In android, the style is defined in a separate XML resource file and we can use that defined style for the Views in XML that specifies the layout. The Styles in android are similar to CSS styles in web design. Following is the example of defining a TextView control with required style attributes in an XML layout file.

The code styles on this page are strict rules for contributing Java code to

the Android Open Source Project (AOSP).

Contributions to the Android platform that don't adhere to these rules generally aren't accepted. We recognize that not all existing code follows these rules, but we expect all new code to be compliant.
