It's 1953, and the United States has just executed an American couple convicted of spying for the Soviet Union. Everyone is on edge as the Cold War standoff between communism and democracy leads to the rise of Senator Joe McCarthy and his zealous hunt for people he calls subversives or communist sympathizers. Suspicion, loyalty oaths, blacklists, political profiling, hostility to foreigners, and the assumption of guilt by association divide the nation. Richard and his family believe deeply in American values and love of country, especially since Richard's father works for the FBI. Yet when a family from Czechoslovakia moves in down the street with a son Richard's age named Vlad, their bold ideas about art and politics bring everything into question. Richard is quickly drawn to Vlad's confidence, musical sensibilities, and passion for literature, which Richard shares. But as the nation's paranoia spirals out of control, Richard longs to prove himself a patriot, and blurred lines between friend and foe could lead to a betrayal that destroys lives. Punctuated with photos, news headlines, ads, and quotes from the era, this suspenseful and relatable novel by award-winning New York Times best-selling author L.M. Elliott breathes new life into a troubling chapter of our history.

The explosive story of America's secret post-WWII science programs, from the author of the New York Times bestseller [Area 51](#) In the chaos following World War II, the U.S. government faced many difficult decisions, including what to do with the Third Reich's scientific minds. These were the brains behind the Nazis' once-indomitable war machine. So began Operation Paperclip, a decades-long, covert project to bring Hitler's scientists and their families to the United States. Many of these men were accused of war crimes, and others had stood trial at Nuremberg; one was convicted of mass murder and slavery. They were also directly responsible for major advances in rocketry, medical treatments, and the U.S. space program. Was Operation Paperclip a moral outrage, or did it help America win the Cold War? Drawing on exclusive interviews with dozens of Paperclip family members, colleagues, and interrogators, and with access to German archival documents (including previously unseen papers made available by direct descendants of the Third

Reich's ranking members), files obtained through the Freedom of Information Act, and dossiers discovered in government archives and at Harvard University, Annie Jacobsen follows more than a dozen German scientists through their postwar lives and into a startling, complex, nefarious, and jealously guarded government secret of the twentieth century. In this definitive, controversial look at one of America's most strategic, and disturbing, government programs, Jacobsen shows just how dark government can get in the name of national security.

Basil introduces Nathaniel to music, books, and philosophies that open his mind to new attitudes about equality. The year is 1775, and as colonists voice their rage over England's taxation, Patrick Henry's words "give me liberty, or give me death" become the sounding call for action. Should Nathaniel and Basil join the fight? What is the meaning of "liberty" in a country reliant on indentured servants and slaves? Nathaniel must face the puzzling choices a dawning nation lays before him. "Filled with action, well-drawn characters, and a sympathetic understanding of many points of view." —ALA Booklist

Crow Lake is that rare find, a first novel so quietly assured, so emotionally pitch perfect, you know from the opening page that this is the real thing—a literary experience in which to lose yourself, by an author of immense talent. Here is a gorgeous, slow-burning story set in the rural "badlands" of northern Ontario, where heartbreak and hardship are mirrored in the landscape. For the farming Pye family, life is a Greek tragedy where the sins of the fathers are visited on the sons, and terrible events occur—offstage. Centerstage are the Morrissions, whose tragedy looks more immediate if less brutal, but is, in reality, insidious and divisive. Orphaned young, Kate Morrison was her older brother Matt's protegee, her fascination for pond life fed by his passionate interest in the natural world. Now a zoologist, she can identify organisms under a microscope but seems blind to the state of her own emotional life. And she thinks she's outgrown her siblings—Luke, Matt, and Bo—who were once her entire world. In this universal drama of family love and misunderstandings, of resentments harbored and driven underground, Lawson ratchets up the tension with heartbreaking humor and consummate control, continually overturning one's expectations right to the very end. Tragic, funny, unforgettable, Crow Lake is a quiet tour de force that will catapult Mary Lawson to the forefront of fiction writers today.

[Bea and the New Deal Horse](#) Harper Collins

"I come from Des Moines. Somebody had to." And, as soon as Bill Bryson was old enough, he left. Des Moines couldn't hold him, but it did lure him back. After ten years in England he returned to the land of his youth, and drove almost 14,000 miles in search of a mythical small town called Amalgam, the kind of smiling village where the movies from his youth were set. Instead he drove through a series of horrific burghs, which he renamed Smellville, Fartville, Coleslaw, Coma, and Doldrum. At best his search led him to Anywhere, USA, a lookalike strip of gas stations, motels and hamburger outlets populated by obese and slow-witted hicks with a partiality for synthetic fibres. He discovered a continent that was doubly lost: lost to itself because he found it blighted by greed, pollution, mobile homes and television; lost to him because he had become a foreigner in his own country.
