Aventuras McGraw-Hill Education Now a global bestseller, the remarkable life of Rigoberta Mench ú , a Guatemalan peasant woman, reflects on the experiences common to many Indian communities in Latin America. Mench ú suffered gross injustice and hardship in her early life: her brother, father and mother were murdered by the Guatemalan military. She learned

Spanish and turned to catechistic work as an expression of political revolt as well as religious commitment. Mench ú vividly conveys the traditional beliefs of her community and her personal response to feminist and socialist ideas. Above all, these pages are illuminated by the enduring courage and passionate sense of justice of an extraordinary woman.

The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences. Now in its 11th edition, Biostatistics: A Foundation for Analysis in the Health Sciences continues to offer in-depth guidance toward biostatistical concepts, techniques, and practical applications in the modern healthcare setting. Comprehensive in scope yet detailed in coverage, this text helps students understand—and appropriately

use—probability distributions, sampling distributions, estimation, hypothesis testing, variance analysis, regression, correlation analysis, and other statistical tools fundamental to the science and practice of medicine. Clearly-defined pedagogical tools help students stay up-to-date on new material, and an emphasis on statistical software allows faster, more accurate calculation while putting the focus on the underlying concepts rather than the math. Students develop highly relevant skills in inferential and differential statistical techniques, equipping them with the ability to organize, summarize, and interpret large bodies of data. Suitable for both graduate and advanced undergraduate coursework, this text retains the rigor required for use as a professional reference.

Leifer's Study Guide for Introduction to Maternity and Pediatric Nursing is a rich resource that enhances your comprehension and application of material from every chapter of the textbook. With a variety of learning activities, critical thinking exercises, case studies, and review questions, this study guide reinforces your mastery of the essential maternity and pediatric nursing concepts and skills you need to pass the NCLEX-PN® Examination and succeed in your nursing

career. NCLEX exam-style multiple-choice review questions at the end of each chapter test basic chapter knowledge as well as ask for appropriate nursing actions, what the nurse should expect in terms of medical care of the patient, and what complications the patient is at risk of developing. Case Studies and Applying Knowledge activities provide additional opportunities to apply learned information to clinical care.

Thinking Critically activities require you to apply what you've learned in the textbook to new situations and draw conclusions based on that knowledge. Learning activities include matching, labeling, and completion exercises to help you learn basic concepts of maternity and pediatric nursing. Crossword puzzles in selected chapters are a nice way to change up the format when testing comprehension of terms and concepts. Answer key is located on the student's Evolve website. Several Thinking Critically sections and case studies with critical thinking questions have been added. Alternate-item format questions are included in the review questions for the NCLEX® Examination.

This book provides a new interpretation of the ethical theory of G.W.F. Hegel. The aim is not only to give a new interpretation for specialists in German Idealism, but also to provide an analysis that makes Hegel's ethics accessible

for all scholars working in ethical and political philosophy. While Hegel's political philosophy has received a good deal of attention in the literature, the core of his ethics has eluded careful exposition, in large part because it is contained in his claims about conscience. This book shows that, contrary to accepted wisdom, conscience is the central concept for understanding Hegel's view of practical reason and therefore for understanding his ethics as a whole. The argument combines careful exegesis of key passages in Hegel's texts with detailed treatments of problems in contemporary ethics and reconstructions of Hegel's answers to those problems. The main goals are to render comprehensible Hegel's notoriously difficult texts by framing arguments with debates in contemporary ethics, and to show that Hegel still has much to teach us about the issues that matter to us most. Central topics covered in the book are the connection of self-consciousness and agency, the relation of motivating and justifying reasons, moral deliberation and the holism of moral reasoning, mutual recognition, and the rationality of social institutions.

This is a comprehensive study of the literary function of prayer in Luke-Acts, employing narrative critical methodology and focusing on the theme's relation to Luke's historiographical aims Holmas asserts that the distribution of strategically-placed prayer notices and prayers throughout Luke-Acts serves a twofold purpose. First, it is integral to Luke's project of authenticating the Jesus-movement as accredited by Israel's God. Holmas shows that Luke presents a consistent pattern of divine affirmation and redemption attending the tenacious prayers of the faithful ones throughout every major phase of his narrative - in turn demonstrating continuity with the pious Israel of the past. Secondly, most importantly the 'ultimate' purpose of Luke's emphasis on prayer is didactical. In Luke's gospel Jesus summons his disciples (and implicitly his readers) to confident and persistent prayer before the Eschaton, assuring them of God's readiness to answer their entreaties. Luke's historical account as a whole provides narrative reinforcement of this affirmation. Just as God has been consistent in responding to the diligent prayers of his faithful ones in recent history, satisfying and fulfilling Israel's hopes for redemption in the Jesus movement, he will assuredly secure ultimate vindication at the end of time for those who persist in prayer. It was formerly the Journal for the Study of the New

Testament Supplement, a book series that explores the many aspects of New Testament study including historical perspectives, social-scientific and literary theory, and theological, cultural and contextual approaches. The Early Christianity in Context series, a part of JSNTS, examines the birth and development of early Christianity up to the end of the third century CE. The series places Christianity in its social, cultural, political and economic context. European Seminar on Christian Origins and Journal for the Study of the Historical Jesus Supplement are also part of JSNTS.

Handbook of the Biology of Aging, Eighth Edition, provides readers with an update on the rapid progress in the research of aging. It is a comprehensive synthesis and review of the latest and most important advances and themes in modern biogerontology, and focuses on the trend of 'big data' approaches in the biological sciences, presenting new strategies to analyze, interpret, and understand the enormous amounts of information being generated through DNA sequencing, transcriptomic, proteomic, and the metabolomics methodologies applied to aging related problems. The book includes discussions on longevity pathways and interventions that modulate aging, innovative new tools that facilitate systems-level approaches to aging research, the mTOR pathway and its importance in age-related phenotypes, new strategies to pharmacologically modulate the mTOR pathway to delay aging, the importance of sirtuins and the hypoxic response in aging, and how various pathways interact within the context of aging as a complex genetic trait, amongst others. Covers the key areas in biological gerontology research in one

volume, with an 80% update from the previous edition Edited by Matt Kaeberlein and George Martin, highly respected voices and researchers within the biology of aging discipline Assists basic researchers in keeping abreast of research and clinical findings outside their subdiscipline Presents information that will help medical, behavioral, and social gerontologists in understanding what basic scientists and clinicians are discovering New chapters on genetics, evolutionary biology, bone aging, and epigenetic control Provides a close examination of the diverse research being conducted today in the study of the biology of aging, detailing recent breakthroughs and potential new directions

In 1690, Christiaan Huygens (1629-1695) published *Traité de la Lumière*, containing his renowned wave theory of light. It is considered a landmark in seventeenth-century science, for the way Huygens mathematized the corpuscular nature of light and his probabilistic conception of natural knowledge. This book discusses the development of Huygens' wave theory, reconstructing the winding road that eventually led to *Traité de la Lumière*. For the first time, the full range of manuscript sources is taken into account. In addition, the development of Huygens' thinking on the nature of light is put in the context of his optics as a whole, which was dominated by his lifelong pursuit of theoretical and practical dioptrics. In so doing, this book offers the first account of the development of Huygens' mathematical analysis of lenses and telescopes and its significance for the origin of the wave theory of light. As Huygens applied his mathematical proficiency to practical issues pertaining to telescopes – including trying to design a perfect telescope by means of mathematical theory – his dioptrics is significant for our understanding of seventeenth-century relations between theory and practice. With this full account of Huygens' optics, this book sheds new light on the history of seventeenth-century optics and the rise of the new mathematical sciences, as well as Huygens' oeuvre as a whole. Students of

the history of optics, of early mathematical physics, and the Scientific Revolution, will find this book enlightening.
