This popular textbook offers a broad and accessible introduction to the building blocks of modern finance: financial markets, institutions and instruments. Focussing on the core elements of the subject, the author blends theory with real-life data, cases and numerical worked examples, linking the material to practice at just the right level of technical complexity. This new edition has updated data and cases throughout, ensuring that it is as up-

to-date as possible in this fast-moving area. More assessment and self-test resources have been added to the book to help support students and lecturers. It is ideally suited to students at all levels who take economics, business and finance courses, as well as for those who want to understand the workings of the modern financial world. New to this Edition: - New case studies, including coverage of the Libor and foreign exchange rigging scandals, Bitcoin, the FinTech revolution and issues raised by Brexit - Fully updated data and relevant numerical examples - Coverage of derivatives such as futures, options and swaps - Extensive discussion of regulatory developments since the financial crisis - A companion website featuring teaching resources is available

4G: LTE/LTE-Advanced for Mobile Broadband Sword and Silk Books
From the editors of the highly successful WCDMA for UMTS, this

new book provides a comprehensive and up-to-date reference to High Speed Packet Access (HSPA) technologies for WCDMA. The editors cover both HSDPA and HSUPA, including an in-depth description and explanation of 3GPP standards, and expected performance based on simulations and first measurements. The text also discusses the impact of HSDPA and HSUPA on network dimensioning, covers applications and end-to-end performance in detail, and includes a section on radio frequency requirements and terminal design considerations. The most comprehensive and advanced guide to the HSDPA (High Speed Downlink Packet Access) and HSUPA (High Speed Uplink Packet Access) technologies and standardisation, HSDPA/HSUPA for UMTS: Analyses the impact of HSDPA/HSUPA on network dimensioning, discussing co-existence with R99 (Release 99) and GPRS/EDGE (General Packet Radio Services/ Enhanced Data GSM Environment) Contains a section on applications and end-to-end (e2e) performance Includes a chapter on radio frequency (RF) requirements and terminal design considerations, covering different RF bands, multi-band HSDPA and multi-mode

HSDPA+EDGE challenges, power consumption Provides numerous illustrations of 3GPP (Third Generation Partnership Project) standards and performance This title provides excellent coverage of the area for system, element and chip designers, network planners, technical managers with vendors, operators and application developers. It is also ideal for postgraduates and researchers in related areas.

Simply Rich: Life and Lessons from the Cofounder of Amway Picador Australia

This book constitutes the thoroughly refereed post-conference proceedings of the 10th International Conference on Cognitive Radio Oriented Wireless Networks, CROWNCOM 2015, held in Doha, Qatar, in April 2015. The 66 revised full papers presented were carefully reviewed and selected from 110 submissions and cover the evolution of cognitive radio technology pertaining to 5G networks. The

papers are clustered to topics on dynamic spectrum access/management, networking protocols for CR, modeling and theory, HW architecture and implementations, next generation of cognitive networks, standards and business models, and emerging applications for cognitive networks.

The Almost Queen Hogarth

Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, UNIX and Shell Programming goes beyond providing a reference of commands to offer a guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scriptwriting concepts, and cover all material required for

understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells.

Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom. ICT for Transport Edward Elgar Publishing LTE- A and Next Generation Wireless Networks: Channel Modeling and Performance describes recent advances in propagation and channel modeling

necessary for simulating next generation wireless systems. Due to the radio spectrum scarcity, two fundamental changes are anticipated compared to the current status. Firstly, the strict reservation of a specific band for a unique standard could evolve toward a priority policy allowing the co-existence of secondary users in a band allocated to a primary system. Secondly, a huge increase of the number of cells is expected by combining outdoor base stations with smaller cells such as pico/femto cells and relays. This evolution is accompanied with the emergence of cognitive radio that becomes a reality in terminals together with the development of self-organization capabilities and distributed cooperative behaviors. The book

is divided into three parts: Part I addresses the fundamentals (e.g. technologies, channel modeling principles etc.) Part II addresses propagation and modeling discussing topics such as indoor propagation, outdoor propagation, etc. Part III explores system performance and applications (e.g. MIMO Over-the-air testing, electromagnetic safety, etc).

LTE network capabilities are enhanced with small cell deployment, with optimization and with new 3GPP features. LTE networks are getting high loaded which calls for more advanced optimization. Small cells have been discussed in the communications industry for many years, but their true deployment is happening now. New 3GPP features in Release

12 and 13 further push LTE network performance. This timely book addresses R&D and standardization activities on LTE small cells and network optimization, focusing on 3GPP evolution to Release 13. It covers LTE small cells from specification to products and field results; Latest 3GPP evolution to Release 13; and LTE optimization and learnings from the field.

"It ' s a startling and disconcerting read that should make you think twice every time a friend of a friend offers you the opportunity of a lifetime. " —Erik Larson, #1 New York Times bestselling author of *Dead Wake* and bestselling author of *Devil in the White City* Think you can ' t get conned? Think again. The New York Times bestselling author of *Mastermind: How to Think Like Sherlock Holmes* explains how to spot the con before they spot you.

" [An] excellent study of Con Artists, stories & the human need to believe " – Neil Gaiman, via Twitter A compelling investigation into the minds, motives, and methods of con artists—and the people who fall for their cons over and over again. While cheats and swindlers may be a dime a dozen, true conmen—the Bernie Madoffs, the Jim Bakkers, the Lance Armstrongs—are elegant, outsized personalities, artists of persuasion and exploiters of trust. How do they do it? Why are they successful? And what keeps us falling for it, over and over again? These are the questions that journalist and psychologist Maria Konnikova tackles in her mesmerizing new book. From multimillion-dollar Ponzi schemes to small-time frauds, Konnikova pulls together a selection of fascinating stories to demonstrate what all cons share in common, drawing on scientific, dramatic, and psychological perspectives. Insightful and gripping, the book brings readers into the world of the con, examining the relationship between artist and victim. The

Confidence Game asks not only why we believe con artists, but also examines the very act of believing and how our sense of truth can be manipulated by those around us.

Wall Street meets the Sons of Anarchy in *Hard Rules*, the smoldering, scorching first novel in the explosively sexy new *Dirty Money* series from New York Times bestselling author Lisa Renee Jones. How bad do you want it? The only man within the Brandon empire with a moral compass, Shane Brandon is ready to take his family's business dealings legitimate. His reckless and ruthless brother, Derek wants to keep Brandon Enterprises cemented in lies, deceit, and corruption. But the harder Shane fights to pull the company back into the light, the darker he has to become. Then he meets Emily Stevens, a woman who not only stirs a voracious sexual need in him, but becomes the

only thing anchoring him between good and evil. Emily is consumed by Shane, pushed sexually in ways she never dreamed of, falling deeper into the all-encompassing passion that is this man. She trusts him. He trusts her, but therein lies the danger. Emily has a secret, the very thing that brought her to him in the first place, and that secret could destroy them both. This is book ONE of FOUR in Shane and Emily's story. Excerpt from *Hard Rules* (*Dirty Money* book #1) His hand curls around mine and he drags it to his knee, and the way he's looking at me, like the rest of the room, no, the rest of the world, doesn't exist, steals my breath. I haven't allowed anyone to really look at me in a very long time. "Emily," he says, doing whatever he does to turn my name into a sin that seduces rather than destroys me. "Shane," I manage, but just barely. "Did

you say yes to dinner because you didn't want to be alone?" I am not sure where he is going with this, if it's about reading me or if he needs validation that I am here for him, so I give him both. "I like being alone," I say, and on some level, it really is true. "I said yes to dinner because you are the one who asked." My lips curve. "Actually you barely asked. You mostly ordered." "I couldn't let you say no." "I'm actually really glad you didn't." "And yet you say you like being alone?" "It's simple and without complication." "Spoken like someone who's lived the opposite side of the coin." "Haven't we all?" "Who burned you, Emily?" I blanch but recover with a quick, "Who says anyone burned me?" "I see it in your eyes." "Back to my eyes," I say. "Yes. Back to your eyes." "Stop looking." "I can't." Those two words sizzle, matching the heat in his eyes, and my throat goes dry. "Then stop asking so many questions." He reaches up, brushing hair behind my ear, his fingers grazing my cheek, and suddenly he is closer, his breath a tease on my cheek, his fingers settling on my jaw. "What if I want to know more about you?" "What if I don't want to talk?" "Are you suggesting I shut up and kiss you?" Yes, I think. Please. But instead I say, "I don't know. I haven't interviewed you as you have me. I know nothing about you. I want to know if you—" He leans in, and then his lips are on mine, a caress, a tease, that is there and gone, and yet I am rocked to the core, a wave of warmth sliding down my neck and over my breasts. He lingers, his breath fanning my lips, promising another touch I both need and want, as he asks, "You want to know if I
