**Programming in ANSI C** Let Us C

This book on C and Data Structures has been designed keeping in mind the students who take up the foundation course in their first semester at JNTU. Focused coverage of syllabus, variety of programs and very simple theory makes this book student friendly LET US C SOLUTIONS -15TH EDITION BPB Publications

Learn key topics such as language basics, pointers and pointer arithmetic, dynamic memory management, multithreading, and network programming. Learn how to use the compiler, the make tool, and the archiver.

**Computer Oriented Statistical and Numerical Methods** BPB Publications

Authored by most trusted name in the area, this text acts like a "Primer", moving step by step starting from fundamentals to core concepts in much desired logical flow and hence renders conceptual clarity along with simplicity. The book has a comprehensive coverage of foundational concepts of e# Programming, in the light of object orientation, which are explained in simple language and supported with good examples & programming exercises. Salient Features - Latest version of CLRS.0 included - In-depth coverage of topics like Winforms, Operator Overloading, Multithreading and Polymorphism - Uses validated html coding (part of web 2.0) in the examples Three new projects: • Data leakage detection • SMS System ASP. net • SMTP/POP3 mail server Enhanced Pedagogical Features: • Example programs: 122 • Case-studies (solved): 20 • Review Questions: 357 • Programming Exercises: 159 • Debugging exercises: 45

Tata McGraw-Hill Education

Written by one of the pioneers of computer education in India, this text is designed for the first-year engineering and MCA students of UPTU. It offers complete coverage of UPTU syllabus in easy-to-understand language.

Learn to Program with C McGraw-Hill Education

Object Oriented Programming with C++ and JAVA, 1e, has been designed to enable novice programmers to enhance their programming skills. The book provides numerous solved programs and review questions which enables the student to understand and test their programming skills. The illustrative approach and clear and precise presentation making it an ideal book for students.

**C for Engineers and Scientists** Tata McGraw-Hill Education

The sixth edition of this most trusted book on JAVA for beginners is here with some essential

updates. Retaining its quintessential style of concept explanation with exhaustive programs, solved examples, and illustrations, this text takes the journey of understanding JAVA to slightly higher level. The book introduces readers to some of the Core JAVA topics like JDBC, Java Servlets, Java Beans, Lambda Expression and much more. Practical real-life projects will give a better understanding of JAVA usage and make students industry-ready.

**Programming In C#, 3E** Tata McGraw-Hill Education

Written by the most well known face of India's IT literacy movement, this book is designed for the first course in C# taken by undergraduate students in Computers and Information Technology. The revised edition maintains the lucid flow and continuity which has been the strength of the book.

**Programming in ANSI C** Programming In Ansi C

This book is designed to help students in building their concepts in Data Structures. It introduces the subject in a simple and lucid manner. It adopts a student friendly approach to the subject matter with many solved examples and unsolved questions, illustrations and well structured C programs. This book will serve as a stepping stone for students in this course. Salient Features: 1. In-depth coverage on topics such as Graphs, Linked Lists, Arrays etc. 2. Explains run-time complexity of all algorithms 3. Diverse and useful pedagogical features such as illustrations, programs, important commands in programs, key terms etc.

**C PROG & DATA STRUCTURES-JNTU 4E** Tata McGraw-Hill Education

Some chapters in the book deal with the basic principles of chemistry while others are focused on its applied aspects, providing the correct interphase between the principles of chemistry and engineering. KEY FEATURES \* Chapters cover both basic principles of chemistry as also its applied aspects. \* Written in easy self-explanatory language and in depth at the same time. \* Review questions provided at the end of each chapter. \* A separate section 'Laboratory Manual' in Engineering Chemistry comprising 12 experiments is appended at the end of the book.

**Programming In Ansi C. 5E** Tata McGraw-Hill Education

Programming with JAVA, 3e, incorporates all the updates and enhancements added to JAVA 2 and J2SE 5.0 releases. The book presents the language concepts in extremely simple and easy-to-understand style with illustrations and examples wherever necessary. Salient Features Fully explains the entire Java language.

Discusses Java's unique features such as packages and interfaces. Shows how to create and implement applets. Illustrates the use of advanced concepts like multithread and graphics. Covers exception handling in depth. Debugging exercises and two full-fledged projects. Includes model questions from the Sun Certified JAVA Programmer Exam.

Third Edition Tata McGraw-Hill Education

Description: Best way to learn any programming language is to create good programs in it. C is not exception to this rule. Once you decide to write any program you would find that there are always at least two ways to write it. So you need to find out whether you have chosen the best way to implement your program. That's where you would find this book useful. It contains solutions to all the exercises present in Let Us C 15th Edition. If you learn the language elements from Let Us C, write programs for the problems given in the exercises and then cross check your answers with the solutions given in this book you would be well on your way to become a skilled C programmer. I am sure you would appreciate this learning path like the millions of students and professionals have in the past decade.
