The recycling and reuse of materials and objects were extensive in the past, but have

rarely been embedded into models of the economy; even more rarely has any attempt been made to address the scale of these practices. Recent developments, including the use of large datasets, computational modelling, and high-resolution analytical chemistry are increasingly offering the means to reconstruct recycling and reuse, and even to approach the thorny issue of quantification. This volume is the first to bring together these new approaches, and the first to present a consideration of recycling and reuse in the Roman economy, taking into account a range of materials and using a variety of methodological approaches. It presents integrated, cross-referential evidence for the recycling and reuse of textiles, papyrus, statuary and building materials, amphorae, metals, and glass, and examines significant questions about organization, value, and the social meaning of recycling.

In this book Donald Rapp provides a balanced assessment of global warming, tending neither to the views of alarmists or nay-sayers. Rapp has the ability to move into a highly technical field, assimilate the content, organize the knowledge base and succinctly describe the field, its content, its unresolved issues and achievements. This is precisely what he does in this book in relation to global climate change. As such his approach is refreshingly different.

Former Vice President Al Gore's New York Times #1 bestselling book is a daring call to action, exposing the shocking reality of how humankind has aided in the destruction of our planet and the future we face if we do not take action to stop global warming. Now, Viking has adapted this book for the most important audience of all: today's youth, who have no choice but to confront this climate crisis head-on. Dramatic full-color photos, illustrations, and graphs combine with Gore's effective and clear writing to explain global warming in very real terms: what it is, what causes it, and what will happen if we continue to ignore it. An Inconvenient Truth will change the way young people understand global warming and hopefully inspire them to help change the course of history.

Winner of the 2019 Textbook Excellence Award from the Textbook & Academic Authors Association (TAA) The best-selling Introduction to Social Work takes students to the root of the social work profession by covering its history, practice settings, and career paths within a unique advocacy framework. This advocacy practice and policy model comprised of four components—economic and social justice, a supportive environment, human needs and rights, and political access—provides an effective lens for viewing today ' s social issues. Throughout the book, an emphasis on advocacy underscores the transformative opportunities and contributions of social work on not just the clinical/client level, but also at organizational, community, national, and international levels. The Second Edition closely aligns with the latest Educational Policy and Accreditation Standards (EPAS) from the Council on Social Work Education (CSWE) and references the 2018 Code of Ethics from the National Association of Social Workers (NASW). Through the authors ' inclusion of reflective practice, students will be encouraged to engage in critical thought and contemplate a career in social work.

The commercialization of sport since the 1990s has had a number of consequences. The market forces that have defined commercialization, notably pay-per-view television, whilst initially welcomed as important new sources of revenue, have also had the unanticipated consequences of destabilizing many sporting competitions and institutions, undermining the financial future of clubs in their traditional role as key social and cultural institutions. This has been manifested in the paradox of chronic financial loss-making amongst professional sports' clubs in an era of exponential revenue growth, a trend exemplified by the experience of Italy's Serie A and the English Premier League – both cases examined in detail in this book. But, at the same time, some traditional sporting organizations have sought with some success, to chart a middle way, retaining traditional sporting movement objectives whilst also embracing a form of commercialism. The Gaelic Athletic Association in Ireland, the supporter-owned FC Barcelona football club,

and New Zealand rugby union, offer illustrative examples of such strategies examined in detail. This book explores the background to this clash of commercial and traditional sporting objectives, and debates the consequences for wider sports governance. This book was published as a special issue of Soccer and Society.

Recycling and Reuse in the Roman Economy Wrightstone, Gregory

At the start of the twentieth century, the pre-eminent black sociologist, W.E.B. DuBois, identified the color line as America's great problem. While the color line is increasingly variegated beyond black and white, and more openly discussed than ever before as more racial and ethnic groups call America home, his words still ring true. Today, post-racial and colorblind ideals dominate the American narrative, obscuring the reality of racism and discrimination, hiding if only temporarily the inconvenience of deep racial disparity. This is the quintessential American paradox: our embrace of the ideals of meritocracy despite the systemic racial advantages and disadvantages accrued across generations. This book provides a

sociology of the Black American experience. To be Black in America is to exist amongst myriad contradictions: racial progress and regression, abject poverty amidst profound wealth, discriminatory policing yet equal protection under the law. This book explores these contradictions in the context of residential segregation, labor market experiences, and the criminal justice system, among other topics, highlighting the historical processes and contemporary social arrangements that simultaneously reinforce race and racism, necessitating resistance in post-civil rights America.

an individual engineer or scientist who has made a significant contribution to the advancement of the science and technology of photovoltaic energy conversion, with dissemination by substantial publications and presentations. Fthenakis was honored for his pioneering research at the interface of energy and the environment that catalyzed photovoltaic technology advancement and deployment world-wide.

Introduction to Social Work Hodder Education

The “migration-displacement nexus” is a new concept intended to capture the complex and dynamic interactions between voluntary and forced migration, both internally and internationally. Besides elaborating a new concept, this volume has three main purposes: the first is to focus empirical attention on previously understudied topics, such as internal trafficking and the displacement of foreign nationals, using case studies including Afghanistan and Iraq; the second is to highlight new challenges, including urban displacement and the effects of climate change; and the third is to explore gaps in current policy responses and elaborate alternatives for the future.

Finding the Right Hills to Die on Routledge The future will be powered by sustainable thinking in business organizations governments and everyday life. This revolutionary book tackles climate change sustainability and life

success by starting with your mind. It provides proven 'staged-based' methods for transforming thinking and behaviour beginning first with the reader's own cognitive patterns then moving to how individuals can motivate other people to change and finally to how teams and organizations can be motivated to change.

A New York Times bestseller! The follow up to the #1 New York Times bestselling *An Inconvenient Truth* and companion to Vice President Al Gore 's new documentary, *An Inconvenient Sequel: Truth to Power*, this new book is a daring

call to action. It exposes the reality of how humankind has aided in the destruction of our planet and delivers hope through groundbreaking information on what you can do now. Vice President Gore, one of our environmental heroes and a leading expert in climate change, brings together cutting-edge research from top scientists around the world; approximately 200 photographs and illustrations to visually articulate the subject matter; and personal anecdotes and observations to document the fast pace and wide scope of global warming. He presents, with alarming clarity and conclusiveness (and with humor, too) that the fact of global climate change is not in question and that its consequences for the world we live in will be assuredly disastrous if left unchecked. Follow Vice President Gore around the globe as he tells a story of change in the making. He connects the dots of Zika, flooding, and other natural disasters we've lived through in the last 10+ years—and much more. The book also offers a comprehensive how-to guide on exactly how we can change the course of fate. With concrete, actionable advice on topics ranging from how to run for office to

how to talk to your children about climate change, *An Inconvenient Sequel* will empower you to make a difference—and lets you know how exactly to do it. Where Gore's first documentary and book took us through the technical aspects of climate change, the second documentary is a gripping, narrative journey that leaves you filled with hope and the urge to take action immediately. This book captures that same essence and is a must-have for everyone who cares deeply about our planet.
