Jesus very presence as the New Testament age unfolded (1st century A.D.), engendered opposition, created conflict, while ushering in grace. His ideas were considered radical. Why is this so? The NIV Archeological Study Bible (2005), NIV Student Bible, et al. and corroborating Extra-Biblical evidence provide a context for the Word view about Jesus in Biblical history, and supports aspects of the social and physical sciences in terms of cultural, socio-economic, political, historical, archeological, and philosophical (apologetics) evidence. As the pages of this book unfold, there is an internal consistency with social science and The Bible. However, where such consistency appeared to diverge, this author attempts to filter out the noise by applying critical thinking criteria to a Worldview that may not be consistent with the Word view. The goal of this book therefore is to provide some exposition (Greek apologia) of the Word and see how the World fits. Born again Christians can be credible scientists and not compromise Gods Word. Working in an interdisciplinary manner is long pursued but a difficult goal of science and mathematics education. The interdisciplinarity of science and mathematics can occur when connections between those disciplines are identified and developed.

These connections could be expressed in the educational policies, curriculum, or in the science and mathematics teachers' educational practices. Sometimes those connections are scarce, but in other moments, full integration is achieved. The Handbook of Research on Interdisciplinarity Between Science and Mathematics in Education presents results of good practices and interdisciplinary educational approaches in science and mathematics. It presents a broad range of approaches for all educational levels, from kindergarten to university. Covering topics such as computer programming, mathematics in environmental issues, and simple machines, this major reference work is an excellent resource for administrators and educators of both K-12 and higher education, government officials, pre-service teachers, teacher educators, librarians, researchers, and academicians.
