Author has also produced the international bestsellers 'Ice Station' and 'Temple'.  
*Analysis of Current Judicial Decision* CRC Press

This book demonstrates the application of network theory to the social organization of animals.

The Diving Pool Cambridge University Press

Contests are an important aspect of the lives of diverse animals, from sea anemones competing for space on a rocky shore to fallow deer stags contending for access to females. Why do animals fight? What determines when fights stop and which contestant wins? Addressing fundamental questions on contest behaviour, this volume presents theoretical and empirical perspectives across a range of species. The historical development of contest research, the evolutionary theory of both dyadic and multiparty contests, and approaches to experimental design and data analysis are discussed in the first chapters. This is followed by reviews of research in key animal taxa, from the use of aerial displays and assessment rules in butterflies and the developmental biology of weapons in beetles, through to interstate warfare in humans. The final chapter considers future directions and applications of contest research, making this a comprehensive resource for both graduate students and researchers in the field.

New York Produce Review and American Creamery Oxford University Press, USA

Pulitzer Prize and National Book Award winner Annie Proulx returns with another stellar collection of short stories bound to be even more successful than her bestselling, critically acclaimed *Close Range*. Annie Proulx's new collection is peopled by characters who struggle with circumstances beyond their control. Born to ranching, drawn to it, or desperate to get out, they inhabit worlds that are isolated and often dangerous. Trouble comes at them from unexpected angles, and they drive themselves through it, hardheaded and resourceful. No one writes better than Proulx about the American west and about lives that may no longer be viable. This is a stunning collection by one of the most vivid and exhilarating writers of our time.

**No Contest** Springer Science & Business Media

The first major English translation of one of contemporary Japan's bestselling and most celebrated authors From Akutagawa Award-winning author Yoko Ogawa comes a haunting trio of novellas about love, fertility, obsession, and how even the most innocent gestures may contain a hairline crack of cruel intent. A lonely teenage girl falls in love with her foster brother as she watches him leap from a high diving board into a pool--a peculiar infatuation that sends unexpected ripples through her life. A young woman records the daily moods of her pregnant sister in a diary, taking meticulous note of a pregnancy that may or may not be a hallucination--but whose hallucination is it, hers or her sister's? A woman nostalgically visits her old college dormitory on the outskirts of Tokyo, a boarding house run by a mysterious triple amputee with one leg. Hauntingly spare, beautiful, and twisted, *The Diving Pool* is a disquieting and at times darkly humorous collection of novellas about normal people who suddenly discover their own dark possibilities.

Animal Contests W. W. Norton & Company

We show that too much meritocracy, modeled as accuracy of performance ranking in contests, can be a bad thing: in contests with homogeneous agents, it reduces output and is Pareto inefficient. In contests with sufficiently heterogeneous agents, discouragement and complacency effects further reduce the benefits of meritocracy. Perfect meritocracy may be optimal only for intermediate levels of heterogeneity.

The American Produce Review CUP Archive

Argues that competition is inherently destructive and that competitive behavior is culturally induced, counter-productive, and causes anxiety, selfishness, self-doubt, and poor communication.

**The Sensory Evaluation of Dairy Products** Pan Australia

Part of a new multidisciplinary series examining the functions and evolution of behaviour, this book aims to elucidate the general principles underlying animal aggression. The work divides forms of aggression according to function, examining different species, sexes and life cycle stages.

Bad Dirt Picador

Includes sections "Review of business literature" and "Book notices."

**The Business Education World** Cambridge University Press

This book argues that play offered Hamlet, John Donne, George Herbert, Andrew Marvell, Robert Burton, and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self. Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self, the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation.

The Sensory Evaluation of Dairy Products, Second Edition is for all who seek a book entirely devoted to sensory evaluation of dairy products and modern applications of the science. It is an excellent scientific reference for training in dairy product evaluation and is a practical guide to the preparation of samples for sensory evaluation. The book contains updates of the original text of the well-received first edition, as well as brand new material. This unique book is designed for professionals involved in many aspects of dairy production, including academic teaching and research, processing, quality assurance, product development and marketing. It is an invaluable tool for those who compete in the annual Collegiate Dairy Product Evaluation Contest.

Economic Entomology Simon and Schuster

Classic writers appear alongside new voices from around the world in a stimulating collection with broad appeal.

#### **National Fertilizer Review**

“Sober and well-informed. . . . A careful and compelling examination of the U.S.-Chinese relationship from a number of angles.”—Financial Times There may be no denying China's growing economic strength, but its impact on the global balance of power remains hotly contested. Political scientist Aaron L. Friedberg argues that our nation's leaders are failing to act expeditiously enough to counter China's growing strength. He explains how the United States and China define their goals and reveals the strategies each is now employing to achieve its ends. Friedberg demonstrates in this provocative book that the ultimate aim of Chinese policymakers is to “win without fighting,” displacing the United States as the leading power in Asia while avoiding direct confrontation. The United States, on the other hand, sends misleading signals about our commitments and resolve, putting us at risk for a war that might otherwise have been avoided. A much-needed wake-up call to U.S. leaders and policymakers, *A Contest for Supremacy* is a compelling interpretation of a rivalry that will go far to determine the shape of the twenty-first century.

*Stories of Ourselves: Volume 2*

Contests are an important aspect of the lives of diverse animals, from sea anemones competing for space on a rocky shore to fallow deer stags contending for access to females. Why do animals fight? What determines when fights stop and which contestant wins?
