Where is the evidence in a nursing research study? What is the evidence? How good is the evidence? And, how is it relevant to providing evidence-based nursing care? Ensure that students can meet the AACN's (American Association of Colleges of Nursing) goal of identifying valid research findings and using them to determine if they are providing care that is supported by evidence.

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential

motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. *Nickel and Dimed* reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever.

Increasing numbers of adults are enrolling in doctoral programmes, but their earlier college lives often do not prepare them for the rules of the academic game. Many have no idea what a dissertation looks like, how it gets that way, or what options are available to them. This book is a practical guide for students who need help in progressing from the decision to write a dissertation to the planning, writing and defending of it. It includes samples of proposals and dissertations that have been accepted and data drawn from a number of sources, including focus groups with doctoral students and graduates and responses to an open-ended questionnaire from doctoral students across the United States.

James Harner's popular pamphlet, first published in 1985, has been revised and updated in the light of advances in computer technology and the availability of humanities databases. Harner offers useful information on planning research, organizing an annotated bibliography, compiling entries, using a computer to prepare the manuscript, and editing. While the booklet focuses on the preparation of a comprehensive bibliography on a single literary author, the procedures and techniques are easily adapted to selective or subject bibliographies and to other periods and disciplines.

Reexamining the Chicano civil rights movement of the 1960s and 1970s, *In the Spirit of a New People* brings to light new insights about social activism in the twentieth-century and new lessons for progressive politics in the twenty-first. Randy J. Ontiveros explores the ways in which Chicano/a artists and activists used fiction, poetry, visual arts, theater, and other expressive forms to forge a common purpose and to challenge inequality in America. Focusing on cultural politics, Ontiveros reveals neglected stories about the Chicano movement and its impact: how writers used the street press to push back against the network news; how visual artists such as Santa Barraza used painting, installations, and mixed media to challenge racism in mainstream environmentalism; how El Teatro Campesino's innovative "actos," or short skits, sought to embody new, more inclusive forms of citizenship; and how Sandra Cisneros and other Chicana novelists broadened the narrative of the Chicano movement. *In the Spirit of a New People* articulates a fresh understanding of how the Chicano movement contributed to the social and political currents of postwar America, and how the movement remains meaningful today.

These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come.

At an event honoring Daisy Bates as 1990's Distinguished Citizen then-governor Bill Clinton called her "the most distinguished Arkansas citizen of all time." Her classic account of the 1957 Little Rock School Crisis, *The Long Shadow of Little Rock*, couldn't be found on most bookstore shelves in 1962 and was banned throughout the South. In 1988, after the University of Arkansas Press reprinted it, it won an American Book Award. On September 3, 1957, Gov. Orval Faubus called out the National Guard to surround all-white Central High School and prevent the entry of nine black students, challenging the Supreme Court's 1954 order to integrate all public schools. On September 25, Daisy Bates, an official of the NAACP in Arkansas, led the nine children into the school with the help of federal troops sent by President Eisenhower—the first time in eighty-one years that a president had dispatched troops to the South to protect the constitutional rights of black Americans. This new edition of Bates's own story about these historic events is being issued to coincide with the fiftieth anniversary of the Little Rock School crisis in 2007.

In 1991, the Government of Canada ratified the United Nations Convention on the Rights of the Child, requiring governments at all levels to ensure that Canadian laws and practices safeguard the rights of children. *A Question of Commitment: Children's Rights in Canada* is the first book to assess the extent to which Canada has fulfilled this commitment. The editors, R. Brian Howe and Katherine Covell, contend that Canada has wavered in its commitment to the rights of children and is ambivalent in the political culture about the principle of children's rights. *A Question of Commitment* expands the scope of the editors' earlier book, *The Challenge of Children's Rights for Canada*, by including the voices of specialists in particular fields of children's rights and by incorporating recent developments.

While much work has been done on goddesses of the ancient world and the male gods of pre-Christian Scandinavia, the northern goddesses have been largely neglected. *Roles of the Northern Goddess* presents a highly readable study of the worship of these goddesses by men and women. With its use of evidence from early literature, popular tradition, legend and archaeology, this book investigates the role of the early hunting goddess and the local goddesses who were involved in all aspects of the household and the farm. What emerges is that the goddess was both benevolent and destructive, a powerful figure closely concerned with birth and death and with destiny of individuals.

#1 New York Times Bestseller Legendary venture capitalist John Doerr reveals how the goal-setting system of Objectives and Key Results (OKRs) has helped tech giants from Intel to Google achieve explosive growth—and how it can help any organization thrive. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove ("the greatest manager of his or any era") drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In *Measure What Matters*, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic.
