[1,000 Practice MTF MCQs for the Primary and Final FRCA](#) Cambridge University Press

Intensive care medicine is a dynamic and evolving specialty, requiring its practitioners to be part physician, physiologist and anaesthetist. This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with first-hand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. In addition, it will appeal to intensive care nurses and allied healthcare professionals wishing to update their knowledge as part of continuing professional development, and to physicians sitting professional examinations in related specialties requiring knowledge of intensive care medicine such as general medicine, general surgery and anaesthesia. This book will complement the existing international best-selling title "Multiple Choice Questions in Intensive Care Medicine" (9781903378 649), also written by Dr Steve Benington.

An invaluable self-assessment tool for emergency medicine trainees in Australasia. *Emergency Medicine MCQs* is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in *Emergency Medicine MCQs* cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice – from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app – a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

[QBase Anaesthesia with CD-ROM: Volume 6, MCQ Companion to Fundamentals of Anaesthesia](#) tfm Publishing Limited

The perioperative care of individuals with neurologic compromise is critically important, yet it is only one dimension of the rich relationship between anaesthesiology and the neurosciences. The mechanism of everyday therapeutic interventions such as anaesthesia and analgesia is exciting neuroscience in its own right. At the new frontier of outcomes studies lies the question of how the perioperative period might impact the brain. For example, questions related to anaesthetic neurotoxicity, delirium, and cognitive dysfunction pose critical challenges for the field. The *Oxford Textbook in Neuroscience and Anaesthesiology* addresses the exciting field of neuroanaesthesiology in a new and stimulating way. In twenty eight chapters, the neuroscientific basis of anaesthesiology, the full spectrum of clinical neuroanaesthesia, and the care of neurologic patients undergoing non-neurologic surgery are explored in one comprehensive textbook for the first time. The first section considers the neural mechanisms of general anaesthetics, cerebral physiology, the neurobiology of pain, and more. The second section explores the care of patients with neurologic disease in the operating room or intensive care unit. These clinical chapters systematically treat the perioperative considerations of both brain and spine surgery, and provide introductions to neurocritical care and pediatric neuroanaesthesia. The final section outlines the care of neurologic patients undergoing non-neurologic surgery. It examines key connections of neurology and anaesthesiology, examining how conditions such as dementia, stroke, or epilepsy interface with the perioperative period. Each chapter has been carefully crafted to be concise yet highly informative, reflecting the cutting edge of neuroscience and neuroanaesthesiology. This international textbook gathers the best available expertise of authors and leaders worldwide. Includes access to online-only content, including more than 20 cases and more than 90 questions that can be used in presentations and teaching sessions. **Lippincott's Anesthesia Review: 1000 Questions and Answers Elsevier Health Sciences**

Interest in regional anaesthesia has been flourishing for a number of reasons, including in particular the feasibility of ultrasound-guided peripheral nerve blocks. This trend is reflected in the growing popularity of fellowships in regional anaesthesia. The syllabus for such fellowship examinations is vast, and the current book aims to provide suitable guidance by presenting typical multiple choice questions with accompanying answers, in detail when necessary. The entire syllabus is covered in four sections that address basic principles and equipment, peripheral nerve blocks, central neuraxial blocks, and regional anaesthesia and acute pain. This book will be especially useful for those preparing for European Society of Regional Anaesthesia diploma examinations or for the regional anaesthesia component of FRCA examinations. It is also highly relevant to equivalent U.S. and Canadian examinations and will be helpful to all who require a self-assessment tool in the subject.

**MCQs in Regional Anaesthesia and Pain Therapy Lippincott Williams & Wilkins**

Designed for candidates sitting the primary FRCA examination, this book brings together exam questions from recent years and structures them into six practice papers. The format of 90 questions per paper echoes the exam itself. Following each paper a scoring chart and detailed explanations of answers are provided. The questions cover physiology, pharmacology, physics, clinical measurement and statistics as they appear in the primary FRCA. There are questions on all recently added exam topics, and those that now carry stronger emphasis and more weight such as resuscitation, sepsis and trauma. The latest drugs, equipment, monitoring techniques and safety procedures are referenced. Trainees will find this an invaluable tool for exam preparation, whether sitting the FRCA in the UK, through the London College external examiners in many Asian and African countries, or similar exams for anaesthetists in Australasia and North America.

**SBA and MTF MCQs for the Primary FRCA Elsevier Health Sciences**

**Multiple Choice Questions in Regional Anaesthesia Springer Science & Business Media**

**Intensive Care Medicine MCQs Oxford University Press**

A single, comprehensive text covering all the MCQs required to prepare for both the Primary and Final FRCA exams.

**Oxford Textbook of Neuroscience and Anaesthesiology John Wiley & Sons**

A major part of the FRCA examination is multiple choice questions. QBase Anaesthesia is much more than just a book giving five sets of examination papers, in groups of ninety questions, mirroring the format of the Primary Examination. It also comes with a free CD-ROM. This powerful electronic package can be installed in a matter of seconds and gives the reader an incredible range of options, greatly increasing the utility and value of the book. Not only can the reader practice the set exams, but the program will mark these exams, allow the reader to customize exams to focus in on areas requiring further revision, shuffle the question stems to set an inexhaustible number of different papers, and advise on examination strategy. It has the facility to print out and store test results for future comparison and re-analysis, and provides helpful notes on each question.
