At the close of the ninth century Alfred the Great lamented the decay of teaming in England and proposed a program of official translations and scholarly study to set his country back on the path of intellectual inquiry. In his Preface to Pope Gregory's *Pastoral Care*, Alfred equated a knowledge of texts with the right governance of self and state. That document, rich in the history of Anglo-Saxon England and suggestive of the uses of literacy, has long been a canonical text in the teaching of the Old English language, and it begins Seth Lerer's study of the place of texts in the construction of the Anglo-Saxon literary imagination. *Beowulf*, the Old English *Daniel*, Bede's *Ecclesiastical History*, the *Exeter Book Riddles*--all contain scenes of reading and writing, moments of self-conscious inscription and decipherment that have the power to alter the reader's conception of the mythical and historical, the commonplace and the fantastic. Lerer analyzes these scenes, which, taken in sequence, contribute to a reassessment of Old English literature, its nature and social function. He seeks to understand the workings of the lit-erate imagination in the

history and fiction of the Anglo-Saxons. In the course of the book he addresses questions about how a Christian literature evokes its pagan past; about the nature of authority in Anglo-Saxon history, politics, and literature; and he considers how scholarly approaches to these questions--whether by medieval or by modern readers--create canons of literary history. *Literacy and Power in Anglo-Saxon Literature* is the first book-length study to consider the construction of an early English cultural mythology of writing. Lerer's philological and historical explication of the texts provides new approaches for assessing representations of reading and writing in pre-Conquest literature. His book is a timely and provocative addition to medieval studies.

The fourteenth-century anchorite known as Julian of Norwich offered fervent prayers for a deeper understanding of Christ's passion. The holy woman's petitions were answered with a series of divine revelations that she called "shewings." Her mystic visions revealed Christ's sufferings with extreme intensity, but they also confirmed God's constant love for humanity and infinite capacity for forgiveness. Julian of Norwich's *Revelations of Divine Love* have had a lasting influence on Christian thought. Written in immediate, compelling terms, her experiences remain among the most original and accessible expressions of medieval mysticism. This edition contains both the short text, which is mainly an account of the shewings and Julian's initial analysis of their meaning, and the long text, completed some 20 years later and offering daringly speculative interpretations.

Featuring essays from some of the most prominent voices in early medieval studies, *Dating Beowulf* playfully redeploys the word 'dating', which usually heralds some of the most divisive critical impasses in the field, to provocatively phrase a set of new relationships with an Old English poem. The volume argues for the relevance of the early Middle Ages to affect studies and vice-versa, offering a riposte to antifeminist discourse and opening avenues for future work by specialists in the history of emotions, literary theorists, students of Old English literature and medieval scholars alike. To this end, the essays embody a range of critical approaches from queer theory to animal studies and ecocriticism to actor-network theory.

Sir Gawain and the Green Knight Laurel Leaf
The image of a giant sword melting stands at the structural and thematic heart of the Old English heroic poem Beowulf. This meticulously researched book investigates the nature and significance of this golden-hilted weapon and its likely relatives within Beowulf and beyond, drawing on the fields of Old English and Old Norse language and literature, liturgy, archaeology, astronomy, folklore and comparative mythology. In Part I, Pettit explores the complex of connotations surrounding this image (from icicles to candles and crosses) by examining a range of medieval sources, and argues that the giant sword may function as a visual motif in which pre-Christian Germanic concepts and prominent Christian symbols coalesce. In Part II, Pettit investigates the broader Germanic background to this image, especially in relation to the god Ing/Yngvi-Freyr, and explores the capacity of myths to recur and endure across time. Drawing on an eclectic range of narrative and linguistic evidence from Northern European texts, and on archaeological discoveries, Pettit suggests that the image of the giant sword, and the characters and events associated with it, may reflect an elemental struggle between the sun and the moon, articulated through an underlying myth about the theft and repossession of sunlight. *The Waning Sword: Conversion Imagery and Celestial Myth in 'Beowulf'* is a welcome contribution to the overlapping fields of Beowulf-scholarship, Old Norse-Icelandic literature and Germanic philology. Not only does it present a wealth of new readings that shed light on the craft of the Beowulf-poet and inform our understanding of the poem's major episodes and themes; it further highlights the merits of adopting an interdisciplinary approach alongside a comparative vantage point. As such, *The Waning Sword* will be compelling reading for Beowulf-scholars and for a wider audience of medievalists.

Beowulf is the conventional title of an Old English heroic epic poem consisting of 3182 alliterative long lines, set in Scandinavia, commonly cited as one of the most important works of Anglo-Saxon literature. It survives in a single manuscript known as the Nowell Codex. Its composition by an anonymous Anglo-Saxon poet is dated between the 8th and the early 11th century. *The Rime of the Ancient Mariner* Cambridge University Press

This is not a book about what Beowulf means but how it means and how the reader participates in the process of meaning construction; to this end, it is a bringing together of contemporary critical theory and Old English poetry. Overing's primary aim is to address the poem on its own terms, to trace and develop an interpretive strategy consonant with the terms of its difference from all other poems. Beowulf's arcane structure describes cyclical repetitions and patterned intersections of themes that baffle a linear perspective; the structure suggests instead the irresolution and dynamism of deconstructionist freeplay of textual elements.
