Name/Section: _____ Date: _____ Rock Cycle Diagram The Rock Cycle diagram below is an easy-to-read model of how rocks can change over time.

Directions: Use the diagram to answer the questions below. 1. What are the three classes of rocks? The three classes of rocks are igneous, sedimentary, and metamorphic.

Rock Cycle Diagram With Answer Key - Learny Kids

The rock cycle is driven by two forces: (1) Earth's internal heat engine, which moves material around in the core and the mantle and leads to slow but significant changes within the crust, and (2) the

hydrological cycle, which is the movement of water, ice, and air at the surface, and is powered by the sun.
