This volume offers 17 essays on the apocryphal/deuterocan

onical books of Ben Sira (Ecclesiasticus) and Tobit. Four essays explore Tobit's connections with Genesis (Irene Nowell), Job (Anathea Portier-Young), Psalms (Stephen Ryan), and the New Testament (Vincent Skemp),

with a fifth considering the medieval Hebrew and Aramaic Tobit texts (Loren Stuckenbruck and Stuart Weeks). Five further essays examine Ben Sira's links with Genesis (Maurice Gilbert), Exodus (Friedrich Reiterer), Kings (Pancratius Beentjes), Prophets (Leo Perdue), and Proverbs (Jeremy Corley). Seven more essays on Ben Sira refer to the patriarch Joseph (Robert Hayward), Ezra (Michael Duggan), fear of God (Renate Egger-Wenzel), Qoheleth (Edward Owens), First Enoch (Benjamin Wright),

Letter of James (Núria Calduch-Benages), and Matthew's Gospel (James Aitken). The Chicago Manual of Style OECD Publishing
“ One of the most vital and original novelists of her generation. ” —Larissa MacFarquhar, *The New Yorker* From the bestselling author of *Americanah* and *We Should All Be Feminists* Fifteen-year-old Kambili and her older brother Jaja lead a privileged life in Enugu, Nigeria. They live in a beautiful house, with a caring family, and attend an exclusive missionary school. They're completely shielded from the troubles of the world. Yet, as Kambili reveals in her tender-voiced account, things are less perfect than they appear. Although her Papa is generous and well

respected, he is fanatically religious and tyrannical at home—a home that is silent and suffocating. As the country begins to fall apart under a military coup, Kambili and Jaja are sent to their aunt, a university professor outside the city, where they discover a life beyond the confines of their father ' s authority. Books cram the shelves, curry and nutmeg permeate the air, and their cousins ' laughter rings throughout the house. When they return home, tensions within the family escalate, and Kambili must find the strength to keep her loved ones together. *Purple Hibiscus* is an exquisite novel about the emotional turmoil of adolescence, the powerful bonds of family, and the bright promise of freedom. [Intertextual Studies in Ben Sira and Tobit](#) AOSIS

The low demonstrable effect of education research done in South Africa in particular – and Africa in general – continues to be a problem in scientific records in the educational sciences. This scholarly collected work addresses this obstacle and focuses on recommendations from scholars in different sectorial categories in the field of education. Scholars from a variety of sub-fields within the educational sciences reflect on this particular matter, revisiting the history of research and research outcomes and offering informed recommendations based on in-depth investigation and analysis of aspects of the various discourses within the relevant sub-fields. The scope of the content of this collected work centres on the issue of the lack of scientific records concerning the scientific raising of the impact of education research. The book aims at making a specific

contribution to the educational sciences by stimulating scholarly discussion around how to increase the recording of the significance of educational research done in Africa, and in South Africa in particular, and to redirect the research agenda into the direction of making more impact. Impact is conceptualised to mean both scholarly impact (that is being cited and being used as foundation for theory building and for further research) and practical impact (that is improvement of practice, teaching and learning in education institutions at all levels).

If Not Empire, What? Wipf and Stock Publishers

Phytomedicine: A Treasure of Pharmacologically Active Products from Plants aims to present updated knowledge of plant-based medicines in terms of their research and development, production, and utilization, from the viewpoint of sustainability

and by using the latest technologies. The book explores different phytometabolites on a mass scale, coupled with the efficacy, performance and applicability on target organisms to treat curable and fatal diseases. Readers will find a coherent package of phytotherapeutic information regarding inclusive assortment of research based, scientific amplitude of metabolites from the plant world encompassing various action plans. Information is presented sequentially regarding phytochemistry, biological activity and the serviceable aspects of bioactive compounds. The book also addresses various advancements and achievements of novel drugs from plants using molecular and enzymatic activities, and various technological tools in an ecofriendly fashion. Discusses phytotherapeutic properties for a wide range of medical conditions, including anti-pyretic, anti-infective, anti-malarial, Anti-AIDS, anti-diabetic, anti-cancerous, immune-modulatory applications Includes a discussion

of synergistic effects of formulations and antagonistic drug interactions Addresses advancements and achievements of novel plant-based drugs using molecular, enzymatic activities and various technological tools in an eco-friendly fashion

Life Applications from Every Chapter of the Bible WWW.Bible-And-Empire.Net

The first book dedicated to this common, serious, and complex equine disease, Equine Laminitis is the gold-standard reference to the latest information on every aspect of the disease and its treatment. Provides the first book devoted specifically to equine laminitis Discusses the current state of knowledge on all aspects of the disease,

including its history, relevant anatomical considerations, pathophysiology, the diagnostic workup, and clinical treatment

Presents 50 chapters written by leading international experts, under the editorship of the foremost authority on equine laminitis Offers a thorough understanding of this common affliction, grounded in the scientific literature Describes effective prevention and treatment plans

The blinkards John Wiley & Sons

The production of rice has increased considerably in recent years due to the release of improved varieties and the adoption of better fertilization practices. Nevertheless,

the production and use of inorganic N fertilizer involves costly investments in terms of energy and transport, the need for complex manufacturing plants, as well as the potential for environmental pollution. The use of agricultural systems that include dinitrogen fixing organisms appears to be an economically sound cultural practice. In the particular case of rice, biological nitrogen fixation by Azolla, blue-green algae (BGA), and heterotrophic microorganisms has long been recognized, in southeast Asia, as a fertilizer for rice culture. The Azolla-Anabaena association has the unique property of being able to retain a significant amount of nitrogenase activity in the presence of combined nitrogen, making the system compatible with inorganic nitrogen fertilization. Researchers working with Azolla (N

fixation) are dispersed in 2 countries of southeast Asia, Africa, Europe and Latin America, making it difficult to share ideas, concepts and research results on a more personal basis. Considering the potential positive impact of growing rice in association with Azolla, and the lack, to date, of an international gathering of scientists dedicated to Azolla research, the First International Workshop on "Practical Applications of Azolla for Rice Production" was organized by the University of Puerto Rico-Mayaguez Campus. Commerce Business Daily Springer Science & Business Media Statistical Postprocessing of Ensemble Forecasts brings together chapters contributed by international subject-matter experts describing the current state of the art in the statistical postprocessing of

ensemble forecasts. The book illustrates the use of these methods in several important applications including weather, hydrological and climate forecasts, and renewable energy forecasting. After an introductory section on ensemble forecasts and prediction systems, the second section of the book is devoted to exposition of the methods available for statistical postprocessing of ensemble forecasts: univariate and multivariate ensemble postprocessing are first reviewed by Wilks (Chapters 3), then Schefzik and Möller (Chapter 4), and the more specialized perspective necessary for postprocessing forecasts for extremes is presented by Friederichs, Wahl, and Buschow (Chapter 5). The second section concludes with a discussion of forecast verification methods devised specifically for evaluation of ensemble forecasts (Chapter 6 by Thorarinsdottir and Schuhen). The third section of this book is devoted to applications of ensemble postprocessing. Practical aspects of ensemble postprocessing are first detailed in Chapter 7 (Hamill), including an extended and illustrative case study. Chapters 8 (Hemri), 9 (Pinson and Messner), and 10 (Van Schaeybroeck and Vannitsem) discuss ensemble postprocessing specifically for hydrological applications, postprocessing in support of renewable energy applications, and postprocessing of long-range forecasts from months to decades. Finally, Chapter 11 (Messner) provides a guide to the ensemble-postprocessing software available in the R programming language, which should greatly help readers implement many of the ideas presented in this

book. Edited by three experts with strong and complementary expertise in statistical postprocessing of ensemble forecasts, this book assesses the new and rapidly developing field of ensemble forecast postprocessing as an extension of the use of statistical corrections to traditional deterministic forecasts. Statistical Postprocessing of Ensemble Forecasts is an essential resource for researchers, operational practitioners, and students in weather, seasonal, and climate forecasting, as well as users of such forecasts in fields involving renewable energy, conventional energy, hydrology, environmental engineering, and agriculture. Consolidates, for the first time, the methodologies and applications of ensemble forecasts in one succinct place Provides real-world examples of methods used

to formulate forecasts Presents the tools needed to make the best use of multiple model forecasts in a timely and efficient manner

This work is to compile our current knowledge on GY phytoplasma biology at the genomic, transcriptomics, proteomics and metabolomics level, as well as to summarize the approaches for their detection. Phytoplasma are the most poorly characterized plant pathogenic bacteria from the Mollicutes class. In

recent years new biostatistics and bioinformatics approaches have improved our understanding of their biology and interactions with host grapevines and a great improvement has been made toward their molecular detection, both in laboratories and on-site. They have a broad range of plant hosts among the monocots and dicots, and diseases of many important crops are associated with these pathogens. At least ten taxonomically unrelated phytoplasmas, one of them a quarantine pest in Europe, have been associated with grapevine yellows diseases (GY), which have great economic impact on viticulture worldwide.

Avoiding the Middle-Income Trap in Asia

Springer Science & Business Media

In this thoughtful and systematic exploration,

Friesen and Stoner understand the Bible to be an extended argument about life, love and power. In the various biblical texts, this argument presents two versions of the Hebrew god, one who aligns with kings and the religious establishment, the other who makes a fool of kings and aligns with everyday people. Through discussion of each biblical text, the authors highlight how this argument plays out in the history of the Israelites, the prophetic attempts to articulate an alternative to the nation-state, the life and teachings of Jesus, and the multi-ethnic community that emerged after Jesus'

death. Written in a popular style, the book serves as a concise and sometimes irreverent introduction to the entire Bible while demonstrating its immediate relevance to the problems of violence, insecurity and injustice. Through frequent quotations of scripture, the reader is encouraged to recognize the imperial worldview as the source of what most threatens Earth's future and to imagine an alternative to top-down rule by powerful elites. Although written primarily for readers who view the Bible as literature, the book reflects the authors' faith and provides a fresh reading for

people who regard the Bible to be much more than literature. This attempt to respect both approaches is facilitated by a discussion of seven assumptions held by biblical writers, but likely not held by modern readers. With these assumptions in mind, the reader is better prepared to make sense of texts that are not only very old, but also highly relevant to decisions we must make about whether we will continue to place our faith in the empire's answers.

Organic Farming,
Prototype for
Sustainable Agricultures
South Western
Educational Publishing

Stakeholders show a growing interest for organic food and farming (OF&F), which becomes a societal component. Rather than questioning whether OF&F outperforms conventional agriculture or not, the main question addressed in this book is how, and in what conditions, OF&F may be considered as a prototype towards sustainable agricultures. The book gathers 25 papers introduced in a first chapter. The first section investigates OF&F production processes and its capacity to benefit from the systems functioning to achieve higher self-sufficiency. The second one proposes an overview of organic performances providing commodities and public goods. The third one

focuses on organics development pathways within agri-food systems and territories. As well as a strong theoretical component, this book provides an overview of the new challenges for research and development. It questions the benefits as well as knowledge gaps with a particular emphasis on bottlenecks and lock-in effects at various levels.

Equine Laminitis

There is perhaps no area of neuro-ophthalmology that is advancing more rapidly with respect to an understanding of its anatomy and physiology than the ocular motor system. For this reason, it is difficult not only to keep up with the latest information concerning the basic mechanisms involved in the control of

eye movements but also to remain up to date regarding the pathophysiology of specific disorders of eye movement. The material in this book is derived from a two-day course on eye movements held in The Netherlands in 1986. The course was designed as an introduction to the normal ocular motor system and to disorders of eye movements and was aimed toward orthoptists, ophthalmologists, optometrists, neurologists, and neurosurgeons. The chapters in this book were compiled by a trio of experts in the field of eye movements and contain discussions of anatomy and physiology of the ocular motor system, techniques of examination of patients with diplopia, and

pathophysiology of specific disorders of ocular motility. Many of the authors of these chapters are among the most active investigators of eye movements in the world today, and their comments thus reflect the latest information in the field. This text is both basic and comprehensive and thus has something for everyone, from the student just beginning a study of the ocular motor system to the seasoned 'veteran' who wishes to know the latest information regarding central ocular motor control mechanisms. Neil R. Thomas Register of American Manufacturers Springer
This book provides a collective examination of the theoretical, empirical, and clinical perspectives of pregnancy-related anxiety.

Pregnancy-related anxiety is a distinct form of anxiety that is experienced by pregnant women and is characterized by pregnancy-specific fears and worries. This form of anxiety has been associated with a range of negative obstetric, neonatal, and maternal outcomes. There has been increased research interest in this form of anxiety, particularly over the last 15 years. The content is organized in three sections. The first section provides a thorough understanding of pregnancy-related anxiety, ranging from its historical development, evidence of its distinctiveness to the antecedents and outcomes of this anxiety for the mother and child. The second section examines key clinical issues around diagnosis and treatment specifically, current diagnosis/screening for this anxiety and approaches for intervention and treatment. The final section considers emerging areas of research such as pertinent issues around culture and acculturation which are key issues in an increasingly multicultural world. Moreover, the effects of pregnancy-related anxiety on the woman's broader psychosocial functioning are considered with specific chapters on body image and sexual abuse, two key areas of concern. A seminal resource, this book provides a broad examination of the topic from multiple frameworks and perspectives which sets this book apart from other books in print. This book intends to inform and stimulate future research studies, as well as increase awareness and understanding of pregnancy-related anxiety. It is a must-read for researchers, educators, clinicians, and higher education students who care about delivering better support and services to pregnant women,

particularly those who are vulnerable and distressed. Tools of the Mind Oxford University Press on Demand

This latest addition to the Institute's Political Parties and Democracy in Theoretical and Practical Perspectives series describes some of the approaches that political parties around the world have used to fulfill their policy formulation role.

The first section describes comparative approaches in developing party ideologies, rules, structures, and processes that can improve policy processes. In the second section, 12 case studies provide overviews of practical experiences in party policy development around the world.

Since many policymakers aspire to pull their countries out of the middle-income trap and into the ranks of high-income countries, they must understand the factors that hinder or support the transition. This book defines the middle-income trap and examines the roles of manufacturing, finance, and trade openness in achieving sustainable development. The book also explores the role of government policy in fostering growth in the People's Republic of China. A common theme is that such policies may have unforeseen side effects

that undermine their effectiveness, including how the hukou registration system and land-use policy control the pace of urbanization.

This research handbook provides meaningful coverage on current trends in the dynamic

education systems of Africa. It presents the

main findings on current issues in the education

systems from different African countries.

Specifically, it examines

education policies and what can be done differently by African

nations to strengthen these policies. The

objective is to highlight African nations ' capacity

to address issues of social justice to generate

ideas that can help

translate the increasing strengths of the continent into achieving sustainable development.
