Got manga? Christopher Hart's got manga, and he wants to share it with all his millions of readers—especially the beginners. With Manga for the Beginner, anyone who can hold a pencil can start drawing great manga characters right away. Using his signature step-by-step style, Hart shows how to draw the basic manga head and body, eyes, bodies, fashion, and more. Then he goes way beyond most beginner titles, exploring dynamic action poses, special effects, light and shading, perspective, popular manga types such as animals, anthros, and shoujo and shounen characters. By the end of this big book, the new artist is ready to draw dramatic story sequences full of movement and life.

### Electronics World + Wireless World SAGE Publications

A dazzling debut from one of Australia's most gifted young writers "Maguire keeps the prose crackling and the dialogue lively ... from the first page to the last." Publishers Weekly Sarah Clark's life is irrevocably changed at the age of 14 when her English teacher, Mr Carr, seduces her after class. Their affair is illegal, erotic, passionate and dangerous - a vicious meeting of minds and bodies. But when Mr Carr's wife discovers the affair, he has to choose between them and moves to another city with his family. Sarah is devastated and from that day on her life is defined by a series of meaningless, self-abasing sexual encounters, hoping with each man that she will experience the same delicious feelings she had with Mr Carr. Seven years later Daniel Carr walks back into Sarah's life and she is drawn once again into the destructive relationship. Is Sarah strong enough to "tame the beast"? PRAISE FOR EMILY MAGUIRE "At the heart of ... Emily Maguire's work lies an urgent need to pull away at the interconnecting threads of morality, society and human relationships." Sydney Morning Herald "what you get, along with a sharp mind and a keenness to investigate cultural confusions, is an engaging ability to put the vitality of the story first." Weekend Australian

### UNIX and Shell Programming Goodheart-Willcox Pub

Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, UNIX and Shell Programming goes beyond providing a reference of commands to offer a guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scripting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.

### Finance and Financial Markets S. Chand Publishing

The New York Times bestselling guide to thinking like literature's greatest detective. "Steven Pinker meets Sir Arthur Conan Doyle" (Boston Globe), by the author of The Confidence Game. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in Mastermind she shows us how. Beginning with the "brain attic" —Holmes' s metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience

and psychology, Mastermind explores Holmes' s unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world' s most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

In the Fourth Edition of Scale Development, Robert F. DeVellis demystifies measurement by emphasizing a logical rather than strictly mathematical understanding of concepts. The text supports readers in comprehending newer approaches to measurement, comparing them to classical approaches, and grasping more clearly the relative merits of each. This edition addresses new topics pertinent to modern measurement approaches and includes additional exercises and topics for class discussion. Available with Perusall—an eBook that makes it easier to prepare for class Perusall is an award-winning eBook platform featuring social annotation tools that allow students and instructors to collaboratively mark up and discuss their SAGE textbook. ### St. Martin's Griffin

This book focuses on LTE with full updates including LTE-Advanced (Release-11) to provide a complete picture of the LTE system. Detailed explanations are given for the latest LTE standards for radio interface architecture, the physical layer, access procedures, broadcast, relaying, spectrum and RF characteristics, and system performance. Key technologies presented include multi-carrier transmission, advanced single-carrier transmission, advanced receivers, OFDM, MIMO and adaptive antenna solutions, radio resource management and protocols, and different radio network architectures. Their role and use in the context of mobile broadband access in general is explained, giving both a high-level overview and more detailed step-by-step explanations. This book is a must-have resource for engineers and other professionals in the telecommunications industry, working with cellular or wireless broadband technologies, giving an understanding of how to utilize the new technology in order to stay ahead of the competition. New to this edition: In-depth description of CoMP and enhanced multi-antenna transmission including new reference-signal structures and feedback mechanisms Detailed description of the support for heterogeneous deployments provided by the latest 3GPP release Detailed description of new enhanced downlink control-channel structure (EPDDCH) New RF configurations including operation in non-contiguous spectrum, multi-bands base stations and new frequency bands Overview of 5G as a set of well-integrated radio-access technologies, including support for higher frequency bands and flexible spectrum management, massive antenna configurations, and ultra-dense deployments Covers a complete update to the latest 3GPP Release-11 Two new chapters on HetNet, covering small cells/heterogeneous deployments, and CoMP, including Inter-site coordination Overview of current status of LTE release 12 including further enhancements of local-area, CoMP and multi-antenna transmission, Machine-type-communication, Device-to-device communication

### Hard Rules Penguin

The first textbook available for A2 Level Philosophy students, and the sister companion to the immensely successful AS text, this text has been written in an engaging and accessible style and covers the AQA A2 Level specification precisely.

### Beautiful and Damned Picador Australia

This book constitutes the thoroughly refereed post-conference proceedings of the 10th International Conference on Cognitive Radio Oriented Wireless Networks, CROWNCOM 2015, held in Doha, Qatar, in April 2015. The 66 revised full papers presented were carefully reviewed and selected from 110 submissions and cover the evolution of cognitive radio technology pertaining to 5G networks. The papers are clustered to topics on dynamic spectrum access/management, networking protocols for CR, modeling and theory, HW architecture and implementations, next generation of cognitive networks, standards and business models, and emerging applications for cognitive networks.

### Oh Shit, Not Again! Andrews McMeel Publishing

The tour-de-force, hair-raising new novel from Herman Koch,

the New York Times bestselling author of The Dinner and Summer House with Swimming Pool Once a celebrated writer, M had his greatest success with a suspense novel based on a real-life disappearance. It told the story of a history teacher who went missing one winter after having a brief affair with a beautiful student of his. The teacher was never found. Upon publication, M's novel was a runaway bestseller, one that marked his international breakthrough. That was years ago, and now M's career is fading. But not when it comes to his bizarre, seemingly timid neighbor who keeps a close eye on him and his wife. Why? From alternating points of view, where no one is to be trusted, Herman Koch weaves together an intricate tale of a writer in decline, a teenage couple in love, a missing teacher, and a single book that entwines all of their fates. Thanks to M's novel, supposedly a work of fiction, everyone seems to be linked forever, until something unexpected spins the "story" off its rails. With ever increasing tension, his signature sardonic wit and world-renowned sharp eye for human failings, Herman Koch once again spares nothing and no one in his gripping new novel, a barbed performance that suspends readers in the mysterious space between fact and fiction.

### Mastermind Academic Press

"It' s a startling and disconcerting read that should make you think twice every time a friend of a friend offers you the opportunity of a lifetime." —Erik Larson, #1 New York Times bestselling author of Dead Wake and bestselling author of Devil in the White City Think you can' t get conned? Think again. The New York Times bestselling author of Mastermind: How to Think Like Sherlock Holmes explains how to spot the con before they spot you. " [An] excellent study of Con Artists, stories & the human need to believe " —Neil Gaiman, via Twitter A compelling investigation into the minds, motives, and methods of con artists—and the people who fall for their cons over and over again. While cheats and swindlers may be a dime a dozen, true conmen—the Bernie Madoffs, the Jim Bakkers, the Lance Armstrongs—are elegant, outsized personalities, artists of persuasion and exploiters of trust. How do they do it? Why are they successful? And what keeps us falling for it, over and over again? These are the questions that journalist and psychologist Maria Konnikova tackles in her mesmerizing new book. From multimillion-dollar Ponzi schemes to small-time frauds, Konnikova pulls together a selection of fascinating stories to demonstrate what all cons share in common, drawing on scientific, dramatic, and psychological perspectives. Insightful and gripping, the book brings readers into the world of the con, examining the relationship between artist and victim. The Confidence Game asks not only why we believe con artists, but also examines the very act of believing and how our sense of truth can be manipulated by those around us.

The Witch Needs Her Freedom. Ellara Wist, one of the many witches that fought on the losing side of the war, has no intentions of returning to Outerland when it is finished and she has no intention of letting her fellow witches suffer either. So, during her sentencing for war crimes against the kingdom of Aulen, she boldly offers their new king a proposal: she'll join the king's court as his own personal sorceress in exchange for the lives and freedom of those trapped in Outerland. The King Needs a Wife. Terran didn't want to be king. But after years of war and the loss of almost his entire family, he will not put the crown aside. But when a witch from his past offers herself as a sacrifice, he sees her as an equal. So, he instead counters her offer with one of his own: Don't be my sorceress. Be my Queen.

And the deal they strike will change their world forever. Desperate, Ellara agrees, swearing to herself that she could never love him. But as time reveals the man she's married not as the monster everyone thought he was and danger draws them closer together, she finds her vow almost impossible to keep. Once a Ferrara Wife... Running PressBook Pub LTE- A and Next Generation Wireless Networks: Channel Modeling and Performance describes recent advances in propagation and channel modeling necessary for simulating next-generation wireless systems. Due to the radio spectrum scarcity, two fundamental changes are anticipated compared to the current status. Firstly, the strict reservation of a specific band for unique standard could evolve toward a priority policy allowing the co-existence of secondary users in a band allocated to a primary system. Secondly, a huge increase of the number of

cells is expected by combining outdoor base stations with smaller cells such as pico/femto cells and relays. This evolution is accompanied with the emergence of cognitive radio that becomes a reality intermingled together with the development of self-organization capabilities and distributed cooperative behaviors. The book is divided into three parts: Part I addresses the fundamentals (e.g. technologies, channel modeling principles etc.) Part II addresses propagation and modeling discussing topics such as indoor propagation, outdoor propagation, etc. Part III explores system performance and applications (e.g. MIMO Over-the-air testing, electromagnetic safety, etc).
