Headquarters Department of Army

The history of the American Ranger is a long and
colorful saga of courage, daring, and outstanding
leadership. It is a story of men whose skills in the
art of fighting have seldom been surpassed. The
United States Army Rangers are an elite military
formation that has existed, in some form or
another, since the American Revolution. A group
of highly-trained and well-organized soldiers, US
Army Rangers must be prepared to handle any
number of dangerous, life-threatening situations
at a moment's notice-and they must do so calmly
and decisively. This is their handbook. Packed

with down-to-earth, practical information, The Ranger Handbook contains chapters on Ranger leadership, battle drills, survival, and first aid, as well as sections on military mountaineering, aviation, waterborne missions, demolition, reconnaissance and communications. If you want to be prepared for anything, this is the book for you. star-general and former Secretary of State Colin Powell's legendary career in public service. At its heart are Powell's "Thirteen Rules," —notes he accumulated on his desk that served as the basis for the leadership presentations he delivered throughout the world. Powell's short-but-sweet rules such as "Get mad, then get over it" and "Share credit," are illuminated by revealing personal stories that introduce and expand on his principles for effective leadership: conviction, hard work, and above all, respect for others. In work and life, Powell writes, "It is the human gesture that counts." A compelling storyteller, Powell shares parables both humorous and solemn that offer wise advice on succeeding in the workplace and beyond. "Trust your people," he counsels as he delegates presidential briefing responsibilities to two junior aides. "Do your best--someone is watching," he advises those

just starting out, recalling his own teenage summer job shipping cases of soda. Powell combines the insight he gained serving in the top ranks of the military and in four presidential administrations, as well as the lessons learned from his hardscrabble upbringing in the Bronx and his training in the ROTC. The result is a powerful portrait of a leader who was reflective, self-effacing, and grateful for the contributions of every employee, no matter how junior. Powell's writing--straightforward, accessible, and often very funny--will inspire, move, and surprise readers. Thoughtful and revealing, his book is a brilliant and original blueprint for leadership. The Career Fitness Program Harper Collins Discusses how to plan a staff ride of a battlefield, such as a Civil War battlefield, as part of military training. This brochure demonstrates how a staff ride can be made

available to military leaders throughout the Army, not just those in the formal education system.

If pacifists are correct in thinking that war is always unjust, then it follows that we ought to eliminate the possibility and temptation of ever engaging in it; we should not build war-making capacity, and if we already have, then demilitarization—or military abolition—would seem to be the appropriate course to take. On the other hand, if war is sometimes justified, as many believe, then it must be permissible to prepare for it by creating and maintaining a military establishment. Yet this view that the

justifiability of war-making is also sufficient to justify war-building is mistaken. This book addresses questions of jus ante bellum, or justice before war. Under what circumstances is it justifiable for a polity to prepare for war by militarizing? When (if ever) and why (if at all) is it morally permissible to create and maintain the potential to wage war? In doing so it highlights the ways in which a civilian population compromises its own security in maintaining a permanent military establishment, explores the moral and social costs of militarization, and evaluates whether or not these costs are worth bearing.

teachers from multiple critics both historically and

impact of this advice to teachers, as well as the
motives behind it. It poses precise questions about the
groups that gave the advice. Who were they? What

How did they calculate costs? What aims did they
profess? What aims did they conceal? Whom did they
attract? Whom did they alienate? When did they
succeed? When did they fail?
