Schools are drowning in test data, but many schools do little with test results other than sort students into various categories of proficiency or lack thereof. Some educators feel testing has taken the joy out of teaching. Others believe valuable instructional time has been lost as a result of testing. Yet, NCBL and other federal and state mandates have placed educators under increasing pressure to make certain all students meet standards on high-stakes tests. Now, more than ever, teachers and administrators need to embrace testing as a valuable classroom tool to guide instruction, use efficient technological resources available for test scoring and analysis, and profit from the benefits of test analysis to increase learning and achievement. Using Test Data for Student Achievement shows educators, step by step, how to use test data to facilitate student learning. The book combines research, technology and Sindelar's experience as a teacher and administrator to provide practical and efficient ways to use test data to increase learning, close achievement gaps and even raise test scores.

EnVision Math Prentice Hall

Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing.
