World History McDougal Littell/Houghton Mifflin
Ideas abound as to why certain complex societies collapsed in the past, including environmental change, subsistence failure, fluctuating social structure and lack of adaptability. Why Did Ancient Civilizations Fail? evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations. This engaging book offers a new theory of collapse, that of social hubris. Through an examination of Mesopotamian, Egyptian, Roman, Maya, Inca, and Aztec societies, Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt, and he further considers how this has implications for contemporary societies. Comprehensive and well-written, this volume serves as an ideal text for undergraduate courses on ancient complex societies, as well as appealing to the scholar interested in societal collapse.

World History Scholastic
Max Weber, widely recognized as the greatest of the founders of classical sociology, is often associated with the development of capitalism in Western Europe and the analysis of modernity. But he also had a profound scholarly interest in ancient societies and the Near East, and turned the youthful discipline of sociology to the study of these archaic cultures. The Agrarian Sociology of Ancient Civilizations – Weber’s neglected masterpiece, first published in German in 1897 and reissued in 1909 – is a fascinating examination of the civilizations of Mesopotamia, Egypt, Hebrew society in Israel, the city-states of classical Greece, the Hellenistic world and, finally, Republican and Imperial Rome. The book is infused with the excitement attendant when new intellectual tools are brought to bear on familiar subjects. Throughout the work, Weber blends a description of socio-economic structures with an investigation into mechanisms and causes in the rise and decline of social systems. The volume ends with a magisterial explanatory essay on the underlying reasons for the fall of the Roman Empire.

The Destruction of Civilization about 10,500 B.C. Routledge
The Children's Pictorial Atlas of Ancient Civilizations opens up the world of the past for children to explore. Brief texts with child friendly illustrations introduce the historically accurate facts of civilization around the world, and this book will stimulate children's imaginations and curiosity about the beginnings of all the world's civilizations.

4th Grade History: Ancient Civilizations Edc Pub
About 5,000 years ago the first urban societies developed laying the foundations for the first civilizations. Nearly all civilizations share the same few features- they have abundant food surpluses, contained cities, political bureaucracies, armies, defined religious and social hierarchies and long

distance trading. Ancient Egyptian culture flourished between c. 5500 BCE with the rise of technology (as evidenced in the glass-work of faience) and 30 BCE with the death of Cleopatra VII, the last Ptolemaic ruler of Egypt. It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land. The culture is often misunderstood as having been obsessed with death but, had this been so, it is unlikely it would have made the significant impression it did on other ancient cultures such as Greece and Rome. Neolithic means "e;new stone"e;, even though agriculture was the crowning achievement of the period. Civilizations started out small. Agriculture at first tended to tie only small groups together. These groups also all settled along rivers, important as a reliable and predictable source of water. As time passed, families usually worked the same plot of land over successive generations, leading to the concept of ownership. Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11,000 years ago. Grass pea, wild wheat, wild barley, and lentils were found throughout the site, including some of the earliest known samples. This was much further east than most sites known for early agriculture. This book furnishes with utmost facility to all classes of readers, the needed information on ancient civilization. The unusual variety of the subject makes this a work of endless fascination.
Government in the Ancient World Martin K. Ettington
Examines aspects of everyday life in the world's first civilizations, with emphasis on early Egyptian, Greek and Roman cultures.

Discovering Our Past Ancient Civilizations Grade 6 California Teacher Edition Speedy Publishing LLC

Ancient Civilizations Teacher Created Resources
Ancient Civilizations offers a comprehensive and straightforward account of the world’s first civilizations and how they were discovered, drawing on many avenues of inquiry including archaeological excavations, surveys, laboratory work, highly specialized scientific investigations, and both historical and ethnohistorical records. This book covers the earliest civilizations and the great powers in the Near East, moving on to the first Aegean civilizations, the Mediterranean world in the first millennium, Imperial Rome, northeast Africa, the divine kings in southeast Asia, and empires in East Asia, as well as early states in the Americas and Andean civilization. Ancient Civilizations includes a number of features to support student learning: a wealth of images, including several new illustrations; feature boxes which expand on key sites, finds and written sources; and an extensive guide to further reading. With new perceptions of the origin and collapse of states, including a review of the issue of sustainability, this fourth edition has been extensively updated in the light of spectacular new discoveries and the latest theoretical advances. Examining the world's pre-industrial civilizations from a multidisciplinary perspective and offering a comparative analysis of the field which explores the connections between all civilizations around the world, Scarre and Fagan, both established authorities on world prehistory, provide a valuable introduction to pre-industrial civilizations in all their brilliant diversity.

The Story of Civilization Routledge
Introducing the book that governments and mainstream academia donat want you to see. Evidence of Lost Ancient Civilizations: Case Closed is the ultimate reference guide for anyone interested in learning the true, unfiltered history of ancient civilization and of mankindas earliest origins. This definitive resource guide uniquely presents and explores evidence not included in conventional history or science textbooks. Revealing evidence consisting of compelling eyewitness accounts, media reports, scientific journal articles, as well as indisputable physical evidence, has never been made available to the general public. You will see by the overwhelming shocking evidence and data presented throughout this book it is apparent that modern science and history have been offering a less-than-accurate account of evolution and the origins of mankind on Earth. The basic questions this book attempts to answer are: Where did we come from? What is the true history of mankind? Where will the truth lead us? What humanity may first discover from this explosive ancient evidence may shake the foundations of established world order and religion, and will certainly be difficult to comprehend or rationalize. However, what we may learn from our forgotten past could guide us in determining the direction of our future.

The Story of Civilization Activity Book: Volume I - The Ancient World

Speedy Publishing LLC

There is much of human history which we don't know due to lost records, the oceans covering our ancestor's cities, natural disasters, and reasons we don't know. There are also many anomalies which have been found showing ruins and objects from the far past which should not exist. Some of the Historical Facts this book is based on: Plato said that Atlantis was destroyed 9,000 years before his time in Greece. Plato lived in 433 B.C. which would have meant Atlantis was destroyed 9,433 years B.C. or 11,433 years before the current age. The Younger Dryas Period in History was between roughly 12,900 and 11,600 years ago according to paleontologists and archeologists. Many researchers think this period of climate change resulted from comets hitting the Earth at this time. The Vulture Stone at Gobekli Tepe which some scientists have interpreted as having a record of comets hitting the Earth about 11,000 B.C. My study on ancient history has led me to write a number of books on the topic which can be found on my website at this link: <https://mkettingtonbooks.com/ancient-history.html> The above facts and all of my research has led me to conclude that there were ancient world spanning civilizations which existed and were destroyed on the Earth in the 9,000 B.C. to 11,000 B.C period. There may have been earlier civilizations too, but the focus of this book is on that time period. The following chapters review some of the evidence of these ancient civilizations which existed at these same very ancient times.

Usborne Book of the Ancient World Createspace Independent Publishing Platform

This new edition offers a thorough exploration of the nature & processes that led to civilization & remains the only in-depth overview--written for students--that provides detailed discussions of both New World & Old World civilizations within the same book.
