By Roman Hands Focus Answer key to "Greek Prose Composition" (0941051897, £19.95). KE-RA-ME-JA Focus Orlando: A Biography, is a fictional work published in 1928. Virginia Woolf was an English author, essayist, publisher, and writer of short stories, regarded as one of the foremost modernist literary figures of the twentieth century. During the interwar period. The novel is semi-biographical based and dedicated to Woolf's lover Vita Sackville-

West. Well regarded for its impact on gender studies and the stylized approach in which it portrays women. The novel was conceived as a "writer's holiday" from more structured and demanding novels. Woolf allowed neither time nor gender to constrain her writing. The protagonist, Orlando, ages only thirty-six years and changes gender from man to woman. This pseudo-biography satirizes more traditional Victorian biographies that emphasize facts and truth in their subjects' lives. Although Orlando may have been intended to be a satire or a holiday, it touches on important issues of gender, self-knowledge, and truth with Virginia Woolf's signature poetic style. **Reading Greek**

By Roman Hands takes Latin out of the textbook and allows students to see and translate Latin as it actually appeared on Roman monuments, walls and tombs. The first collection of entirely authentic and unadapted inscriptions and graffiti accessible to beginning and intermediate students of Latin, By Roman Hands unites the study of language and culture in a novel and compelling way and at a level that the Latin can be grasped and discussed by early Latin learners. Ranging from a love letter hastily scratched on a Pompeian wall to the proclamation of an

emperor's achievements formally inscribed on a monumental arch, these carefully selected texts afford fascinating glimpses into the lives and minds of the Romans, even as they illustrate and reinforce the basic elements of the Latin language. This edition, revised to work in parallel with the second edition of Susan Shelmerdine's Introduction to Latin or any standard beginning Latin text, includes more texts and illustrations, and an additional section of inscriptions for practice and review.

In this book, Thomas F. Tartaron presents a new and original reassessment of the maritime world of the Mycenaean Greeks of the Late Bronze Age. By all accounts a seafaring people, they enjoyed maritime connections with peoples

as distant as Egypt and Sicily. These long-distance relations have been celebrated and much studied; by contrast, the vibrant worlds of local maritime interaction and exploitation of the sea have been virtually ignored. Dr Tartaron argues that local maritime networks, in the form of 'coastscares' and 'small worlds', are far more representative of the true fabric of Mycenaean life. He offers a complete template of conceptual and methodological tools for recovering small worlds and the communities that inhabited them. Combining archaeological, geoarchaeological and anthropological approaches with ancient texts and network theory, he demonstrates the application of this scheme in several case studies. This book presents new perspectives and challenges for all archaeologists with interests in maritime connectivity.

This new edition of Carl Ruck's text keeps its experimental approach and felicitous style, while including substantial changes that make the material easier to teach and learn. The book has been consolidated into a more concise and direct format so that the material can be covered in less time, and the somewhat intimidating aural-oral emphasis that characterized the first edition has been reduced. These improvements, together with the accessibility inherent in the structural approach to

grammar, make Ancient Greek: A New Approach useful not only as an innovative text in the text in the classroom but for general self-instruction as well.

Exercises in Greek Prose Composition John Wiley & Sons

How were the Greeks of the sixth century BC able to invent philosophy and tragedy? In this book Richard Seaford argues that a large part of the answer can be found in another momentous development, the invention and rapid spread of coinage, which produced the first ever thoroughly monetised society. By transforming social relations monetisation contributed to the ideas of the universe as an impersonal system, fundamental to Presocratic philosophy, and of the individual alienated from his own kin and from the gods, as found in tragedy.
