of plantain/banana on small farm holdings in the banana bunchy disease affected area as well as examining the various type of labour available in the area. Field survey was conducted in three major plantain production and commercialization villages in the region. It used primary and secondary data collected using the Harvard analytical

[Cooking banana - Wikipedia](#)

Since bananas are native to the Asia-Pacific region, Plantains were necessarily introduced to Africa. It's impossible to say how many cultivars were initially brought in but since the French types are the only Plantains that have a male bud at harvest, they are believed to have given rise to the other types through a series of mutations.

[Plantains vs Bananas • Insteading](#)

Bananas are a staple in many household fruit baskets. Plantains, though, are not as well-known. It's easy to confuse a plantain with a banana because they look so much alike. However, if you were ...

[Genetic engineering in Banana and Plantain](#)

Plantains contain more starch and less sugar than dessert bananas, therefore they are usually cooked or otherwise processed before being eaten. They are always cooked or fried when eaten green. At this stage, the pulp is hard and the peel often so stiff that it has to be cut with a knife to be removed.

Agricultural products including banana and plantain contribute about 40% of the GDP (Federal Ministry of Finance and National Food Reserve Agency, 2008) [8].

[Plantain vs. Banana: They Look Same But Are Different](#)

Plantains are the less sweet, starchier equivalent to the banana. Sweet bananas, sometimes called “dessert bananas” are much more popular in the United States and Europe, but plantains are an ...

[Analysis Of Plantain And Banana](#)

The cold-response genes at early stage are identified and grouped in both species by GO analysis. The results show that 10 and 68 differentially expressed genes (DEGs) are identified

for 3 and 6 h of cold stress respectively in plantain, while 40 and 238 DEGs are identified respectively in banana.

[Analysis of Gender Roles in Plantain Production and ...](#)

Plantains resemble green bananas, but when they ripen, they turn black and are used as a vegetable. Bananas have a thinner skin, and when ripe, they turn yellow. Plantains have a thicker skin, natural brown spots, and rough areas. Fresh plantains have more vitamin C, vitamin A, and potassium than bananas.
