The splash screen image is
centered to the screen. The
background colour of the
splash screen can be defined
in the config.xml. The image
will rotate appropriately.
Any image size can be used.
Ideally it should be smaller
than your smallest screen
size.

How to implement Android Splash Screen

People are likely to switch apps
frequently, so design a launch
screen that doesn ' t draw

attention to the app launching
experience. Don ' t advertise.
The launch screen isn ' t a
branding opportunity. Don ' t
design an entry experience that
looks like a splash screen or an
"About" window.
