### A History of Greek Art Focus

A highly innovative approach to Classical Greek for beginning students  
Agean Art and Architecture Hackett Publishing

The period between the collapse of the Mycenaean civilization around 1200 BC and the dawning of the classical era four and half centuries later is widely known as the Dark Age of Greece, not least in the eponymous history by A. M. Snodgrass published by EUP in 1971, and reissued by the Press in 2000. In January 2003 distinguished scholars from all over the world gathered in Edinburgh to re-examine old and new evidence on the period. The subjects of their papers were chosen in advance by the editors so that taken together they would cover the field. This book, based on thirty-three of the presentations, will constitute the most fundamental reinterpretation of the period for 30 years. The authors take issue with the idea of a Greek Dark Age and everything it implies for the understanding of Greek history, culture and society. They argue that the period is characterised as much by continuity as disruption and that the evidence from every source shows a progression from Mycenaean kingship to the conception of aristocratic nobility in the Archaic period. The volume is divided into six parts dealing with political and social structures; questions of continuity and transformation; international and inter-regional relations; religion and hero cult; Homeric epics and heroic poetry; and the archaeology of the Greek regions. Copiously illustrated and with a collated bibliography, itself a valuable resource, this book is likely to be the essential and basic source

of reference on the later phases of the Mycenaean and the Early Greek Iron Ages for many years.

How did the Greek view of Persia and Persians change so radically in the archaic and classical Greek sources that they turned from noble warriors into peacock-loving cross-dressers with murderous mothers? This book looks at the development of a range of responses to the Achaemenids and their Empire. Through a study of ancient texts and material evidence from the archaic and classical periods, Janett Morgan investigates the historical, political and social factors that inspired and manipulated different identities for Persia and the Persians within Greece.

From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The Cambridge Guide to Homer examines the influence and meaning of Homeric poetry from its earliest form as an ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macro-epic' essays arranged thematically that are accompanied by shorter complementary 'micro-epic' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Money and the Early Greek Mind Hackett Publishing

How were the Greeks of the sixth century BC able to invent philosophy and tragedy? In this book Richard Seaford argues that a large part of the answer can be found in another momentous development, the invention and rapid spread of coinage, which produced the first ever thoroughly monetised society. By transforming social relations monetisation contributed to the ideas of the universe as an impersonal system, fundamental to Presocratic philosophy, and of the individual alienated from his own kin and from the gods, as found in tragedy.

The Cambridge Prehistory of the Bronze and Iron Age Mediterranean offers new insights into the material and social practices of many different Mediterranean peoples during the Bronze and Iron Ages, presenting in particular those features that both connect and distinguish them. Contributors discuss in depth a range of topics that motivate and structure Mediterranean archaeology today, including insularity and connectivity; mobility, migration, and colonization; hybridization and cultural encounters; materiality, memory, and identity;

community and household; life and death; and ritual and ideology. The volume's broad coverage of different approaches and contemporary archaeological practices will help practitioners of Mediterranean archaeology to move the subject forward in new and dynamic ways. Together, the essays in this volume shed new light on the people, ideas, and materials that make up the world of Mediterranean archaeology today, beyond the borders that separate Europe, Africa, and the Middle East.

By Roman Hands takes Latin out of the textbook and allows students to see and translate Latin as it actually appeared on Roman monuments, walls and tombs. The first collection of entirely authentic and un-adapted inscriptions and graffiti accessible to beginning and intermediate students of Latin, By Roman Hands unites the study of language and culture in a novel and compelling way and at a level that the Latin can be grasped and discussed by early Latin learners. Ranging from a love letter hastily scratched on a Pompeian wall to the proclamation of an emperor's achievements formally inscribed on a monumental arch, these carefully selected texts afford fascinating glimpses into the lives and minds of the Romans, even as they illustrate and reinforce the basic elements of the Latin language. This edition, revised to work in parallel with the second edition of Susan Shelmerdine's Introduction to Latin or any standard beginning Latin text, includes more texts and illustrations, and an additional section of inscriptions for practice and review.

A comprehensive overview of ancient ambers, the only such book in English, is now revised. First published in 2012, this catalogue presents fifty-six Etruscan, Greek, and Italic carved ambers from the Getty Museum's collection—the second largest body of this material in the United States and one of the most important in the world. The ambers date from about 650 to 300 BC. The catalogue offers full description of the pieces, including typology, style, chronology, condition, and iconography. Each piece is illustrated. The catalogue is preceded by a general introduction to ancient amber (which was also published in 2012 as a stand-alone print volume titled Amber and the Ancient World). Through exquisite visual examples and vivid classical texts, this book examines the myths and legends woven around amber—its employment in magic and medicine, its transport and carving, and its incorporation into jewelry, amulets, and other objects of prestige. This publication highlights a group of remarkable amber carvings at the J. Paul Getty Museum.

Introduction to Attic Greek Bristol Classical Press

This book is a new analysis of maritime life among the Mycenaean Greeks (ca. 1600-1100 BC). Whereas long-distance trade with Egypt or Cyprus has received much attention, the locations of Mycenaean harbors are virtually unknown and local maritime networks have been largely ignored. The main purpose of the book is to provide concepts and methods for recovering lost harbors and short-range maritime networks, using information from ship construction, coastal paleoenvironments, oral histories, texts including Homer, and archaeological fieldwork. The book is intended for all those with interests in maritime connectivity in the past.
