The coronavirus disease 2019 (COVID-19) epidemic has dramatically spread throughout the world, which has also caused mental health problems among the public, especially vulnerable groups like children and adolescents. As a traumatic event, the outbreak of COVID-19 might increase the prevalence of a series of mental health problems in children and adolescents probably due to social distancing,

school closures, as well as separation from parents, and home quarantine. The continuing spreading of COVID-19 infection, as well as vaccine uptake strategies, quarantine policies, and health services during post epidemic era may also have a long-lasting side effect on children and adolescents. Children and adolescents are in critical periods of neurodevelopment and once they develop mental health problems, the long-lasting negative influence might span across their lifetime. Moreover, long-term multisystem sequelae, including neurological and psychiatric systems, of COVID-19 infection in children also compromise the development of physical and mental wellbeing in adulthood. Though there have been several studies on mental health consequences and long-term impact on the mental health of children and adolescents caused by COVID-19, there is still limited data and more comprehensive studies are needed on this important topic.

This book discusses current challenges related to teaching geography, mainly at the secondary school and higher education level. Focusing on a range of current topics, different methods, techniques, materials, applications, and approaches to geography education with a regional Central European perspective, the book makes an original contribution to the field. Most of the chapters aims at the practical development of the themes such

as geography curriculum (Part I), global education, inquiry-based education, project-based learning, case studies, powerful teaching (Part II), using of information and communication technologies (Part III) in geography teaching. The final part (Part IV) covers some geopolitical, and socio-geographical aspects of the aforementioned Central European former communist countries from the point of view how to teach them with various methods. Therefore, the book can appeal to many geography or science students, researchers and educators studying geography education around the world.

The Elementary School Journal World Heritage Publishers Ltd

This volume is a Festschrift in honor of Jacques Taminiaux and examines the primacy of the political within phenomenology. These objectives support each other, in that Taminiaux's own intellectual itinerary brought him increasingly to an affirmation of the importance of the political. Divided into four sections, the essays contained in this volume engage with different aspects of the political dimension of phenomenology: its dialogue with classic texts of political philosophy, the political facets of phenomenological praxis, phenomenology 's contribution to actual political debates, and the impact of Taminiaux 's work in the shaping of phenomenology 's notion of politics. The phrase "the primacy of the political" echoes the "primacy of perception" as it was famously defined by Merleau-Ponty. This book emphasizes, however, the inescapability of the political rather than its "foundational" character, i.e. the fact that various itineraries of thought, explored in different fields of

---

phenomenological research, give rise to politically relevant reflections. It points out and elucidates political connotations that haunt phenomenological concepts, such as ' world ' , ' self ' , ' nature ' , ' intersubjectivity, or ' language ' , and traces them to a broad range of approaches, concepts, and methods. In its explorations, the book discusses a broad range of thinkers, including, but not limited to, Aristotle and Kant, Bergson, Husserl, Heidegger, Merleau-Ponty, Gadamer, Ricoeur, and Arendt.
