This book examines in
detail the current
treatment options for
first-line, relapsed, and
refractory Hodgkin

lymphoma and the management appropriate in special clinical circumstances, including in the elderly, pregnant women, and those with lymphocyte-predominant disease. Careful attention is devoted to the emerging individually tailored treatment strategies that are especially appealing given their potential to reduce early and late treatment side effects in this generally young patient

population. In addition, clear guidance is provided on the management of Hodgkin survivors. Other topics addressed include epidemiology, pathogenesis, the role of the microenvironment, initial clinical evaluation, imaging diagnosis, use of staging systems, and prognostic factors. The second edition of Hodgkin Lymphoma: A Comprehensive Overview has been

revised and updated by the key opinion leaders to reflect recent progress in the field. It will be of great value to hematologists, oncologists, and all others with an interest in Hodgkin lymphoma. Recent scholarship points to a "new institutionalism" just as recent political developments point to a trend toward democratization. If institutions matter, and if legislatures are the democratic institutions in which the voice of the people speaks, then the organization of legislatures—bi- or unicameral—has important consequences for democracy. Hodgkin Lymphoma June issues, 1941-44 and Nov. issue, 1945, include a buyers' guide section.
