Batchelor coins the term

"chromophobia"--A fear of corruption or contamination through color--in a meditation on color in western culture.

Batchelor analyzes the history of, and the motivations behind, chromophobia, from its beginnings through examples of nineteenth-century literature, twentieth-century architecture and film to Pop art,

minimalism and the art and architecture of the present day. He argues that there is a tradition of resistance to colour in the West, exemplified by many attempts to purge color from art, literature and architecture. Batchelor seeks to analyze the motivations behind chromophobia, considering the work of writers and philosophers who have used color as a significant motif, and offering new interpretations of familiar texts and works of art.

An erotically charged, addictive thriller
from the future queen of suspense. Living
in Toronto for a year, Elena is leading the
normal life she has always dreamed of,
including a stable job as a journalist and a
nice apartment shared with her boyfriend.
As the lone female werewolf in existence,
only her secret midnight prowls and her
occasional inhuman cravings set her apart.
Just one year ago, life was very different.
Adopted by the Pack when bitten, Elena
had spent years struggling with her
resentment at having her life stolen away.
Torn between two worlds, and
overwhelmed by the new passions coursing
through her body, her only option for
control was to deny her awakening needs
and escape. But now the Pack has called
Elena home to help them fight an alliance
of renegade werewolves who are bent on
exposing and annihilating the Pack. And

although Elena is obliged to rejoin her "family," she vows not to be swept up in Pack life again, no matter how natural it might feel. She has made her choice. Trouble is, she's increasingly uncertain if it's the right one. An erotically charged thriller, *Bitten* will awaken the voracious appetite of every reader, as the age-old battle between man and beast, between human and inhuman forces, comes to a head in one small town and within one woman's body.

Despite widespread skepticism on the matter, a significant number of people today have stories of religious experience—moments of inexplicable terror or rapturous joy, visions, near-death experiences of the afterlife, encounters with angels, heavenly voices, and premonitions. How should rationally minded people respond? What would your reaction be if someone told you that, one night while sitting alone, she saw through the window a brilliant light descend from the sky until it was so large that it filled the room—and that it radiated a feeling of “pure love”? And what would you say if a friend confided that one night he woke up and could not move, felt he was being suffocated, and sensed an evil spirit

in the room? By default in the secular age we are skeptical about anything mysterious or supernatural. More likely than not, most people would respond to the stories above with embarrassment and concern about the person's grasp of reality, or they would attempt to explain them away through rational or scientific means. But the truth is that religious experiences like these are not as uncommon as they seem—although talking about such experiences often is. This is the case even in a faith tradition such as Christianity, despite the Bible's numerous accounts of miraculous and mysterious happenings. In *Encountering Mystery*, noted biblical scholar Dale Allison makes the argument that stories of religious experience are meaningful and not to be marginalized—and that we have a moral prerogative to lovingly engage with such stories regardless of whether we have had similar experiences. Through a close look at phenomena such as moments of inexplicable terror or rapturous joy, visions, near-death experiences of the afterlife, encounters with angels, heavenly voices, and premonitions, Allison shows how ordinary practices of faith need not be at odds with individual religious experiences. Above all, he enjoins us to be honest about the persistence of religious experience in a secular age and to make space

for those who encounter mystery in their lives. *Bitten* Routledge

Forthcoming Books Bitten Elizabeth Bowen and the Writing of Trauma analyses the treatment of memory and the past in Bowen's writing through the lens of trauma theory. It draws on the theories of Jacques Derrida, Hélène Cixous, Julia Kristeva, Sigmund Freud, and Cathy Caruth, to propose that Bowen's work is best understood through the psychological, narratological, and linguistic effects of trauma in her fiction. Bowen's writing complicates existing deconstructive and psychoanalytic models of trauma and literature, and testifies to the responsibility of survival and the ethics of bearing witness. “ Pollan keeps you turning the pages . . . cleareyed and assured. ” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of

consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives. *Angels of the Battlefield* W. A “ brilliant ” (Lupita Nyong ’ o, Time), “ poignant ” (Entertainment Weekly), “ soul-nourishing ” (USA Today) memoir about coming of age during the twilight of apartheid “ Noah ’ s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa ’ s history that must never be forgotten. ” —Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah ’ s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents ’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to

hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a

moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconditional love.

" Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books. " —The Washington Post Book World (front page review) In Cosmos, the late

astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In Pale Blue Dot, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. " Takes readers far beyond Cosmos . . . Sagan sees humanity's future in the stars. " —Chicago Tribune

At 59 million, they constitute nearly a fifth of the US population. Their number has alarmed many in government, other mainstream institutions, and the nativist right who fear the white-majority US they have known is disappearing. During the 2016 US election and after, Donald Trump has played on these fears, embracing xenophobic messages vilifying many Latin American immigrants as rapists, drug smugglers, or "gang bangers." Many share such nativist desires to build enhanced border walls and create immigration restrictions to keep Latinos of various backgrounds out. Many whites'

racist framing has also cast native-born Latinos, their language, and culture in an unfavorable light. Trump and his followers' attacks provide a peek at the complex phenomenon of the racialization of US Latinos. This volume explores an array of racialization's manifestations, including white mob violence, profiling by law enforcement, political disenfranchisement, whitewashed reinterpretations of Latino history and culture, and depictions of "good Latinos" as racially subservient. But subservience has never marked the Latino community, and this book includes pointed discussions of Latino resistance to racism. Additionally, the book's scope goes beyond the United States, revealing how Latinos are racialized in yet other societies. *Transforming Gender and Emotion* Government Printing Office *The Global Innovation Index 2020* provides detailed metrics about the innovation performance of 131 countries and economies around the world.
