Lysistrata is the greatest work by Aristophanes. This blank and rash statement is made that it may be rejected. But first let it be understood that I do not mean it is a better written work than the *Birds* or the *Frogs*, or that (to descend to the scale of values that will be naturally imputed to me) it has any more appeal to the collectors of "curious literature" than the *Ecclesiastusae* or the

Thesmophoriazusa. On the mere grounds of taste I can see an at least equally good case made out for the Birds. That brightly plumaged fantasy has an aerial wit and colour all its own.

How Simon Gittany murdered Lisa Harnum. A terrified woman runs for the door, her final effort to escape a cruel and controlling fiancé. She is too late. A secret camera captures him covering her mouth to suppress her screams as he drags her back inside. 69 seconds later Lisa Harnum is dead. But Simon Gittany insists he has done nothing wrong- he claims his beautiful partner died for a secret she feared would be exposed. The grainy final image of Lisa alive would later horrify a nation, a chilling reminder that the greatest harm can come to us from the hands of those we

love. It was also the first hint police had that all was not what it seemed with the outwardly charismatic Gittany. What was Lisa's secret? Did the bubbly Canadian hide a past she would die to protect? How far did Gittany, a man with a criminal past, go to watch her every move and conversation? Police sensed a ruse the man who installed cameras in every room in his luxury apartment was trying to lead them off track with tales of his troubled lover's final days. Their suspicions are further confirmed when it emerges his well-kept recording devices had been switched off only hours before Lisa died. With only two witnesses to that final minute, one who can no longer speak, detectives question if they could ever prove a charge of murder. A week later, a grieving, distraught mother in Toronto answers the phone. A man who looked up 15 storeys into the city skyline has come forward. And what he's seen changes everything. The Fall goes behind the headlines of the country's most captivating court case to bring the story of how Lisa fell in love and grew to fear her fiancé. It reveals that while Lisa couldn't escape the danger of Simon Gittany she left behind clues to help catch a killer from beyond the grave.

Joseph Brodsky, one of the most prominent contemporary American poets, is also among the finest living poets in the Russian language. Nevertheless, his poetry and the crucial bilingual dimension of his poetic world are still insufficiently understood by Western audiences. How did the Russian-born Brodsky arrive at his present status as an international man of letters and American poet laureate? Has he been created by his bilingual experience, or has he fashioned the bilingual self as a necessary precondition for writing poetry in the first place? Here David Bethea suggests that the key to Brodsky, perhaps the last of the great Russian poets in the "bardic" mode, is in his relation to others, or the Other. Brodsky's master trope turns out to be "triangular vision,"

the tendency to mediate a prior model (Dante) with a closer model (Mandelstam) in the creation of a palimpsest-like text in which the poet is implicated as a triangulated hybrid of these earlier incarnations. In pursuing this theme, Bethea compares and contrasts Brodsky to the poet's favorite models--Donne, Auden, Mandelstam, and Tsvetaeva--and analyzes his fundamental differences with Nabokov, the only Russian exile of Brodsky's stature to rival him as a bilingual phenomenon. Various critical paradigms are used throughout the study as foils to Brodsky's thinking. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English, local language, or biliteracy. It draws on data from interviews with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo-Asare's findings inform the development of a conceptual

framework which highlights the socio-cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education, and English-language learning in postcolonial Ghana but also for those looking to identify the thematic and methodological nuances of studying literacy and education in postcolonial contexts.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the*

Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
