Have you ever noticed that we tend to compartmentalize when teaching our children? In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring, just to name a few. In driving a car, you see and read road signs, read maps, and count miles. It has become quite clear that there is an abundance of math curriculums available that are nothing but monotonous drill

sheets dressed up in pretty colors. Pretty colors do not make a living book. Content, story, and the ability to show math in real life make a living math book. Math Level 1: Teach math lessons through the creative means of a life story Provides a link for the downloadable answer key Has a scope and sequence that contains learning numbers 0 to 100, circles and patterns, counting and addition, days of the week, and telling time. This book was written to be used by you and your young student together. It is the story of a twin brother and sister, Charlie and Charlotte, who are visiting their grandparents' farm. They soon learn that the farm is full of learning opportunities! As you read their story, your students will be drawn into the adventure along with the twins. They will learn about numbers, shapes, place value, adding, and subtracting. They will also learn about gardening, baby animals on the farm, nature, and the love of family. They will hear exciting stories from Grandpa and Grandma, and they will be invited to join the twins on their living math adventures. We hope you have a grand time on this adventure!

A challenging year of standards lies ahead. With the new *Finish Line English Language Arts, Third Edition*, your students can get the extra support they need to master the Common Core-based standards you teach every day. *Finish Line* supplements your core basal program with instruction and practice that are concise and simply presented. The workbook is divided into units that parallel the strands in the Common Core State Standards (CCSS) for ELA at grade level. *Finish Line* features a gradual release model--from teacher-led instruction to individual student work--in a four-part lesson format: Skill Introduction, Focused Instruction, Guided Practice, and Independent Practice. The book includes a full

unit of writing standards for students to practice the writing process, learn how to answer open-ended questions, and apply grammar and usage conventions. Much like Common Core-based standards and assessments, the book requires students to do close reading of rigorous text. Unit reviews include traditional item types and item types found on Common Core assessments. A glossary includes terms that appear in boldface throughout the book.

Why so many of America's public university students are not graduating—and what to do about it The United States has long been a model for accessible, affordable education, as exemplified by the country's public universities. And yet less than 60 percent of the

---

students entering American universities today are graduating. Why is this happening, and what can be done? *Crossing the Finish Line* provides the most detailed exploration ever of college completion at America's public universities. This groundbreaking book sheds light on such serious issues as dropout rates linked to race, gender, and socioeconomic status. Probing graduation rates at twenty-one flagship public universities and four statewide systems of public higher education, the authors focus on the progress of students in the entering class of 1999—from entry to graduation, transfer, or withdrawal. They examine the effects of parental education, family income, race and gender, high school grades, test scores, financial aid, and characteristics of universities attended (especially their selectivity). The conclusions

are compelling: minority students and students from poor families have markedly lower graduation rates—and take longer to earn degrees—even when other variables are taken into account. Noting the strong performance of transfer students and the effects of financial constraints on student retention, the authors call for improved transfer and financial aid policies, and suggest ways of improving the sorting processes that match students to institutions. An outstanding combination of evidence and analysis, *Crossing the Finish Line* should be read by everyone who cares about the nation's higher education system.
