Separated by the world ’ s longest land border and engaging in over three billion dollars in trade daily, Canada and the United States share security concerns, cultural interests, and a history spanning more than 250 years. Alan Rock, former Canadian ambassador to the United States, has said that this special relationship represents “ a bond that is beyond practical. It borders on mystical. ” The rise of nativist sentiment, however, has raised concerns over preserving this relationship. History Has Made Us Friends illuminates the nature and dynamics of Canada-US relations, examining their history, attributed meaning, and conceptualization. Contributors consider many angles and perspectives, including the impact of geopolitical change, to determine whether the relationship warrants the moniker “ special. ” They explore whether shared values and demographic similarities continue to cement the relationship, and if it still matters whether presidents and prime ministers get along. While things look different today from when President Kennedy declared, “ What unites us is far greater than what divides us, ” History Has Made Us Friends argues that the Canada-US relationship – often narrowly understood or dismissed as a relic of the past – continues to be unique and resilient.

Are there existing alternatives to corporate globalization? What are the prospects for and commonalities between communities and movements such as Occupy, the World Social Forum and alternative economies? Globalization Development and Social Justice advances the proposition that another globalization is not only possible, but already exists. It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency, rather than oppositional agency such as resistance, is a more effective alternative to neoliberal globalization. El Khoury develops a theory of infraglobalization that emphasizes creative constitution, not just contestation, of global and local processes. The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North. These case studies are located in the informal social economy and community development, as well as everyday practices, from prefigurative politics to community cooperatives and participatory

planning. This book makes an important contribution to debates about the prospects for, and practices of, a transformative grassroots globalization, and to critical debates about globalization and development strategies. It will be of interest to students and scholars of international relations, globalization, social movement studies, political and economic geography, sociology, anthropology and development studies.

This book analyses the root causes of suicide terrorism at both the elite and rank-and- file levels of the Hamas and also explains why this tactic has disappeared in the post-2006 period. This volume adopts a multi-causal, multi-level approach to analyse the use of suicide bombings by Hamas and its individual operatives in the Israeli-Palestinian conflict. It uses extensive fieldwork and on-the-ground interviews in order to delve beneath the surface and understand why and how suicide operations were adopted as a sustained mechanism of engagement within the Israeli-Palestinian conflict. Three core factors fuelled Hamas ’ s suicide bombing campaigns. First, Palestinian suicide operations are a complex combination of instrumental and expressive violence adopted by both organisations and individuals to achieve political and/or societal survival, retaliation and competition. In other words, suicide bombings not only serve distinct political and strategic goals for both Hamas and its operatives but they also serve to convey a symbolic message to various audiences, within Israel, the Palestinian territories and around the world. Second, suicide operations perform a crucial role in the formation and consolidation of Palestinian national identity and are also the latest manifestation of the historically entrenched cultural norm of militant heroic martyrdom. Finally, Hamas ’ s use of political Islam also facilitates the articulation, justification and legitimisation of suicide operations as a modern-day jihad against Israel through the means of modern interpretations and fatwas. This approach not only facilitates a much needed, multifaceted, holistic understanding of suicide bombings in this particular region but also yields policy-relevant lessons to address extreme political violence in other parts of the world. This book will be of much interest to students of Hamas, terrorism, Middle East politics and security studies.

The intention is to provide the stigma of Leo Brouwer's creation and confirm his status as a guitarist and composer in the artistic sphere; namely, that of an artist with an intense enquiring mind, while at the same time showcasing his music and the connotations that are occasionally dominant in his work. At the same time, the main intention is to shed light on the process of organizing the sound and motivic material in his music, something that can be achieved by analysing two of his most representative pieces - each pertaining to a different compositional period.

Each and every year, thousands of people go missing, over one-third of them are victims of murder, and their bodies are never recovered. These cases are seldom investigated,

much less prosecuted due to lack of evidence and lack of resolve by prosecutors. This book takes a deep dive into actual investigations and prosecutions of murders without bodies and is intended for those with interest in criminal investigation and risky prosecutions. The reader will learn the complexities of evidence identification, witness testimony, forensics, legal maneuvering, courtroom tactics, and the psychology of jury selection. Though many books are written about murder investigation, this book is unique as it delves into six actual real-life cases from the initial missing person report through the murder investigation and ultimate prosecution of the killer. The book chronicles the work of America's top no-body murder prosecutor Cass Castillo. This passionate prosecutor has dedicated his career to taking on the cases other prosecutors shun due to the unwritten rule of "No body, no crime." Castillo has successfully prosecuted more bodiless homicides than any other prosecutor in the United States and has been called the "Man who returns a voice to the voiceless." Castillo's case files, investigator's reports and interviews provide the foundation for this compelling and suspenseful compilation of Castillo's most significant works. The book concludes with a very insightful chapter on the psychological issues surrounding what makes a good juror. Jurors are the ultimate decision-makers, and having the ability to assess that person's bias, personality, and demeanor is key to a prosecutor's success. In Castillo's own words, he describes the character and psychological analyses he conducts on each potential juror and what drives his decisions on whether to accept or reject, that prospective juror.

With particular focus on the Asia-Pacific region, this book examines the rise and fall of sea powers. In the Asia-Pacific region there has been significant expansion of sea-based economies together with burgeoning naval power. Many claim that these processes will transform the world's future economic and security relationships. The book addresses the question of to what extent the notion of 'Asia rising' is reflected by and dependent on its developing sea power. A central theme is the Chinese challenge to long-term Western maritime ascendancy and what might be the consequences of this. In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant, as well as its role, both historic and contemporary, in the rise and fall of great powers. This book will be of much interest to students of naval power, Asian politics, strategic studies, war and conflict studies, IR and security studies.

Have you ever wondered what libertarians think about vaccine mandates? About gun control? About racial and sexual inequalities? While libertarianism is well known as a political theory relating to the scope and justification of state authority,

the breadth and depth of libertarian work on a wide range of other topics in social and political philosophy is less well known. This handbook is the first definitive reference on libertarianism that offers an in-depth survey of the central ideas from across philosophy, politics, and economics, including applications to contemporary policy issues. The forty chapters in this work provide an encyclopedic overview of libertarian scholarship, from foundational debates about natural rights theories vs. utilitarian approaches, to policy debates over immigration, punishment and policing, and intellectual property. Each chapter presents a comprehensive and up-to-date overview of historical and contemporary libertarian thought on its subject, and thus serves as an essential guide to current scholarship, and a starting place for discovering future lines of research. The book also contains a section on criticisms of libertarianism, written by leading scholars from the feminist, republican, socialist, and conservative perspectives, as well as a section on how libertarian political theory relates to various schools of economic thought, such as the Chicago, Austrian, Bloomington, and Public Choice schools. This book is an essential and comprehensive guide for anyone interested in libertarianism, whether sympathizer or critic.

If science fiction stages the battle between humans and non-humans, whether alien or machine, who is elected to fight for us? In the classics of science fiction cinema, humanity is nearly always represented by a male, and until recently, a white male. Spanning landmark American films from *Blade Runner* to *Avatar*, this major new study offers the first ever analysis of masculinity in science fiction cinema. It uncovers the evolution of masculine heroes from the 1980s until the present day, and the roles played by their feminine counterparts. Considering gender alongside racial and class politics, *Masculinity in Contemporary Science Fiction Cinema* also situates filmic examples within the broader culture. It is indispensable for understanding science fiction and its role in contemporary cultural politics.

A vivid and original account of one of Ireland's greatest poets by an acclaimed Irish historian and literary biographer. The most important Irish poet of the postwar era, Seamus Heaney rose to prominence as his native Northern Ireland descended into sectarian violence. A national figure at a time when nationality was deeply contested, Heaney also won international acclaim, culminating in the Nobel Prize for Literature in 1995. In *On Seamus Heaney*, leading Irish historian and literary critic R. F. Foster gives an incisive and eloquent account of the poet and his work against the background of a changing Ireland. Drawing on unpublished drafts and correspondence, Foster provides illuminating and personal interpretations of Heaney's work. Though a deeply charismatic figure, Heaney refused to don the mantle of public spokesperson, and Foster identifies a deliberate evasiveness and creative ambiguity in his poetry. In this, and in Heaney's evocation of a disappearing rural Ireland haunted by political violence, Foster finds parallels with the other towering figure of Irish poetry, W. B. Yeats. Foster also discusses Heaney's cosmopolitanism, his support for dissident poets abroad, and his increasing focus in his later work on death and spiritual transcendence. Above all, Foster examines how Heaney created an

extraordinary connection with an exceptionally wide readership, giving him an authority and power unique among contemporary writers. Combining a vivid account of Heaney's life and a compelling reading of his entire oeuvre, *On Seamus Heaney* extends our understanding of the man as it enriches our appreciation of his poetry.

Over the course of the 20th century, American domestic service changed from an occupation with a hierarchical, top-down structure to one in which relationships were more negotiated. Many forces shaped this transformation: shifts in women's role in society, both at home and in the work force; changes in immigration laws and immigrant populations; and the politicization of the occupation. Moreover, domestic workers themselves took advantage of the resulting circumstances to demand better treatment and a say in their working conditions.

Fictional depictions of intermarriage can illuminate perceptions of both 'ethnicity' and 'whiteness' at any given historical moment. Popular examples such as Lucy and Ricky in *I Love Lucy* (1951-1957), Joanna and John in *Guess Who's Coming to Dinner* (1967), Toula and Ian in *My Big Fat Greek Wedding* (2002) helped raise questions about national identity: does 'American' mean 'white' or a blending of ethnicities? Building on previous studies by scholars of intermarriage and identity, this study is an ambitious endeavor to discern the ways in which literature and films from the 1960s through 2000s rework nineteenth- and early-twentieth-century intermarriage tropes.

Unlike earlier stories, these narratives position the white partner as the 'other' and serve as useful frameworks for assessing ethnic and American identity. Lauren S. Cardon sheds new light on ethno-racial solidarity and the assimilation of different ethnicities into American dominant culture.
