Anatomy is one of the most difficult subjects you will have to learn during your studies. It consists of two main divisions: macroscopic (or "gross" anatomy) and microscopic anatomy. The former deals with large structures that are mostly seen with the naked eye, while the latter involves the study of tissues and their

## Nurseslabs

(ii) Human anatomy is the study of body structures and the physical relationship among body parts of human beings. (iii) Human physiology is the study of the functions of the human body. (iv) Anatomy and physiology are closely integrated both theoretically and practically (v) Modern medicine depends on an understanding of physiology and anatomy.

This combined coloring workbook and study guide is an excellent tool for anyone who is learning basic human

anatomy and physiology. The author's straightforward approach promotes and reinforces learning on many levels through a wide variety of visual and written exercises. Along with its review of the human body from microscopic to macroscopic levels, the workbook also includes practical, clinically oriented activities.
