Chad Hanson is a scientist by training, a sociologist by degree, a pragmatist, and a

bit of a skeptic. But when he gets within a mile of a trout stream his thoughts become cloudy, he loses manual dexterity, and tends to babble and shuffle around without regard for logic or reason. Chad Hanson is a fly fisherman. From the banks of the Tomorrow River in north central Wisconsin to the North Platte in Wyoming, and anywhere in between, Hanson presents eleven literary sketches that offer the world through the fly fisher's eye. Swimming with Trout uses the sport of angling as a vehicle to address broader issues such as the plight of Native Americans, the state of the environment, consumerism, property rights, species extinction, and the depth of human friendship. Whether he is reflecting on the multimillion dollar industry fly fishing has become, contemplating the ethics of the sport, or wondering what musical instrument a brook trout would play if it could, Hanson's vignettes drive at the heart of the force that turns an ordinary person into a passionate angler. "Whether you fly fish or not, you'll love this romp across the West with Chad Hanson who takes you from the Bighorns to Bozeman and Arizona to Wisconsin in search of elusive trout and wild places. And when you have closed the last page, you'll hold out hope that there still are Apaches in Arizona, and I'm not talking about Indians."--Candy Moulton, author of Roadside History of Wyoming, Roadside History of Colorado, and Chief Joseph: Guardian of the People "Picking up a fiberglass pole in a sporting goods store, Chad Hanson gives it 'the old retail waggle.' This book deserves better--actual purchase--and just because of its accuracy and good cheer. Hanson is the first writer ever to confess to fooling Coloradans into thinking Wyoming carp are German browns, and to donning a wetsuit to count coup on rainbows. What more could a reader ask for?"--Tom Rea, author of Bone Wars and Devil's Gate

"Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the

project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike."--Publisher's website

Rachel Carson was a marine biologist credited with the founding of the ecology movement and the rise in ecofeminism. One of her most popular works was *Silent Spring*, which challenged the use of DDT (an insecticide infamous for its negative environmental effects) and questioned the claims of modern industry. Carson also wrote essays, reviews, articles, and speeches to educate the public about the impacts of chemical pollutants on both the environment and the human body. This literary companion provides readers with Carson's key messages via an A-to-Z index of topics discussed in her works including carcinogens, endangered species, and radioactivity.
