverse relevance of the topic of cinema ecology.

The Real Inconvenient Truth: It's Warming: But It's Not CO2 Simon and Schuster

For business people looking to get results and

Shut Up and Say Something: Business Communication Strategies to Overcome Challenges and Influence Listeners  
Bloomsbury Publishing

One of the most disturbing aspects of the entire global warming debate is the certitude of believers, driven almost entirely, if not exclusively by tribal affiliations. This book shows that while CO<sub>2</sub> contributes to climate conditions it is not a primary driver, and that the climate models on which energy policies are based are invalid. It also addresses the unconscionable tactics employed by politicians and their media acolytes to

---

perpetuate the myth that human-caused CO<sub>2</sub> is responsible for global warming and climate change. A small group of ideologues have over the years hijacked an otherwise noble cause, environmental consciousness, and used it as a proxy to redistribute wealth and ultimately to replace western-style democracies with a world socialist structure under the auspices of the United Nations. To achieve their goals, they use Alinsky-style tactics to denigrate, ridicule, and intimidate skeptics, and Orwellian methods including rewriting history to ensure conformity to their message. There are no angry mobs demanding consensus for the theories of Gravity or  $E=mc^2$  because they are testable, repeatable, and confirmed through experiment and observation. The un-testable, un-provable relationship between CO<sub>2</sub> and a warming planet plays into the hands of scrupulous ideologues.

Only through such an oblique association could they develop a pseudo-secular religion with millions of believers who view those who question its dogma as heretics.

WARS OF THE INTERIOR. Christian Faith Publishing, Inc.

A New York Times Book Review Notable Book of 2020 “ A comically dark coming-of-age story about growing up on the South Side of Chicago, but it ’ s also social commentary at its finest, woven seamlessly into the work . . . Bump ’ s meditation on belonging and not belonging, where or with whom, how love is a way home no matter where you are, is handled so beautifully that you don ’ t know he ’ s hypnotized you until he ’ s done. ” —Tommy Orange, The New York Times Book Review In this alternately witty and heartbreaking debut novel, Gabriel Bump gives us an unforgettable protagonist,

---

Claude McKay Love. Claude isn't dangerous or brilliant—he's an average kid coping with abandonment, violence, riots, failed love, and societal pressures as he steers his way past the signposts of youth: childhood friendships, basketball tryouts, first love, first heartbreak, picking a college, moving away from home. Claude just wants a place where he can fit. As a young black man born on the South Side of Chicago, he is raised by his civil rights – era grandmother, who tries to shape him into a principled actor for change; yet when riots consume his neighborhood, he hesitates to take sides, unwilling to let race define his life. He decides to escape Chicago for another place, to go to college, to find a new identity, to leave the pressure cooker of his hometown behind. But as he discovers, he cannot; there is no safe haven for a young black man in this time and place called

America. Percolating with fierceness and originality, attuned to the ironies inherent in our twenty-first-century landscape, *Everywhere You Don't Belong* marks the arrival of a brilliant young talent.

*Shut Up and Say Something* Howling at the Moon Press

Al Gore is bad for the planet... Talk about really inconvenient truths--that's one of the many you'll find in Iain Murray's rollicking exposé of environmental blowhards who waste more energy, endanger more species, and actually kill more people (yes, that's right) than the environmental villains they finger. Did you know that estrogen from birth control and "morning after" pills is causing male fish across America to develop female sex organs? Funny how "pro-choice" and

---

"environmentalist" liberals never talk about that. Or how about this: the Live Earth concert to "save the planet" released more CO2 into the atmosphere than a fleet of 2,000 Humvees emit in a year? We hear a lot about AIDS in Africa, but the number one killer of children in much of Africa is malaria--and guess who was responsible for banning the pesticide that used to have malaria under control? Iain Murray, a sprightly conservative environmental analyst with a long record of skewering liberal hypocrisy, has dug up seven of the all-time great environmental catastrophes caused by the Left and exposed them in *The Really Inconvenient Truths*. Seeing Green An Inconvenient Sequel *The Really Inconvenient Truths* "Over 15 chapters, Dunaway transforms what

we know about icons and events. Seeing Green is the first history of ads, films, political posters, and magazine photography in the postwar American environmental movement. From fear of radioactive fallout during the Cold War to anxieties about global warming today, images have helped to produce what Dunaway calls "ecological citizenship," telling us that "we are all to blame." Dunaway heightens our awareness of how depictions of environmental catastrophes are constructed, manipulated, and fought over"--Publisher info.

A DAILY TELEGRAPH BOOK OF THE YEAR. 'A compelling, authoritative insight into possibly the most controversial death in Britain

---

this century' The Observer. 'Goslett's like Poirot; he asks questions ... Spooky and scary' Evening Standard. 'Masterful ... This book made me proud of my trade as a journalist' Daily Mail. 'This searing excavation of the mysterious death of Dr David Kelly is investigative journalism at its best. It is brave, relentless, dazzlingly revealing' Peter Osborne. In March 2003 British forces invaded Iraq after Tony Blair said the country could deploy weapons of mass destruction at 45 minutes' notice. A few months later, government scientist Dr David Kelly was unmasked by Blair's officials as the assumed source of a BBC news report challenging this claim. Within days, Dr Kelly was found dead in a wood near his home. Blair immediately convened the controversial Hutton Inquiry, which concluded Dr Kelly committed suicide. Yet key questions remain: could Dr Kelly really have taken his life in the manner declared? And why did Blair's government derail the coroner's inquest into Dr Kelly's death? In this meticulous account, award-winning journalist Miles Goslett shows why we should be sceptical of the official story of what happened in that desperate summer of 2003.

**AN INCONVENIENT TRUTH** - The Planetary Emergency Cengage Learning

This brilliantly systematic and comprehensive textbook provides an integrated approach to social work theory, methods and skills as the bedrock of all social work practice. Recognizing social work as a diverse activity that is rooted in common foundations, it explains how practice both shapes and is shaped by professional purpose. The text also explores the diverse range of social work practice methods available and aims to equip the reader with a foundation in the history and application of these varied approaches. Offering a step-by-step discussion that will empower readers to critically develop and

---

refine their professional toolkit for purposeful and innovative intervention, this original rationale is an essential resource for any social work student or practitioner looking to build, or consolidate, their understanding of the range of methods and skills available for effective professional practice.

Cengage Learning

"Unsettled is a remarkable book—probably the best book on climate change for the intelligent layperson—that achieves the feat of conveying complex information clearly and in depth."

—Claremont Review of Books "Surging sea levels are inundating the coasts." "Hurricanes and tornadoes are becoming fiercer and more frequent." "Climate change will be an economic disaster." You've heard all this presented as fact. But according to science, all of these statements are profoundly misleading. When it comes to climate change, the media, politicians, and other prominent voices have declared that "the science is settled." In reality, the long game of telephone from research to reports to the popular

media is corrupted by misunderstanding and misinformation. Core questions—about the way the climate is responding to our influence, and what the impacts will be—remain largely unanswered. The climate is changing, but the why and how aren't as clear as you've probably been led to believe. Now, one of America's most distinguished scientists is clearing away the fog to explain what science really says (and doesn't say) about our changing climate. In *Unsettled: What Climate Science Tells Us, What It Doesn't, and Why It Matters*, Steven Koonin draws upon his decades of experience—including as a top science advisor to the Obama administration—to provide up-to-date insights and expert perspective free from political agendas. Fascinating, clear-headed, and full of surprises, this book gives readers the tools to both understand the climate issue and be savvier consumers of science media in general. Koonin takes readers behind the headlines to the more nuanced science itself, showing us where it comes from and guiding us through the implications of the evidence. He dispels

---

popular myths and unveils little-known truths: despite a dramatic rise in greenhouse gas emissions, global temperatures actually decreased from 1940 to 1970. What's more, the models we use to predict the future aren't able to accurately describe the climate of the past, suggesting they are deeply flawed. Koonin also tackles society's response to a changing climate, using data-driven analysis to explain why many proposed "solutions" would be ineffective, and discussing how alternatives like adaptation and, if necessary, geoengineering will ensure humanity continues to prosper. Unsettled is a reality check buoyed by hope, offering the truth about climate science that you aren't getting elsewhere—what we know, what we don't, and what it all means for our future.

### Air Con On The Mark Press

Taking us through his distinguished career in the Police Service of Pakistan where he observed the workings of those in the highest echelons of power, Tariq Khosa explores the reasons for the

ills gripping the country, especially in government and public service: an environment fraught with the fear of stepping on the wrong toes, in which facts are disputed, fundamental truth is questioned, lying and deceit are the norm, and unethical conduct is ignored, excused, or rewarded. He believes that public servants, especially police officers, have the power to shape a culture of honesty and transparency and, conversely, if they are dishonest, a culture of deception and corruption. He provides sensible and viable solutions for the problems plaguing Pakistan.

Media and Science-Religion Conflict Penguin  
Global warming and changes in climate will have severe and lasting impacts on national efforts to alleviate poverty and promote sustainable development. Some of the world's poorest countries and communities are the most

---

vulnerable and are already suffering the consequences. Yet often these countries are rich in natural capital, ecosystems, and biodiversity that can contribute to solutions as they can to climate change. Biodiversity is the foundation and mainstay of agriculture, forests, and fisheries. Biological resources provide the raw materials for livelihoods, agriculture, medicines, trade, tourism, and industry. Forests, grasslands, freshwater, and marine and other natural ecosystems provide a range of services, often not recognized in national economic accounts but vital to human welfare: regulating water flows and water quality, flood control, pollination, decontamination, carbon sequestration, soil conservation, and nutrient and hydrological cycling. Current efforts to address climate change focus mainly on reducing emissions of greenhouse gases, mainly through cleaner energy strategies, and on attempting to

reduce vulnerability of the communities at risk by improving infrastructure to meet new energy and water needs. This book sets out a compelling argument for including ecosystem-based approaches to mitigation and adaptation as a third essential pillar in national strategies to address climate change. Such ecosystem-based strategies can offer cost-effective, proven and sustainable solutions contributing to, and complementing, other national and regional adaptation strategies.
